Thread: [\[TUT\] how to get good icons for files](#)

TheUnknownPlague - August 22, 2015, 11:09 am

hello everyone im back with a new tut on how to get icon strait from the files you want

first download the tool from here [download](#)

it's the BeCylIconGrabber one

[Virustotal Scan](#)

next open it up

find the file you want (im using teamspeak)
click it then click the icon and save

now you have a fresh icon to use on your stub ?

Good tutorial!

There is another program that does this too called IconsExtract:

<http://www.nirsoft.net/utls/iconsext.html>

Or you could just download this icon pack made by my friend Zelix

Used something similar 2 years ago but found that the icons weren't in such a good quality.
Nevertheless, well done OP!

TheUnknownPlague - August 22, 2015, 8:09 pm

yea but download packs for icons go bad this you can get new icons daily
