[img]http://i3.minus.com/ibirYnis7E3OVg.png[/img]

This is the second recruitment phase we are doing. Axiom Userbar:

What is Axiom?:

We are trying a new method of recruitment.

Axiom is a re-brand of Instinct, which was a group dedicated towards the gaming community of Hack Forums. We enjoy getting together on Skype and Teamspeak; we also enjoy to play games with one another and to relax in the Sub-Forum together. Members have stated that Instinct, was one of the funnest groups to be a part of on Hack forums; with Axiom we wish to uphold that reputation.

Leaders:

[Icy](#)

[Salty Bacon](#)

[Red Sox](#)

Application Requirements:

You must be an active member of Hack Forums.

Have an passion and interest for Gaming of any kind.

You must have activity in at least in one gaming related sub-forum.

You must be active within the Axiom sub-forum if you're accepted to the group.

If you have a Warning level, it will be taken into consideration by a leader with your application.

Application Form:

Take time on your application, rushing it will not help you in any way.

Your application will be heavily judged based on the answer of the final question.

The format that's provided doesn't necessarily be followed but you have to answer our questions provided, impress us.

We're accepting a limited amount of members, so make your application unique and one of a kind.

Finland (I'm Estonian, but I moved to Finland 4 years ago.)

Gaming Platforms:

I have a medium/high- end PC. I can easily play GTA V and other new games with high/ultra graphics.

I also own a PS3 with few games, but I'm not a big fan of console gaming so I almost never play on it. I love my PC and it's my life.

Most-Played Game:

My Most-Played Game is Counter-Strike over times. I remember when I started playing CS when I was really-really young.

I had like 5000 hours on 1.6 and now on CS:GO(Counter-Strike: Global Offensive) I have like 2500 hours in total.

I also have played SA:MP RP (San Andreas Multi Player Role Play) servers for 5 years, but at the moment I'm quited.

I don't exactly know how many hours I've played it in total, but I can say it's gonna be over 2500 hours easily.

Why should we accept you?:

Because I love to chat in Sub-Forums. I think that I have a good humor sense and I'm friendly. I'm always up for finding new friends to play CS:GO with.

I could also teach a lot of beginners who just started CS:GO since I'm max rank in CS:GO.

To be honest, people say that CS:GO rank doesn't prove anything. That's true in some way, but in some way it's not.

I'm always up for talking in Teamspeak 3. Me and my friends are using it when we play together or just chill.

Age: 18+

Gaming Platforms: PC only.

Most-Played Game: RuneScape, RSPS.

I'm also open to purchase and play other games on PC if it's needed.

Why should we accept you?:

Because I have almost 3000 posts in the RuneScape section, I'm one of if not the most active RuneScape section user & I know literally everything about the game. I have plenty to offer including various exploits and unreleased guides I've written to find them.

Despite my lack of playing other games, I think I have more experience with this game than anybody else you'll find on this forum.

If I'm not accepted, feel free to pm me with a reason why as I'm curious.

My games and gaming platforms:

I mainly play on PC, however i do own a 360 thats gathering dust on the shelf. At the moment i currently play alot of CSGO, but i have out alot of time and effort into other games, mainly Rust and Blacklight: Retribution. Below are my hours on my favourite games.

Rust (Legacy): 1200~

CS:GO: 900~

Blacklight: Retribution: 1300~

I own over 200 games on steam. Those three are my current ones however.

Why should you accept me?

I wont go out here saying im better then other applicants. Im sure there are going to be dozens of people applying for this awesome group. I am a generally chill and fun guy. I have a lot of knowledge in csgo and several other games. If you need someone to loose all your skins in gambling im your guy, i am currently down around 10k. I hope you consider this application. I tried to keep it as short and sweet as possible.

ps: Warning level is for disallowed blackhat activity. It is expiring soon.

pps: i am accepted for uber. i just dont have the \$ atm

ppps: PM me if you want links to all my steam accounts.

Before you read, I just wanted to say that I applied previously for the PC recruitment but it was junked ?

Username:

Minimalist - I use this alias online, for all gaming platforms.

