Thread: [Luminosity Link vs Imminent Monitor 3](#)

Yetiii - August 24, 2015, 10:54 am

About to buy my second RAT, which one of these is better. I have read reviews and know most functions but I want the RATTING community's opinion.

Cheers! ??

Exodus. - August 24, 2015, 10:55 am

Nanocore. But that's just me.

On topic - Luminosity has tons of features, while IM3 would be more stable. Imo.

Honey Singh - August 24, 2015, 10:59 am

According to me = Luminosity Link
Stable, Fast and feature loaded.

LilHackers - August 24, 2015, 11:17 am

I Just Imminent Monitor 3, Its amazing! Don't know about LL but IM3 is where its at!

TheUnknownPlague - August 24, 2015, 11:37 am

LL is awesome it has a good support staff and updates pretty often so get LL

Eternal. - August 24, 2015, 11:39 am

Luminosity Link is superior as a program, and support in my opinion.

lol your saying that because you have a partnership with him
but i agree

Lies all lies. A lot of people have said how unstable IM3 is.

It is also incompatible with a lot of crypters.

Tostig - August 24, 2015, 4:04 pm

It really depends on what you're looking for. Shockwave hasn't been around to support his customers, but KFC Watermelon has. However, as for which product is superior, they clash in a lot of places.

IM3 was my favorite RAT of all time, until my crypter (Kazy Crypter) stopped being compatible with it for whatever reason. From then on, I've used LuminosityLink and had a similar experience, but not nearly as phenomenal. If you want to do some things with your "clients" that are legally questionable, go with IM3. Otherwise, if you're doing basic things like stealing Steam items or accounts, use LuminosityLink.

Yetiii - August 24, 2015, 4:06 pm

UPDATE: Going with LL, Thanks guys!

nanocore+ LL= LL somehow better than both combined

kids this is why we show work
