Will reply with my honest review.

EDIT:

First off I would like to say Thanks a lot to OP.

I bought a key and had a problem with the key at first(my own mistakes 100%)

Now I am trying the software and it works as described!

I would've loved it to be a bit faster, but that probably make it less stable.

All in all a great program that works as described, if this is what you are looking for I would not hesitate to buy it.