Gaming Platforms:

PC only. On my computers, I use these platforms: Steam, Origin, Rockstar Social Club, Battle.net, a few others. There are about 95 games in my main account library on Steam and around 50 on my other main account. Mainly Valve-made games.

Always looking to find other games to play because it gets quite bland.

Most-Played Game:

Definitely Counter-Strike Global Offensive. I have played Counter-Strike since Source (though on-and-off). I have around 1200 hours on my few smurfs and main accounts, and ~4000 on Source.

/id/minimalisthf

/id/minimalisthf2

/id/minimolesthf

Experience:

Going back to my roots, I started playing Pokémon over a decade ago on my GB Color. That was short-lived because the [BRAND NAME REMOVED] on the screen broke, so I bought the original NDS and played that until I learned about the GTA series, and eventually managed to get myself a PS3. In the end, I settled on a PC and am a proud member of the PCMR. Oh lord.

I have plenty of experience with MMOs, RTS' and FPS' such as MapleStory, Runescape, SC/SC2 & CS:GO and can join in on discussions about most games in these genres. I've accumulated over 5000 hours in each of them over the years.

Why should we accept you?:

I'm an avid gamer and am generally a decent person to be around, especially when gaming. I have proven to be relatively active in Skype chats and group subforums. I don't usually flame groupmates and plan to keep it this way.

I'm also DAMN good at games. Here are two examples of games where I hard-carried my team of idiots in Counter-Strike: Global Offensive:

Thank you for reading.

I love Pokemon.

Why should we accept you?:

Other than me being an avid gamer, I love communicating with people about the games I play and helping others improve their skills. I play a wide variety of games, from Pokemon to RuneScape to Call of Duty. Also, I would consider myself to be fairly active in the gaming section of HackForums. I

try to help people when they ask for help in the RuneScape and League of Legends section. Lastly, Axiom is the perfect group for me and I would love to be apart of this awesome group to just chill, make friends, and play games with.

20% Warning Level Explanation:

I posted a very low quality comment on a thread. The thing I posted was, 'Cry' with a whole bunch of align=left. I will not be posting these kind of comments ever again. If I do get accepted, I do not want to give Axiom a bad reputation and prove to people that you guys are a high quality group.

Age & Location I am 17 years old and currently live in Bosnia and Herzegovina.

Gaming Platforms

Currently I own a decent PC which is capable of running 2012/2014 games on highest settings and latest titles on low-medium. I don't have a "side" on which I'm on, I enjoy both consoles and PC as games are games no matter where they are played. Focusing on consoles, I still have a Playstation 1 in where I play some old games, I buy some titles on eBay and simply put the disk and enjoy.

Getting a Playstation 4 in a week due to my country being an early bird so I can enjoy that too.

Most-Played Game

There are 2-3 titles in which I couldn't decide so I'll leave one and that is Counter Strike. I've been playing this game since I was 9 years old and I didn't stop from that point. Moments where I was configurating my .cfg files over and over again so I can better were just magical and the time when I would wake up, turn on my PC and play the game for like 10-12 hours straight without getting bored. Skipping CSS which I also played and speaking about present time, I am currently most active playing CS:GO.

Not much hours invested in this game (around 200-500) comparing to CS 1.6 (over 1k hours on one account) due to time focusing on forums and other games.

I am very familiar with this series, loved it from the time I first downloaded it and haven't changed my opinion since then.

Why should we accept you?

I don't deserve this position more than anyone else applying here but speaking about my gaming life, I love playing on multiple platforms and variety of genres. Currently I am a Staff member on a Minecraft server called Mineplex which I am happy to moderate and which also shows my moderation skills on gaming part.

In simple words, if I get a chance to join this wonderful team, I will both be active by posting useful informative threads and by playing with other members in this group.

Regarding my warming level, it is very warm.

The reason of that is because I wasn't very familiar on where to post and posted in wrong sections which resulted in 20-20-20%.

(But, I've been seeing some sales on PS4s lately I may have to step up and buy one soon ?)

