Thread: [Onu.im // Anonymous Chats In Browser // No Registration Required // Instant \[UPDATE\]](#)

**Veezon** - August 23, 2015, 4:54 pm

Hello HackForums, I thought I'd take my time to introduce to you my upcoming project... Onu.im. Onu allows you to instantly create a private and anonymous chat within seconds without even registering.

Here is a screen shot of the front page of the site (I linked in imgur because full size img tag would be too large): <https://i.imgur.com/gKUfnxC.jpg>

I'll explain to you how it works... First of all, a user will visit the site and then click generate link, this will generate them a unique chat link which they can click. Once they're on the chat link they'll be prompted to enter a nickname.

They will send the chat link to their partner who they wish to chat with and they'll join and enter a nickname. Once the chat has ended it is gone forever and cannot be traced, making it completely anonymous. However, in case of scammers, the option has been added so that if both users consent, the chat logs can be saved.

This site will come in handy if you deal a lot on HF or just want to have a one off talk with someone and be completely anonymous. This saves the use of XMPP and Skype and just makes life easier.

An example of use would be:

User A posts a thread about buying BTC. User B sends User A a PM with a chat link and they can quickly complete the deal via IM which I think everyone can agree is much better than slowly waiting for PMs.

I hope you can all use my site, it'll be released sometime during this week.

EDIT:

[17/09/2015] There were some unexpected delays (developer had health issues) but we are finally VERY close to launch! We are just adding the finishing touches! Here are some designs I thought I'd share:

<https://imgur.com/a/ZOvuO>

EDIT:

[25/09/2015] It's coming together REALLY nicely now. Looking for a few testers soon. We are SO close to completion!

**KFC Watermelon** - August 23, 2015, 4:56 pm

This sounds like an awesome concept. I can see myself using this.

**Scymo** - August 23, 2015, 4:58 pm

Your ideas always astound me. This sounds amazing.

**Regulus** - August 23, 2015, 4:58 pm

Damn man this is amazing. I'll use this for sure. :)

**Zivex** - August 23, 2015, 4:59 pm

Heard about this a while ago from my good friend Veezon, definitely looking forward to this.

**Meow** - August 23, 2015, 4:59 pm

I will use it for sure, looking forward to see this. ?

**Limited Edition** - August 23, 2015, 5:46 pm

I thought I was going to be the guy who got to post this for you ? haha. You got some awesome feedback so far and like I said, it would be very useful for the users here at HF.

**The Chief** - August 23, 2015, 5:46 pm

This is actually something i'm looking forward to!

**Veezon** - August 23, 2015, 5:49 pm

Thanks fellas for all the positive feedback, I myself am super excited to launch this!

**DuguWudi** - August 23, 2015, 7:37 pm

(Aug 23, 2015 05:49 PM)Veezon Wrote: [\[CITE\]](#) Thanks fellas for all the positive feedback, I myself am super excited to launch this!

Nice, maybe this will be better than skype since most people are worried about skype ip resolver.?

What browsers supported for this?

**Veezon** - August 23, 2015, 7:41 pm

(Aug 23, 2015 07:37 PM)DuguWudi Wrote: [\[CITE\]](#) Nice, maybe this will be better than skype since most people are worried about skype ip resolver.?

This works in any browser, my friend! And yes, maybe it will be, maybe if this works out well we could make it a desktop app too that has similar functions to Skype eg calls.

**DuguWudi** - August 23, 2015, 7:44 pm

(Aug 23, 2015 07:41 PM)Veezon Wrote: [\[CITE\]](#) This works in any browser, my friend! And yes, maybe it will be, maybe if this works out well we could make it a desktop app too that has similar functions to Skype eg calls.

What internet explorer, which version is supported?

Can windows xp the internet explorer 8 support this?

Thank you.

Can those that do deals using this browser chat use it as prove in deal dispute?

BTW, internet explorer 8 for win7 and internet explorer 8 for winxp are different, what works for ie8 win7 doesn't mean it work for ie8 winxp.

**Veezon** - August 23, 2015, 7:49 pm

I've no idea man, not tested for that but I assume it will since it's just html/css/php.

