Thread: [\[Easy\]SQLi Challenge #1](#)

Baba Yaga - August 26, 2015, 11:30 pm

So this is my first thread on this site. Hope you all enjoy :)

Would like to give credit to @Incapability for posting some awesome sites that are vulnerable to SQL injection.

Would also like to thank @SiStemiC for the posting layout.

This is an easy SQLi challenge:

-Firstly decode this hash (base64 encoded):

Quote:aHR0cDovL3d3dy5hbnRpcXVlc2luY2FuYWRhLmNvbS9zaG9wLnBocD9teUIEPTQ5Ng==

Task:

-Write your name next to tables

Rules:

-Don't destroy the site.

-Don't write any links here.

-I won't give any hints. It's not that hard...

Proof:

aHR0cDovL2ltZ3VyLmNvbS85bDNpd3VD (base64 encoded because I can't post pictures/links;too few post count)

Dude, you copied my layout. At least thank me.

Thanks for the challenge:

john12 - August 27, 2015, 2:16 am

Very easy.

Thanks.

phammydung - August 27, 2015, 2:42 am

Thanks for the challenge. Check your inbox.

No problem man, keep making awesome challenges.

iHeal - August 27, 2015, 3:49 pm

Thanks OP

pr0xY_punK - August 27, 2015, 4:23 pm

I've been learning SQLi over the past week, so I'm a bit new to this. I know how to find the Columns and Tables by hand but have not figured out how to add my name next to the Tables. Could someone send me a quick PM on how to do this? Thanks! ?

IDK - August 27, 2015, 4:27 pm

Code GROUP_CONCAT(0x526564203a,table_name)
0x526564203a = Red :

use hackbar to convert your name into hex ?

I suppose you don't want your name as a prefix of every table name, so better to use Concat() for concatenation of two or more strings... ?

better for pr0xY_punK he learned 2 things instead of one
And happy injecting ?

Triops - September 1, 2015, 5:30 pm

Thanks for the challenge, getting pretty fast with this. Not that advanced yet though.

Encoded with Base64: aHR0cDovL2kuaW1ndXluY29tL29NVIFTQzcucG5n