Most-Played Game[s]:

League Of Legends (NA and EUW (I'm fairly new to the EUW server)):

I'm fairly sure I have like 15 days logged in game.

World of Warcraft (US) :

Again, I have a shit ton of time on my WoW account. My main account is banned until November but, I've managed to rack up about 7 days on my current character (6/7 have been at level 100)

On my old account I had like 4 100's and a ton of 90's some of which had 40 days of play time on them. ?

I'm a PvP and PvE player...never really got into RP...I've always thought it was strange.

Why should we accept you?:

Well, I've been gaming ever since I could hold a controller ?

Honestly it's been one of the few things that I actually enjoy.

And I feel like it would be nice to be in a group with like-minded people.

On top of that, the people I used to game with, all quit for the most part...and gaming alone can be pretty awful ?

I have played CoD BO2 competitively, but I also enjoy leisure, or casual, play as well.

I have slowly moved away from the CoD scene, after being disappointed by Ghosts and AW, and have really found a home on Destiny.

I've invested over 1600+ hrs to Destiny, and have the game mapped from start to finish, and everything in between.

It's a growing game, and with The Taken King releasing within 3 weeks from now, I'm sure many members here will be excited to take the next step, and I've made it my duty to master everything they have to offer.

I truly think I would be a beneficiary asset to the group because of my knowledge in Destiny, but along with my competitive edge but easy going spirit.

Why should we accept you?:

Other than me being an avid gamer, I love communicating with people about the games I play and helping others improve their skills. I play a wide variety of games, from Pokemon to RuneScape to Call of Duty. Also, I would consider myself to be fairly active in the gaming section of HackForums. I try to help people when they ask for help in the RuneScape and League of Legends section. Lastly, Axiom is the perfect group for me and I would love to be apart of this awesome group to just chill, make friends, and play games with.

20% Warning Level Explanation:

I posted a very low quality comment on a thread. The thing I posted was, 'Cry' with a whole bunch of align=left. I will not be posting these kind of comments ever again. If I do get accepted, I do not want to give Axiom a bad reputation and prove to people that you guys are a high quality group.

Thanks for taking your time reading my application.

Age & Location I am currently 16 and I'm in the United States.

Gaming Platforms

My gaming platforms will always consist of mobile and consoles, nothing against pc players I just don't have the largest of budgets. The consoles I play on will always be the Xbox and PlayStation. Currently I have both the 360 and the Ps3 but I do plan on buying the Xbox one over the Ps4 just due to getting MCC even if it is shit. I would practically do anything to enjoy halo 2 with friends again.

Most-Played Game

My most played game/games would have to consist of any of the actual decent call of duties or halo's. I like to play competitively so any relation to that I can find I will make sure to play it. One of the games that I know consisted most of my child hood was modern warfare 2, if anything this is the

one game I know everything about. It could be 2 years in the future and if somebody wanted to play that game I would be down.

Why should we accept you?

The reason you should accept me is because I am the type of person you want in your group. The reason is I'm your average hack forums gamer enthusiast, when I'm bored the only thing I see there to do is play video games. I spend a large amount of time on this forum and I want to keep it that way. One way I can see this forum being better is if I had more people I could relate to daily, play video games with and just talk about everything with them. Now I don't necessarily know anything about the group owners but one thing I hope they consider is that they shouldn't take my application as a joke just because I haven't upgraded yet. I hope you take this into consideration, thank you for your time.

Why should we accept you?: Used to be in nightfall/instinct, other than work and college, all I do is game, from when I get home until I go to bed, other than surfing HF in between games. My whole life I've been into gaming from COD, Halo, to just the random simulators or games like Rust. My dad even calls me a nerd and says I'm like those on the show Big Bang Theory, I love gaming it has been my life since I was about 8 years old, I'm always buying the new games, the next console, I used to have a PS4 but sold it because I PC'd game more. I am really into League of Legends right now, that's the game I've been focusing on all summer and been trying to get better at, I'm in silver right now but am trying to climb out, I'm a very good jungler. I mainly am into first person shooters, like COD, or Csgo, but I have a new passion for League, I also am waiting for Borderlands the prequel to come out. I love any game that has a competitive scene too it and am always willing to try new games out. I think I would fit into this group because I'm willing to try any game out and always like to find new people who enjoy the things I do and also because of my insane gaming passion. I'm pretty easy to get along with also, I'm very laid back and like to joke around and have fun, but I also am very competitive at games, I want to win at all cost. I used to play COD competitively out of all my friends everyone knew me as the best at video games, but as my friends grow older they game less and less so I would love to join a group based on it so I can make new friends to game with.

