Thread: [Legacylink or Luminosity Rat?](#)

beginwithme - August 23, 2015, 5:19 am

Hello guys! I am looking for paid RAT with some advanced features. I am literally confused on LegacyLink and Luminosity Rat. As I found these two Rats only on Forum with some advanced Features.

Can anyone suggest me which Rat is better... I am looking for the Rat with more features and more stability.

Here you go man - <https://hackforums.review/category/2>

Have a look at some of the reviews I made , might help you make a decision.

LuminosityLink FOR SURE!

I can 100% recommend you that! But its all up to you! ;)

Thanks ! but LuminosityLink doesn't have inbuilt crypter and don't know whether it is FUD or not

The owner of legacylink is currently developing another rat while the owner of luminosity is active and upgrading his product. That sums it up 4 you.

LuminosityLink isnt FUD but its pretty great
LegacyLink is FUD and its still pretty great

If you can afford a crypter after buy LuminosityLink if you cant id suggest Legacy
