Thread: [2015 THE BEST CRYPTERS ON HF!| MY HONEST REVIEW | READ THIS BEFORE BUYING ANY CRYPTER](#)

Forc?d - August 22, 2015, 3:23 pm

Old and dead, long gone long gone

OneHundred14 - August 22, 2015, 7:19 pm

I like this review, its really honest 100%. If you go to their sales thread you will see the same that you can see here.

I dont like autolt because the stub is really big. In that list i like dataprotector and trillium, they have video in their threads showing how they can bypass in runtime the best av like avast, norton, eset or avira.

Let me assure you that even though many crypters will have videos, nowadays it will be much more difficult to bypass. Trust me

Anyway, I never recommended to someone about a bad crypter. Honest opinion is really important.

But you really should give a check on these crypters: , Because they are the most known crypters here. (Sorry if i missed some)

Dolphin Protector

Abyss Protect

Cyber Seal

Cryptex Reborn

JanaDark Crypter

And in the end you should tell us which crypter you prefer and why, Why you choose that, Because its better? Have more features? FUD?

Your review seems HQ, But you have to tell us more details.

I will be glad to see your review about the crypters I mentioned in my post.

g

Thank you!

I wanted to take a look at those myself however my wallet is empty atm.
So not sure what do further on.

Though i would not suggest my diverse basic since seller is rude and won't help with any issue you will be having

Still paranoid as fuck to waste money on crypters.. So many vouches that are fake..

What i decided i might buy soon:

Data protector v2

Nod32 is very strong in these scene recently, i don't think any crypter can bypass it at this current stage(unless private build)

Also why won't you add a scan of each crypter?

Ok well first of all. All of those GEN detections is not because of the crypter. Somthing is up with your settings since GEN detections usually is because of your assembly/icon settings.

Second..... you're a retard if you don't think it supports .net

I don't bother with scantime results because they can change all the time, and since i only receive 2-3 days trial license top i cant say anything about the FUD time.

That is why i only post runtime results

matissshakeris - September 1, 2015, 2:22 pm

Dolphin protector can bypass nod32 runtime so i suggest ya checking that one out

Though haven't yet tried it

GanDino - September 1, 2015, 11:29 pm

The best thread ever. Shitty crypter owner fear the shit. Finally a good ting to let everybody know about the offer on HF. To much idiots try to sell their detected shit and make money. the ones who work as advertised don't fear that thread. Why should they?

This thread helps a lot of pple to make their decision which crypter to buy, I found out that it's to expensive to buy cheap crypter. I would never buy a crypter where the owner feels like God, this is a disease here on HF. If crypters are wrong advertised, the owners are scammers, not Gods.

Nice thread anyway. Thanks for that.

cruspy - September 2, 2015, 1:29 am

Nice thread. If only I had seen this before purchasing a month's subscription to another crypter not found on this list. It makes it past scantime but hardly ever goes for FUD runtime. I'll be checking out Data Protector based on the feedback I've been hearing about it. Definitely excited to see some positive reviews and honest vouches.

My opinion to that:

Go for Deluxe. It is a really good and fully FUD crypter. You have tons of options and you won't get better support on HF in case of any prblms.

Currently diverse basic is a piece of garbage in my opinion. That's my constructive criticism.

Obviously I think it's not working on my stub as it's done with c# or vb I think and is incompatible with

autoit. Binder is garbage, scanner is garbage, other features I cannot speak on. Hopefully DEV provides other options, I didn't see that they were not even in the version, kind of sneaky to add the radio buttons on the form and hope that buyers don't see your note that it only supports autoit which is useless as fuck and detected by bitdefender and 5 other antiviruses.

EvilNerd - September 24, 2015, 6:43 pm

EXCELLENT thread, finally an honest, competent crypters evaluation, with runtime scan !

Definitely we need more of this, I'm fed with those sales threads of shitty crypters, full of people posting fake reviews like "OMG is fuuuud" with scans of calc.exe, with authors threatening who post something about detection. "wtf this is a sales thread, problems only on PM, otherwise ban and -rep you !"

for crypters, detection means low quality, then an open discussion on this topic helps to improve the quality of the products sold here and should be promoted

Also an indipendent PERIODICAL evaluation like this one should be mandatory for all crypters on sale.

sparner3x - September 27, 2015, 9:35 am

that's a grate review ,it really helped me, thanks

Hawkdude77 - September 27, 2015, 2:39 pm

I love posts like this their so cool to check out. Makes me know what is real and whats fake.

Crocs - September 28, 2015, 4:54 am

Thanks for the review man! Too many fake vouches on popular threads nowadays.