What guarantees your activity within the sub-forum?: I'm constantly browsing HF so I will be posting a lot in the subforum

Gaming Platforms: I have a decent PC and an Xbox 360. Getting an Xbox One soon. I also have a GameCube, PSP, Wii, and PS3.

Games you mostly play::

-CS:GO

-All of the CoDs

- Skate 1, 2, and 3
- Rocket League
- Sims 4

Most-Played Game: My most played game is Counter Strike: Global Offensive.
I also have a lot of hours on BO2 and Skate 3.

Why should we accept you?: I have been into gaming since I was really young. I got my PS2 when I was 6 and I played it all day every day.

My first game was NFL Blitz 2003. I loved that game so much. I later got into GTA vice city and San Andreas. I also played a lot of Madden and other sports games.

I got my GameCube right after my PS2 and played this game Animal Crossing all the damn time.

I got my Xbox 360 in 2008 and played Halo 2 and Halo 3 with my friend down the street. I later got into call of duty and Skate 3.

I then got a PS3 this year to play some games with my friends that had PS3s

Now I play competitive CS:GO a lot.

I will also be really active in the sub forum since all I do is game when i'm not chilling with friends, working out, or at school.

Thank you for reading my application, I hope you consider me to be in your group :)

Why should we accept you?: I've been gaming ever since I can remember (2 years old). I'm a chill and relaxed guy who is interested in meeting new people as I have been mostly a lurker. I own a computer which can play any game so I am always up to playing games with other HF members. Gaming has been my passion for pretty much my entire life, ever since I played on a Sega Mega drive (still have it) I've loved gaming. I'm a competitive gamer and also a casual, I am very sportsman-like as I do cheer and celebrate what my team mates achieve (i.e ace in CSGO). I'm always up for new challenges, and opportunities within the gaming community. When I have responsibilities i.e keeping active within the group sub forum, I do take this seriously. I am also active within the gaming sub forums: Runescape, and Counter Strike, as these are the two games I mostly play. I am hoping to get accepted into this group, as this will bring a whole lot more opportunities not just within gaming, but with meeting new people who share the same interest as me.

Username: mbe/Rasmus

Age: 15

Gaming Platforms: PC only.

Most-Played Game: I'm mostly playing CS:GO, H1Z1, Arma III, Company of Heroes 2.

Why should we accept you?:

Because I've been into the gaming scene for 8 years, and it all started when I was when my uncle showed me Counter-Strike 1.6 on some weird map called fy_iceworld. I was only 7 years old at the time, and I was already in love with the game. I asked my parents to buy the game for me, and when they purchased it I stayed home from school for over 5 days a row just to play this game. Now I have over 5,000 hours on this game. Not playing it anymore though. And now my Steam account is filled with over 270 games.

By the whole point of this, I'd like to tell myself that I'm a real gamer that could give many great reviews of games that people has no knowledge about those games, and I'd really like to help this community and this group of course and show you guys that I'm really something special that can bring you something good.

Additional information about me:

I'm a 15 year old boy that burns for the gaming community and I'm playing computer games every day and when I'm not with friends or partying.

I don't really have a private life, I'm very open with my life and I let anyone know about it whoever that wants it atleast. So if your curious about something you can just ask.

As said, I think this group could really fit to me because I love gaming.

Regards,
mbe.

Most-Played Games:

[PC] Team Fortress 2

I'm a HUGE fan of Team Fortress 2, I've been playing competitive for few months now and got really into it.

Sometimes I also enjoy MvM with couple of my friends just to chill out and kill some robots. My most played classes are Sniper and Demoman.

