Thread: [I thinkd I MAY have been infected with a jrat](#)

'OverSight - August 24, 2015, 3:09 pm

Can someone check my comp out? I think I may of downloaded one by accident.

Anyone? :/

Anyone got any ideas? I'm really suspicious.

Starki - August 25, 2015, 12:43 pm

Yeah sure,

Please download [Farbar Recovery Scan Tool](#) and save it to your Desktop.

Right click to run as administrator (XP users click run after receipt of Windows Security Warning - Open File). When the tool opens click Yes to disclaimer.

Press Scan button.

It will produce a log called FRST.txt in the same directory the tool is run from.

Please copy and paste log back here.

The first time the tool is run it generates another log (Addition.txt - also located in the same directory as FRST.exe/FRST64.exe). Please also paste that along with the FRST.txt into your reply.

isn't jrat written in java? in that case, shouldn't it work by looking if you have any suspicious "javasoftware"? or try uninstall java and see if you get an error from a software :)

Im not a good whitehat, but i tries to help with what i can :)
