Thread: [Syntax highlighting](#)

Indus - August 26, 2015, 8:00 pm

Hello there ,

i am searching around 2 days for syntax highlighting in VB.net couldn't find it ...
all the sources available on google are of C# and the few ones of vb.net don't work or even if they work they screw up 'undo' feature so can someone help me out with this ???

Its driving me crazy...

VmX5 - August 26, 2015, 8:06 pm

I used this :

<http://www.codeproject.com/Articles/161871/Fast-Colored-TextBox-for-syntax-highlighting>

Hope it helps!

Indus - August 26, 2015, 8:10 pm

yeah but its c# code tried but couldn't help me ...

there are vb files in demo project but i don't know how to integrate it my project

Its just a control, Right Click your toolbox > Choose Items and Browse to the FastColoredTextbox.dll