[PC] Call of Duty 4: Modern Warfare

Yeah, this is too oldschool, but I really enjoy playing COD4, especially promods and CoD jumper servers.

CoD is actually my first ever FPS game I got addicted to and it's still hella fun to play chill out and play some good ol' HC deathmatches.

[PC] League of Legends

League of Legends easily one of the best and most addictive games I have ever played. I enjoyed every part of it and it was really fun playing it

with friends on Skype and have fun. Too bad I had to quit for my own good because my grades started to get worse.

[PC] The Elder Scrolls V: Skyrim

What bad is there to say about Skyrim? Easily one of the most exciting adventure RPG games up to date. I had so much fun

playing Skyrim and solving all those side quests and defeating Alduin with my 200+ damage warhammer and Daedric armor (Jesus, I sound like a geek).

[PC] Mass Effect: Trilogy

Hell yeah, Mass Effect. This is one of the rare 3rd person PC games I really enjoyed. Even though I'm not really

into space oriented games, I really enjoyed playing Mass Effect because of all dramatic/epic moments you come across in the storyline.

[PS4] Grand Theft Auto: V

I don't play PS4 a lot because I prefer PC console over Joystick, but from time to time I enjoy playing some GTA: V.

It's pretty interesting to play and there's always something fun happening, it's this popular for a reason.

[iOS] Fruit Ninja

From time to time when I'm bored, I play Fruit Ninja. I actually enjoy Arcade mode because of all the cool stuff they have added.

Now it's pretty pointless for me to play because I can't beat my current record of 1089 so I only play it for fun.

[iOS] 8 Ball Pool

I love to play this while in school against my friend. It's pretty fun, but honestly I suck at it and I'd love to get better.

All in all, it's a fun competitive game that you can play against someone and show of your "billiard skills". :)

[img]<http://s11.postimg.org/7tnazs0k3/BABE.png>[/img]

Why should we accept you?:

The reason why you should accept me is

Because I'm really chill and friendly user with decent sense of humor. I like playing competitive and I like playing just to relax and have fun with my friends.

I am also willing to be very active in sub-forum and Skype group (if there is one) and I hope to meet some new cool people who share the same interest as me.

There's really nothing else to say, I'm not special but I'd really like to be a part of Axiom community.
:)

I am mainly a PC gamer, but occasionally I will hop on my Xbox 360 and play a couple games of Call of Duty.

Most-Played Game:

I would consider League of Legends my most game played. I have over 3,000 hours played and spent over \$3,000 on skins and champions. I have been playing since the beginning of season 1. My favorite champion is Teemo. I got a smurf account and achieved Platinum 4 by only playing Teemo in Season 4. I am currently Platinum II on my main account. I would call myself a League of Legends addict.

Other Games I Play:

PC:

Pokemon: Diamond

Pokemon: Platinum

Pokemon: SoulSilver

Pokemon: Black

Pokemon Black 2

Pokemon: X

Pokemon: Omega Ruby

I love Pokemon.

Why should we accept you?:

Other than me being an avid gamer, I love communicating with people about the games I play and helping others improve their skills. I play a wide variety of games, from Pokemon to RuneScape to Call of Duty. Also, I would consider myself to be fairly active in the gaming section of HackForums. I try to help people when they ask for help in the RuneScape and League of Legends section. Lastly, Axiom is the perfect group for me and I would love to be apart of this awesome group to just chill, make friends, and play games with.

20% Warning Level Explanation:

I posted a very low quality comment on a thread. The thing I posted was, 'Cry' with a whole bunch of align=left. I will not be posting these kind of comments ever again. If I do get accepted, I do not want to give Axiom a bad reputation and prove to people that you guys are a high quality group.

Thanks for taking your time reading my application.

A legitimate question. What was taken into consideration when you chose these members? Shiny text, the Axiom userbar placed over and over to divide text? If that's not the case, then I'd appreciate a reconsideration of my application because it looks like the only reason I wasn't accepted was because I made it easy on the eyes. Plenty of experience (proven by discussions on this forum) and a lengthy application.

