Thread: [What kind of amp should i get for my dual 12 inch subs](#)

unknown321 - August 27, 2015, 1:26 pm

I've got 2 12 inch 4 ohm kicker subs seen here <http://www.kicker.com/40CWD124> what kind of amp should i get to power both of them.

Duyere - August 27, 2015, 2:37 pm

These may be a bit pricey but how about something from Rockford Fosgate?

The RMS for your subwoofers is 300 watts, so probably something like this:

<http://www.rockfordfosgate.com/products/details/pm300x2>

As the other guy said you want to match the rms rating of the subs and amp. Ignore the max/peak watts that doesn't mean anything, you want to match the rms watts as that's the continuous power they can handle daily.