Please can i have your mail contact..Is urgent

Mikael Blomkvist - October 17, 2015, 4:28 pm

I bought my 1st crypter based on this post. Best decision ever. Long life to DeluxeCrypt.

antonym - October 17, 2015, 4:46 pm

Best Crypter so far Broad Crypter, but expensive, 1k for good asm stub.

1K? No stub is worth that much bro.

Deluxe is by far the best on HF

maxlifted - October 18, 2015, 8:32 am

i need a fud crypter, can anyone help. I want paid version

I have tried many crypters, among whom is the cryptex, most of them are shit and their customer service is nothing to write home about, so arrogant and proud. And they keep vouching themselves with another username user just to make others believe that their product is good. Admin should look into this manner because these guys are ripping people off their money.

LOL, you're saying all the sellers are multi's?

Also I highly doubt you used Cryptex in October (Since you only joined in October, or are you also using "another username user"?) because it was closed for a massive runtime update until a few days ago.

This is a very nice thread. Pro's and cons of crypters u tested.

It would be nice to know with what ,rat(s) u tested this.

Click my signature brother!

Delux is truly the best

sou1010 - October 28, 2015, 6:08 am

thank you for this post i have choose Deluxecrypter thank you

after i had read this post totally satisfy thank you long time i was looking for this a treal crypter at good price thx bro

wasdwasd - October 29, 2015, 6:08 am

Very helpful thread, thank you!

But is it possible to bypass ESET Smart Security with DeluxeCrypt or any other crypter? (I think the memory scan could make problems)

johannes nm - October 29, 2015, 11:42 am

nicely done review, thank you. Thanks to you i now know what to buy

mak1311 - October 31, 2015, 3:48 am

I bought DeluxeCrypt thanks you thread ... I have no regrets, amazing and very powerful Crypter. And verry Good Support a+++++ !

MemoryLeak0 - October 31, 2015, 9:49 am

Very nice thread but I dont understand your rating of Trillum Crypt Reloaded. I think the detections is very important and Trillum Crypt don't bypass Avast, Avira, Bitdefender, Kaspersky, AVG and Norton on Runtime. Why you give this Crypter 7 points? ?

Best Regards,
Creepx

Kokomikta152 - October 31, 2015, 10:23 am

not accurate - but honest and thank you for that!

i think you should do a review about the rat's here in hf, it will help for a lot of people.

please somebody help me, how can i buy Dolphin Protector ,

i dont want to make mistake in buying and im seeing different online sellers in different websites,
please which site can i buy it

Toxic Legend - December 22, 2015, 1:22 am

What about project phantom crypter?

scoxxx - December 22, 2015, 8:51 pm

Great post OP. Thank you really much. Both for this and your best RAT reviews. These threads helped me a lot in deciding what I actually want to buy saving me a lot of money. Thanks again.

Project [] - December 22, 2015, 9:27 pm

Could you do a possible review on project photon?

keyunlocker - March 22, 2016, 5:38 pm

which is the best Crypter with NanoCore?

Pekls - March 23, 2016, 7:22 am

Good suggest, thanks for the help :)

godofagod - April 4, 2016, 11:58 pm

Hey I need a good crypter that works with NanoCore RAT with a great price, Looking for a lifetime one. DeluxeCrypter looks sick but i hate to pay like every month or every three months. Hope he can release a lifetime version soon

Vats - April 12, 2016, 2:45 am

Thank You for your reviews. It was indeed helpful. Hope these ratings and reviews are genuine and not paid. Because I am purchasing it right now based on your reviews.

Thank You,
Vats

Nice thread, thanks for the review. Posting here so i can find this later.

Ghzt - June 13, 2016, 6:39 am

You should review more crypters man, Thread is amazing and it would help out members ?

BoomClanModz - June 22, 2016, 7:33 pm

Can someone link me to JanaDark Crypter

kent0o - July 8, 2016, 6:17 am

@Poster, Is DeluxeCrypt still in service or offering sales support?

Mitlar - July 8, 2016, 6:45 am

Lol. If you were smart enough to look at the time this thread was made you can see that these results are outdated. I would suggest looking at meeting's thread instead unless you want outdated info: <https://hackforums.net/showthread.php?tid=5199646>

i want to make purchase immediately

sugarboi007 - October 10, 2016, 2:28 pm

WHAT IS THE BEST CRYPTER FOR NJRAT.
CYBERSEAL IS GOOD BUT TOO COMPLICATED.
INFACIT ITS NOT 100% FUD. ITS JUST OVERRATED.
PLS IS NJRAT SCANTIME OR RUNTIME?