Gaming Aliases:

Anything from when I was a kid up until ~3 years ago, I used "lavameh" for everything. Nowadays, you'll find me as "Mr Whiskey" in most places.

Gaming Platforms:

PC. Ever since I got banned on Xbox because I used Modio on my profile, I've hated the Xbox.

Most-Played Game:

Garry's Mod. Spent a lot of time on a DarkRP server, became a Server Administrator on one of the top servers.

I quit Garry's Mod, and my time is split pretty evenly between League of Legends and CS:GO (though I do enjoy some modded Minecraft every now and then)

Experiences / About Me:

I've played tons of games since I started PC gaming. I was into flash games for a long time (wasn't allowed to download anything). Roblox was my first game I ever downloaded, which eventually led me into AdventureQuest (my first P2P nightmare), Maplestory, and Runescape. After my friend bought the premium membership on AQ, I just couldn't bear to play the game normally with all the restrictions, and actually "quit" a game for the first time after my parents refused to upgrade me. I

eventually got into Steam, where I quickly wasted \$20 on Arma 2 (and OA ofc) because I watched videos about DayZ all the time, without realizing what kind of serious horsepower I needed to play a game like that. I got into Minecraft at this point and put several thousand hours (3-4 years of after-school playing, and nonstop summer playing, no exact counters, but likely 4k or more). I eventually got bored, and I saw "Garry's Mod" was on sale for two bucks. I had played most of my games at a friends house, as my parents always used the computer at ours, and they had a very unrestricted and social house (Their dad divorced = fun 24/7). I got "my own" computer after my parents bought themselves a new one, and I got the old one they had before. Since I had played Garry's Mod on a more powerful computer over there (and my knowledge had nothing more than hard-drive space) I assumed my computer could handle it. It did good enough for me to enjoy the hell out of myself playing Single Player (I struggled to get Multi Player working, as every time I tried to join a server I randomly selected, it was always offline) and ended up buying my own computer after 8 months of saving, which was when I really started learning a lot and quickly about hardware and how to actually use my games. I put nearly two thousand hours into Garry's Mod, racking up the most posts on the forum (aside from the corrupt head admin. PM if you'd like info about it, I only recently quit and am still highly respected and de-throneable in postcount), and picked up League some time in there. Lots of learning later, here I am. An avid PC gamer exploring the world of options that opened up after getting a non-shit tier PC.

Why should we accept you?:

I'm an extremely active person both in-game and out of game. I'm very easy to get along with, and almost always reachable. I'm fairly decent at most games that I play, and extremely dedicated when I find one I like and make close friendships with people who play games with me.

Thanks for reading my application. My "About Me" section is a little out of whack with the timeline, but it was hard to find a decent place to add in picking up new games.

I also love to play with other members and meeting new friends. The most recent game I'm playing is Terraria which really hooked me. Other than these two games I love both FPS, MMORPG and Sandbox games. I've played alot of WoW and HoN/LoL. I would contribute to this group by hosting events or maybe starting up a group server on minecraft or terraria. Other than gaming I do graphics and skateboard, so I'm usually on my computer to game all nights. I'd love to meet all the members in this group and to play with them.

As you can probably tell, I'm a CS:GO booster. I've been playing the game for over 9 years, but have taken it seriously for 3 years.

I also play League of Legends often, but that's more of a game I play on the side.

Dark Souls consumed a huge portion of my life also, so I have to take time to talk about that here also. As of right now though,

CS:GO / H1Z1 / League are my top three games that I'm currently playing and probably will be playing for a bit.

Why should we accept you into Axiom?

I think I would be a great fit for Axiom due to my extensive knowledge on video games in general. I

have been playing since I was 6-10 years old on Raven Shield and Rogue Spear, I'm currently 19 now. After Rainbow 6 I moved onto CS and I've been in love with it since. If I was accepted into the group I could provide my knowledge on CS and other games, and help the group out with anything related to CS or anything else I know. Though I am an avid PC gamer, I also play Gears of War, and sometimes

Destiny on my Xbox One. I've been a Gears player since Gears 1 and would love to see if there are any Gears fans in Axiom that picked up UE that I could group up with. Other than that, like I said I am a huge CS fan and can possibly provide videos / tutorials for the group if requested. I would also love to try to get a pug server started with Axiom members!

