Beginner's Handbook for Kik E-whoring

IntroductionWelcome to my guide into the world of E-Whoring. This will primarily focus on using Kik Messenger as your communication platform, where you will be talking to all of your 'customers'. "E-Whoring", for our purposes, is pretending to be a woman online in order to solicit money from men. Considered to be a blackhat method of making money, if done right e-whoring can give you quite a lot of extra income. It does take a lot of work, and at times it feels like any other tedious job. As long as you keep grinding and searching for new ways to improve your technique, you will be making good money in no time.

This guide is meant for beginners that are looking to get started. It will not contain more advanced information such as using ManyCams or VCWs. It is a simple guide on how to get started making money e-whoring on basic sites. It's very possible to make \$20-40+ per day using this basic strategy.

Things to KnowFrequently Asked Questions

Is e-whoring illegal?

- Pretending to be someone else and soliciting money is illegal, yes. The chances of getting caught doing any of this, though, is slim to none unless you involve far more illegal factors such as child pornography or blackmail.

What payment methods should I accept?

- I would strongly recommend only accepting Amazon Gift Cards (AGCs). PayPal has caused problems for many people in this subforum, feel free to search for some older posts about accounts being locked, getting charged back, etc. Some people do choose to use a Canadian Paypal account to avoid some limitations, and they will transfer the money immediately. Again, I recommend using only AGCs if you want to avoid problems.

Where can I find a good, unsaturated picture pack?

- You can find tons of packs on the internet, just search Google and you'll find hundreds of them, usually with previews. You can also search on HF for "picture pack" in the e-whoring section, with pages and pages of results.

HF's E-Whoring Rules

1. No adult images with nudity
2. No linking to adult websites
3. No discussions on extortion or blackmail
4. No topics or discussion on breaking Paypal TOS or fraud

Getting Started Required Programs

Bluestacks

- Bluestack is a program that lets you run Android apps on your computer. This is necessary if you'd like to use Kik Messenger on the computer, which is highly recommended in order to chat with all of your potential customers faster. You can download it here: bluestacks.com.

Kik Messenger for Bluestacks

- You need an older version of Kik Messenger to use the fake camera application. This is important and will be explained later. [HERE](#) is an older .API that you can install into Bluestacks. After you install this, go [HERE](#) to download the fake camera application. Now in Kik, when you go to send a picture you should have the option to open the camera with the Fake Camera application.

Picture Packs "Picture Packs" are packs full of pictures of the same girl. Some of them even have videos. The best picture packs you can find are the ones that have "proof" pictures such as random poses and/or holding up a piece of paper that you can photoshop your customer's name on. The more pictures, the better.

There are plenty of picture packs offered for free on this subforum, and even more if you do a quick Google search.

Here is a link to a ton of different packs:

Traffic Sources

Forums and Chatrooms

I'm typically not a fan of using chatrooms or forums to post my kik, because I end up getting barely any traffic for a lot of work. Although, it is definitely one of the most popular options for beginners here. Basically all it involves is spamming your kik username on adult/sexting-related chatrooms and message boards. You just have to hope that horny guys see your username and decide to message you.

Here's a really great list of sites you can advertise your username on, compiled by [Peacock](#):
Spoiler ([Click to View](#)) kikcontacts.com

kikfriend.com

kwello.com

kikusers.com

kikfriendfinder.co.uk

Dating Websites and Apps Dating websites are by far my favorite ways to get people onto my kik. The thing is, many people lead off with the fact that they're selling nude pictures or a video, and people just ignore them. What you should be doing on these sites is striking up a conversation with these lonely guys in the same location as your e-whore profile. It does take some work but once you have built even a very small connection with them you can hint about needing money for something (textbooks, rent, anything) and imply that you would be willing to give them "special pictures". Many times people will be interested in you and want to help you out even without pictures, as long as you keep the amount reasonably low such as \$10-20.

You want to seem like someone who would actually be on a dating site to seem more believable. There are so many obviously fake profiles out there of extremely hot models. The truth is, hot chicks don't typically need to make online dating profiles. This method works very well if you use a mediocre, semi-attractive woman.

Here are some of my favorite sites:

Spoiler ([Click to View](#))

[BRAND NAME REMOVED] - [BRAND NAME REMOVED] is a very popular dating app for iPhones

and Androids. On [BRAND NAME REMOVED], your Facebook account is used to login. You can choose up to 6 pictures for your profile as well as give yourself a custom bio. You should upload all 6 pictures, and write a bio that makes you sound like a real girl, not someone just selling nudes. This is a REALLY good method, probably my most effective. PROTIP: You have a limited number of "swipes"/matches, so use them on people you think would buy pictures. Hate to say that but most of the time the more attractive guys aren't going to be interested in your pics, go for the guys that seem unattractive or awkward if you really want people that are desperate enough to pay for your pics and don't want to waste swipes.

[MeetMe](#) - Meetme.com is a site primarily used by teens. There is a feature to let you see every local member online at the time. You can easily copy/paste some default opener to tons of different people and get instant responses.

Skout - Skout.com is a website/app similar to Meetme, a basic dating platform that is very popular with young adults. It seems to have more people in their mid-20's than MeetMe, which may or may not be good for e-whoring depending on the age of your e-whore's profile.