**Cheeb** - August 23, 2015, 7:58 pm

This is an incredible concept, will definitely use this.

**Tokyo** - August 23, 2015, 8:02 pm

Interesting, how do you plan on the security?

**Veezon** - August 23, 2015, 8:08 pm

(Aug 23, 2015 08:02 PM)Stazzy Wrote: [\[CITE\]](#) Interesting, how do you plan on the security?

The site will be secure, each chat is identified by a unique string of 8 characters to assure your chat cannot be guessed. Only the person with the link may join so if you send the link through PM, it's not an imposter. Once the chat has ended it is completely gone forever.

**DuguWudi** - August 23, 2015, 8:15 pm

(Aug 23, 2015 08:08 PM)Veezon Wrote: [\[CITE\]](#) The site will be secure, each chat is identified by a unique string of 8 characters to assure your chat cannot be guessed. Hehe, so nobody can said hey that skype msg fake been edited/etc.

Nice indeed.?

**Vobe** - August 23, 2015, 8:16 pm

I would so use this.

Looking forward to launch.

**Veezon** - August 23, 2015, 8:17 pm

(Aug 23, 2015 08:15 PM)DuguWudi Wrote: [\[CITE\]](#) Hehe, so nobody can said hey that skype msg fake been edited/etc.

Absolutely right. The saved logs will be displayed under a different URL too so if they wish to link the logs, they have an official link for that log with an exact time it took place so it cannot be forged.

**DuguWudi** - August 23, 2015, 8:18 pm

(Aug 23, 2015 08:17 PM)Veezon Wrote: [\[CITE\]](#) Absolutely right. The saved logs will be displayed under a different URL too so if they wish to link the logs, they have an official link for that log with an exact time it took place so it cannot be forged.

Yea, no more cheating and calling those deal dispute fake, since msgs can't be fake/edited.

**guycheap** - August 23, 2015, 8:18 pm

(Aug 23, 2015 08:15 PM)DuguWudi Wrote: [\[CITE\]](#) Hehe, so nobody can said hey that skype msg fake been edited/etc.

Uh they can still inspect element unless they disabled that. OP I definitely want to use something like this I'm a Skype user but this is genius.

One thing though why would a scammer want to consent to saving logs? Perhaps you should create a pop-up upon joining for consenting and then both users get a message informing them of they both consented.

**Veezon** - August 23, 2015, 8:20 pm

(Aug 23, 2015 08:18 PM)DuguWudi Wrote: [\[CITE\]](#) Yea, no more cheating and calling those deal dispute fake, since msgs can't be fake/edited.

Also going to add a feature soon for registered users where they can confirm different forum profiles. Eg if they click on your onu profile there are links to your confirmed forum profiles.

**DuguWudi** - August 23, 2015, 8:21 pm

(Aug 23, 2015 08:18 PM)guycheap Wrote: [\[CITE\]](#) Uh they can still inspect element unless they disabled that. OP I definitely want to use something like this I'm a Skype user but this is genius.

Yes, that's what will happen and if they refuse to consent then you know something sketchy is going on.

The logs will be stored on a link given only to the participants and that can be shared if necessary and it'll have all the proof necessary in there inc. Logs/time of chat/link.

**Jash** - August 23, 2015, 9:34 pm

the scammers thing fix is crazy. props to OP <3 great idea

**FilmGuy** - August 23, 2015, 9:35 pm

Excited for this!

Also ~1600 Posts :)

**theChive** - August 23, 2015, 9:39 pm

Sounds like a great project and a very useful tool for HF. Good work, OP!

**Veezon** - August 24, 2015, 1:04 am

Thank you all for the awesome feedback! If anyone has any suggestions, feel free to leave them here!

**Elin** - August 24, 2015, 1:05 am

This is actually a nice idea, if it uses end to end encryption I will use it!

**Veezon** - August 24, 2015, 1:08 am

(Aug 24, 2015 01:05 AM)Elin Wrote: [\[CITE\]](#) This is actually a nice idea, if it uses end to end encryption I will use it!

It does indeed, my friend!

**Elin** - August 24, 2015, 1:10 am

(Aug 24, 2015 01:08 AM)Veezon Wrote: [\[CITE\]](#) It does indeed, my friend!

