Thread: [Bypass bsnl speed/data limit by masking every download](#)

ComNotMeBug - August 24, 2015, 5:34 am

Hi,

First of all let me introduce BSNL. Its an Indian Internet Service Provider (Broadband Connection via DSL Technology using a Router).

This ISP imposes a cap on data usage and bandwidth limit on the users.

However for the sake of customer care they do not impose speed cap/data usage when surfing and downloading from this site: motive.bsnl.co.in/

Downloading ANY files from the above mentioned site gives an amazing speed of 20 MBPS

Coming to the point, my question is, "Is there any way to bypass the speed/data limit by masking every download from OTHER sites with the addresses mentioned above, so that the "server" thinks that we are downloading from the customer care website?"

ntoskrnl.exe - August 25, 2015, 1:38 pm

Nope, it is not possible.

ComNotMeBug - August 25, 2015, 7:22 pm

Is there any vpn tricks available for free broadband ?

jayden485 - September 5, 2015, 1:31 am

No. They control all the bandwidth coming in and out, nothing you can do.

maximudecimuz - November 4, 2018, 9:21 am

if anything there please let me know