OkCupid - Free dating website/app, caters more towards college-age kids and adults.

These sites/apps will DEFINITELY get you a high amount of traffic, just strike up conversations with hundreds of random guys and let them know they can reach you on Kik. Never do any selling on these sites as you could get banned, instead use them as platforms to drive traffic to your kik by giving people your username. Another common tactic is to make your profile photo a picture of your kik name.

Fetish Websites

Many people here will probably not be happy with my releasing of this information, but I do not care. Information should be free, and I'm tired of seeing people pay for eBooks that have this information inside.

There are all kinds of fetishes out there in the world. The most interesting for our purposes, is called "Financial Domination". This is when guys find it sexy for women to take their money..literally. The women are usually referred to as "Mistress", "Goddess", "Princess", etc. and the men are usually "slaves" or "piggies". There are all kinds of real women out there called "findoms" (financial dominants) that are abusing men for their money. This is a GOLDMINE for E-Whoring because the guys are never looking for one-time payments, they are looking for a Mistress to use them for LONG periods of time and control their money.

This is by far the hardest way to E-Whore listed in this guide but by far the most rewarding, if done correctly. You must study and do research on how people respond to certain findoms, what works for them and what doesn't work for others. It will take a lot of trial and error to get that one slave who pays you daily, but they're out there. You must also have a GREAT picture pack, preferably with great VCWs just in case they ask to cam verify. If you can make them believe you're real, and cater to their needs, you're doing better than most people already.

Here are some sites related to this "financial domination" fetish:

Spoiler ([Click to View](#)) [FetLife](#) - FetLife is a huge social platform for kinky people with all sorts of fetishes. Sort of like an adult, BDSM-version of Facebook. You are only interested in financial domination, so when you sign up you should hit "Groups" at the top and search "financial", "money",

etc and join every group related to the fetish. Simply post in each of these groups that you're looking for slaves and wait for the messages to come to you, OR go searching for subs that may be interested and message them.

Findoms - Findoms.com is THE SINGLE HARDEST SITE to get accepted into when it comes to this but it is literally a GOLD MINE!!! This site connects findoms with slaves looking to serve them, and the best part? The slaves have to pay \$30 just to join the site, so you KNOW they have money and aren't time wasters. The worst part? The dommes must all be CAM VERIFIED, so you will need a GREAT picture pack / vcw that has never been used before. It may seem hard but it IS possible to be accepted, I'm living proof. @FakeDoms on Twitter exposes fake dommes on that site as well, so you know they're getting accepted all the time..You just have to work for it.

CollarSpace - Collarspace.com is another fetish website that covers all the bases, not just findom. It isn't as good as it used to be, but you can still find a lot of people using it. My tip is to just mass message all the male sub profiles you see on the site, and give them your kik username. It's not as popular as it once was but people still do frequent the site looking for Dommes (just not always findoms).

Financial Domination is crazy, both in terms of how hard it can be to setup AND in how much money you can earn doing it. It's definitely a lot of effort, and at times will feel like you're working an actual job. But most of the top-earning E-whores are using this method, and have several slaves that give them money each and every day just for frequent communication. I posted one of these sites for free not too long ago (Fetlife) and received numerous messages asking me to delete the post because it is supposedly some 'secret' method that only top earners are using. INFORMATION SHOULD BE FREE, people.

Conclusion

If you've come this far, I would just like to thank you for taking the time to read my little guide. I wrote this because even with the good tutorials that are already out there, newbie questions are asked every single day here in this subforum. I had a lot of information I wanted to share that I felt hadn't been shared properly yet. Once again, this is intended for beginners who aren't quite sure where to start. Using methods in this guide you should easily be able to see upwards of \$30-50+/day if you grind hard enough and do a lot of trial and error to see what works and what doesn't. Practice makes perfect, you can't expect to do good on your first day.

If you have any questions or comments, feel free to reply and I will answer you within 24 hours.

This is a super nice tutorial OP! Well done! You've done basically a nice updated alternative to Boxyy. GG!

Erby - August 22, 2015, 6:23 pm

Right off the bat I liked the format; it's really soft on my eyes if that makes any sense and it's not really bunched together. I also liked how you kept this a bit unbiased by saying that E-Whoring is indeed illegal. Also, I've surprisingly never heard of CollarSpace at all.

I'm pretty sure many new users are going to benefit off this guide. Thanks.

Wired? - August 22, 2015, 6:25 pm

Quick predicament, all the older versions of kik don't seem to be working for me. Whenever I message anyone, they never message back, not one, like the older versions of kik dont allow you to message people until updating.

Boxyy's guide is a little more complete and in-depth, with more programs and such. Mine is geared more towards absolute beginner's who want only the basic information they need to start off with. Along with that it's a little bit easier to read, and updated a bit.

(Aug 22, 2015 06:54 PM)walid928 Wrote: [\[CITE\]](#) can i know what is blackmail please ??

Blackmail is when you make somebody pay you by threatening them to give away their personal information or expose something private about them.

For example if you make your customer take naked pics of himself, you find his Facebook friends and say "if you don't pay me \$1,000 I will send all of your friends and family your naked pics".

This is illegal and really dangerous. Not allowed to talk about it on HF.

Unfortunately I don't know about bots, I don't think bots are very good for e-whoring because talking to them yourself makes you look much more real! ?