More about me

I don't really look for groups, but I decided I wanted to get more involved in HackForums and this is the group I thought I would fit best at. I spend majority of my time playing video games, and spend the rest with my girlfriend since I'm currently not enrolled in school until next semester. I've played a ton of games since then, though I do jump around a lot from game to game CS and League are the games I've stuck to for years. I'm very active in the CS section and Anime forum (not like that matters at all) though I don't post a lot since most of the posting there talks about cheating which I'm not really a fan of. I also browse and post in other various gaming sections since I play basically every game. I love to play with a group of people and just talk about gaming in general, since it's one of my biggest hobbies.

I should be accepted into this group for a couple reasons. Not only am I extremely active on this site, I am essentially always online to talk or game. XBOX: Battlefield hardline

XBOX: FIFA 15

Why should we accept you?:

Get to know new people and work with them on things you all care about is for me one of the best things you can have in such a group like this. I can learn workplace skills from being a volunteer. I can learn governance skills. Also i can help out other people when they need help + we can maybe talk about developing networkings for this group!

If you have any more questions to me just lmk ;) ?

I'd love to be in Axiom because it seems you guys have an awesome community.

I'm also very active on HF, currently at 5.8 PPD, but it'll rise.

I'm a LEM player in CS:GO currently, 1-2 games away from Supreme (second highest rank in competitive).

I do also play Clash of Clans, but slowly losing interest.

Thinking about picking up League of Legends again.

Thanks for reading!

Why should we accept you?

Well, I am very active on the forums. I am tired of being alone on this website, and I am ready to meet new people. I am very sick at the moment, so if I get accepted I won't be voice chatting with anyone for at least a couple more days. However, I am a very easy going person. I can easily be communicated with, and I can be easily made a friend. I am not a very hateful person and I do not rage. I don't really play anything too competitively, unless if it is Clash of Clans or on Garry's Mod. I have over 2,000 hours logged onto that game. I just love breaking into peoples bases and stealing all their hard earned goods. Anyways, I am not saying I am better than other applicants, but I am saying I will certainly be active and try to contribute. I am not joining just for the badge, I am joining for the members and sub-forum. Can't wait for a reply, hope to see you guys soon!

\How I Will Try To Improve The HF Gaming Community

I will be advertising the group, and maybe have group game night or something.

If I get into "Axiom" I will start posting threads on a weekly HF game night to where HF Gamers can all socialize and have fun!

Most-Played Game:

My most played game is the Halo series, I know everything there is to know about that game, I have been playing Halo since the release date back in Nov 2001. And I played all the way until the shut the servers off in Halo 2.(I think all of us was sad when that happened)

Why should we accept you?:

November 2001 is where it all started for me when Halo 1 was released. Video game stores were selling out of the game. I was playing it all night long for days upon end. Then Halo 2 came out BABY, LAN partys, Glitches, ONLINE, this was a major break through for Xbox. So I went on from there to continue playing Halo! I just found out we had a Gaming forum on HF, let alone a section dedicated to Halo!!! I want to get it out in the HF community that we do have a Gaming forum and it

needs to be acknowledge more. I know for a fact I am going to be spending so much time on the gaming forum now. I love playing games (Period). I have been evolved with a lot of MLG teams, but now im just relaxing and having fun with them, No stress just play and enter you're own world type of thing. Video games are an escape from reality for me, I don't try to see if im better then everyone just get along! I would be ecstatic if you considered. You can latterly ask me anything about halo and I will guarantee I know the answer.

Why should we accept you?

I think that I would be a great addition to the group. I have been an active Professional and Casual Gamer since I was nine years-old. I have been staff on GameBattles, and on many different varying levels of skilled teams. I love games very much and I love to share my love of them with other people. I also love to help out in any way I can. Be it, helping you level, or just hanging out. I am looking for new people to game with and I think this would be a good step forward!

Thanks for taking your time reading my application.