That is nice. I did look for a service like this in the past, but there really aren't any good so far.

**Nipsey Hussle** - August 24, 2015, 1:24 am

I was actually gonna make something like this when I saw hack.chat but didn't know anything about making one. Good luck man!

**Raymond Reddington** - August 24, 2015, 1:28 am

WOW, the other night I was talking abt this and its already started. Great.

**blackknight\_** - August 24, 2015, 5:58 am

So this is exactly like Cryptocat but completely different.....Right..... Still sounds interesting though i guess.

Will this be open source as well?

**Learner Boy** - August 24, 2015, 7:02 am

Loved this concept.

Looks promising

**Dan Smith** - August 24, 2015, 7:05 am

So basically the same as Cryptocat?

Does this site apply encryption? If so, what exactly?

**Forc?d** - August 24, 2015, 7:05 am

This is great, been waiting some time for something like this to come around

**Cammy** - August 24, 2015, 9:33 am

(Aug 23, 2015 07:41 PM)Veezon Wrote: [\[CITE\]](#) This works in any browser, my friend! And yes, maybe it will be, maybe if this works out well we could make it a desktop app too that has similar functions to Skype eg calls.

Assuming Skype Resolvers aren't a major problem, making a desktop app would defeat the purpose of using this service instead of Skype.

**Humming Bird** - August 24, 2015, 10:39 am

I thought there was already a service to do that ? It just needs a browser plugin to chat but nice concept, im forgetting the name of that site for the time being. But hey, thanks for offering this service. I hope you stick by your words and don't track anything otherwise it would defeat the purpose of this. ?

**Veezon** - August 24, 2015, 2:29 pm

(Aug 24, 2015 10:39 AM)Humming Bird Wrote: [\[CITE\]](#) I thought there was already a service to do that ? Don't worry bud, I will stick to my words. I hope you'll enjoy the service.

**King of Hearts** - August 24, 2015, 3:16 pm

Good luck with this. Glad Alone Vampire switched over to node.

**Veezon** - August 24, 2015, 6:41 pm

(Aug 24, 2015 03:16 PM)King of Hearts Wrote: [\[CITE\]](#) Good luck with this. Glad Alone Vampire switched over to node.

Haha, thanks for the kind wishes!

**Tokyo** - August 24, 2015, 6:47 pm

Will this be P2P or what?

**Veezon** - August 24, 2015, 6:49 pm

(Aug 24, 2015 06:47 PM)Stazzy Wrote: [\[CITE\]](#) Will this be P2P or what?

Nope, everything runs through our servers so you cannot grab their IP or anything malicious.

**pengu1n23x** - August 25, 2015, 8:41 am

I'm excited to try this out mate, thanks!

**eightz** - August 25, 2015, 8:43 am

How are you going to encrypt the messages?

Sounds like a smart plan but I'll like to hear more about your security features.

Also, could you implement group messaging?

**Veezon** - August 25, 2015, 8:46 am

(Aug 25, 2015 08:43 AM)EightBall Wrote: [\[CITE\]](#) How are you going to encrypt the messages?

The encryption of messages is handled by the dev, I don't know what method he is using, I can guarantee you though, when the development is done by Alone Vampire, you're guaranteed quality.

Group messaging will come in a premium service which costs \$5/month and you'll get a lot more features in it too. The service presented here is in no way limited by the premium service, the premium service just has extra features.

**eightz** - August 25, 2015, 9:05 am

**Veezon** - August 25, 2015, 12:46 pm

(Aug 25, 2015 09:30 AM)EightBall Wrote: [\[CITE\]](#) Thanks for answering my questions. ?

No problem man! Hope you will enjoy it when it's released!

**x41N** - August 26, 2015, 2:19 pm

This looks like a great project, hope it becomes successful man, good luck!

**Veezon** - August 27, 2015, 3:26 am

(Aug 26, 2015 02:19 PM)Osu! Wrote: [\[CITE\]](#) This looks like a great project, hope it becomes successful man, good luck!

Thanks man! It's going to be released either today, or tomorrow!

