OP, you seriously defaced your school website

And then brag about it on a public forum?

Most Indian school websites are backed by government.

If this goes too far, I assume you are going to jail or at least kicked out of your school.

You know you can't use a VPN on HF, that means your real IP and ISP are held over with Omni and he wouldn't hesitate to give it over to the police if this goes too far.

That's the worst thing anyone can do

It doesn't matter if you are using 3k proxies +VPN + TOR + any other shit, if you then tell people what you have done.

(Aug 22, 2015 05:13 PM)myt9h Wrote: [\[CITE\]](#) Brother used vpns ,and secured networks logs erased done sincerely.

Firstly Hack Forums has blacklisted the majority of VPNs so there's already one mistake. If you've ever disconnected from your VPN and accidentally gone to hotmail while there's still a session (signed in) then your IP would have been logged there also, among other things such as your Facebook and what not, there's hundreds of various ways they can track you.

I think you seriously doubt the skills of the police or even network engineers who work at your school.
