Thread: [Offsite Stresser Project | 2+ Months Running | \\$10K+ Profit | Need Server Management](#)

regexks_ - August 27, 2015, 9:21 pm

Hi, I run a server stress testing service offsite and I'm looking for a partner who can provide and manage attack servers.

My host can longer fill the needs for bandwidth and I haven't been able to provide stable power on the stresser for about three weeks now.

The stresser itself has a completely custom-coded source based on Laravel and Bootstrap which is not only extremely fast but feature rich. I've put a lot of work into this project and it has years of refinement and bug fixes. A few very prominent faces have attempted to exploit this source and consequently failed.

The name is pretty unique and the domain is nice as well. It's organically SEO'd and has a firm grasp on a few major keywords already. The project itself has made a little over \$10000 in the last two months and the last few weeks brought in an average of \$150-\$300 a day with the best days pulling in over \$600.

Please PM me if you're interested or contact me via Skype: regexks

4. SST partners with non-Ub3r disallowed. Example is a l33t cannot ask to partner with an Ub3r
And no, unfortunately it doesn't matter if it's off-site.
But good job so far, and good luck!

I'm sure it's fine if it's offsite. This is a huge opportunity for someone who is looking to get into making money with SST with a massive head start.

Ok w/e

I did warn you XD