**DuguWudi** - August 27, 2015, 6:11 am

(Aug 27, 2015 03:26 AM)Veezon Wrote: [\[CITE\]](#) Thanks man! It's going to be released either today, or tomorrow!

Browser based or desktop for the release?

**Veezon** - August 27, 2015, 6:13 am

(Aug 27, 2015 06:11 AM)DuguWudi Wrote: [\[CITE\]](#) Browser based or desktop for the release?

Browser based, my friend:)

**DuguWudi** - August 27, 2015, 6:13 am

(Aug 27, 2015 06:13 AM)Veezon Wrote: [\[CITE\]](#) Browser based, my friend:)

Might try it later on. Thanks.

**SirLord** - August 29, 2015, 11:07 am

Looking forward to this product, sounds amazing.

**Canonsx130** - August 29, 2015, 11:12 am

Are you keeping logs server side? Also what kind of encryption is used?

**Veezon** - August 29, 2015, 11:24 am

(Aug 29, 2015 11:12 AM)Canonsx130 Wrote: [\[CITE\]](#) Are you keeping logs server side? Also what kind of encryption is used?

Logs will be downloaded and kept server side eventually:) That is if both users consent to the saving of logs!

**Canonsx130** - August 29, 2015, 11:30 am

(Aug 29, 2015 11:24 AM)Veezon Wrote: [\[CITE\]](#) Logs will be downloaded and kept server side eventually:) That is if both users consent to the saving of logs!

So unless the users need the logs, you won't keep it right? Also any word on encryption?

**Veezon** - August 29, 2015, 11:52 am

(Aug 29, 2015 11:30 AM)Canonsx130 Wrote: [\[CITE\]](#) So unless the users need the logs, you won't keep it right? Also any word on encryption?

The project is developed by a staff member here on HF so I can guarantee you there will be no floods, he has put a lot of time and work into this.

**Pingoola** - August 29, 2015, 9:52 pm

Isn't this basically crypto(.)cat

**Veezon** - August 30, 2015, 5:29 am

(Aug 29, 2015 09:52 PM)Pingoola Wrote: [\[CITE\]](#) Isn't this basically crypto(.)cat  
It kind of is, but it's much simpler and much easier to use.

(Aug 29, 2015 09:52 PM)Pingoola Wrote: [\[CITE\]](#) Isn't this basically crypto(.)cat  
It kind of is, but it's much simpler and much easier to use.

**Veezon** - September 17, 2015, 12:30 pm

UPDATED with links! Sorry for big delay, we had some unexpected issues! We should be able to launch the coming week!

**Vintel** - September 17, 2015, 4:30 pm

much anon - Enter E-mail and password.???

~ To be serious, it looks good and Im looking forward to use it?

**Veezon** - September 18, 2015, 12:02 am

(Sep 17, 2015 04:30 PM)Vintel Wrote: [\[CITE\]](#) much anon - Enter E-mail and password.???

Registering is just an option;) Email doesn't need to be verified either.

**Stasya** - September 18, 2015, 12:39 am

Great project. OP having overseen the project in your head, do you have new features that could spice it up more aside from the MVP?

**Veezon** - September 18, 2015, 7:55 am

(Sep 18, 2015 12:39 AM)Stasya Wrote: [\[CITE\]](#) Great project. OP having overseen the project in your head, do you have new features that could spice it up more aside from the MVP?

This project will go in whatever direction it takes itself. This is not the end goal, there will be so much more to come to this.

**HIGH PAID FELLA** - September 18, 2015, 10:07 am

Why using this if we can use ChatCrypt?

**K!ngGFX** - September 18, 2015, 10:09 am

That's awesome. Commenting to come back to this

**Veezon** - September 18, 2015, 10:57 am

(Sep 18, 2015 10:07 AM)Asterea Wrote: [\[CITE\]](#) Why using this if we can use ChatCrypt?

Not sure what that is but this is able to set up chats instantly. It will also continue to evolve and it also has features in now that I don't think ChatCrypt will.

**\$Brandan\$** - September 18, 2015, 11:04 am

This will be an interesting thing to use, ill use it for sure!

**N0x-** - September 25, 2015, 3:59 am

posting to come back upon release. thanks!!!
