Awesome simple method mate, loving your contribution to the section. Love you.

Armada - August 28, 2015, 4:25 am

(Aug 28, 2015 04:06 AM)Hamware Wrote: [\[CITE\]](#) Awesome simple method mate, loving your contribution to the section. Love you.

Thanks. I understand how people starting out can find spreading difficult, it will forever be one of those aspects that will remain a challenge for any malware controller. Its an ever evolving challenge, however as I noted this is a technique I have personally used for nearly 15 years and it remains good to this day. (Modifications have happened of course)

This is an excerpt from a more complete thorough write up to a book I am in the works of Publishing. ?

Paul Wilson - August 28, 2015, 6:38 am

Thanks for this spreading method mate, really nice, I wish I had a malware to spread but mine is still in development and I can't afford a crypter ;(

appreciate it ?

that_jonix - August 28, 2015, 7:08 am

thanks for this nice spreading methode youre a big part of the Rat section :)

Shards - August 28, 2015, 7:16 am

Amazing! Thank for not selling it, can really help people out!

sudaptgetusr - August 28, 2015, 8:38 am

I've been wanting to do something silmilar for a while, just been lazy. Do you know where I can find a webhost for free that I can point my domain to?

Armada - August 28, 2015, 8:51 am

(Aug 28, 2015 08:38 AM)sudaptgetusr Wrote: [\[CITE\]](#) I've been wanting to do something silmilar for a while, just been lazy. Do you know where I can find a webhost for free that I can point my domain to?

As I noted, pop.co is a fantastic resource for this, I generally just throw my file up to dropbox (They dont distribute BTW, I've tested) and link to that. People generally dont check the links or if they go off site.

pop.co also ofers free ad free hosting for very simple single or 2-3 page sites (might just be single, I dun remember to be honest)

And honestly. I whip this together from start to finish within 30-45 mins. MAX.

So even an inexperienced person who might muddle through the steps might take a maximum of

1.5 hours. Super minimal effort for the pay off bro. ?

- And to the comment about not SELLING m method. - I noted this is an excerpt from a soon to be for sale commercial BOOK. But we gotta give some stuff out for free. (I find it only fair, as it was a promise I made to my Mentor, so many years ago) ?

My only hope is others take on this same approach, and dont get overly greedy after they have experience themselves.

Do you have to write your own files or is there an editor? Because a website like weebly has an editor so you can make your site look professional very quickly without any knowledge

matissshakeris - August 28, 2015, 9:36 am

Couldnt you just use SPAM and host the file one the website itself? I suggest SPAM because that's what im using myself too.

Greath method. Anyways.

Avoid hosting sites like rghost or sendspace because browser will likely block it as malware since it's "untrusted source" i can avoid that uploading to my own site file.

Armada - August 28, 2015, 9:48 am

(Aug 28, 2015 09:03 AM)MishaTheHoovy Wrote: [\[CITE\]](#) Do you have to write your own files or is there an editor? Because a website like weebly has an editor so you can make your site look professional very quickly without any knowledge

pop.co ha its own builder.

No need to know HTML code ?

000host is a terrible solution or recommendation, people do not take free hosts like this seriously.

Yakz - August 28, 2015, 10:19 am

Great share, this should help out many people who were unsure on how how to begin spreading, have been seeing TONS of threads about it, lately.

I can imagine if anybody tries out this method and uses their own imagination a bit it should work out perfectly for them. OP has given detailed examples on how to execute this method. Thanks for your hard work, as always. ?

sudoaptgetusr - August 28, 2015, 11:30 am

(Aug 28, 2015 08:51 AM)A?mªĐa Wrote: [\[CITE\]](#) As I noted, pop.co is a fantastic resource for this, I generally just throw my file up to dropbox (They dont distribute BTW, I've tested) and link to that. People generally dont check the links or if they go off site. Pop.co just says every domain is taken. I've tried so much random shit yet every domain is taken lol

And you can't upload your site to their host, they only host the site you make with their builder. :/

Armada - August 28, 2015, 12:05 pm

Creativity is KEY

This is a simple but EFFECTIVE method, if you read my post CLEARLY, I emphases your own "spin on things" what I showed you is a very simplistic method I used.

It is literally universal. I would rather NOT think for you as well. Holding ones hand through some of this is one thing, but if you display lack of the basic elements of creativity to make this method "Your own" well I will say technology and the cellular video game generation ruined you.

?

DOSH - August 28, 2015, 12:09 pm

Nice method, I'm sure this would get lots of slaves.

If i get back into malware spreading Ill try this out.

sudoaptgetusr - August 28, 2015, 12:46 pm

(Aug 28, 2015 12:05 PM)A?mªĐa Wrote: [\[CITE\]](#) Creativity is KEY

?What are you talking about?

Pop.co doesn't work, atleast not for me. I've tried so many different domain names but they say every domain is taken. It's not about being creative.

I asked for a place to host my website files for free and after I checked their FAQ I discovered they don't. No matter how creative I am I won't be able to upload my website I just made to their host.

If you read my post clearly you'd understand you don't need to think for me. ?

Yakz - August 28, 2015, 1:16 pm

Then buy hosting...

What do you want for free?

sudoaptgetusr - August 28, 2015, 2:33 pm

(Aug 28, 2015 02:25 PM)A?mªDa Wrote: [\[CITE\]](#) Then buy hosting...

What do you want for free?Do you even read what I write? HOSTING.

I asked if you know anywhere I can host it for free.

If I wanted to pay I could easily find hosting myself.

You even replied to my original post with "pop.co" and I later replied that after checking their FAQ they don't offer hosting(unless you build the website with their tool).

I don't understand why are you so butthurt ?

I never said your method doesn't work, I just said pop.co doesn't offer hosting and I couldn't regisiter a domain on their site.

Sensitive much ?

(Aug 28, 2015 01:16 PM)Yakz Wrote: [\[CITE\]](#) free free free free free

No wonder nothing works out for you.Why would I pay for hosting if someone knows a place where I can get it for free? I asked if anyone knew.

Don't try to be smart.

McFellow - August 28, 2015, 2:38 pm

uhhhhhh am i retarded or is this just spreading through some one elses account not really amazing haha

nunyaB - August 28, 2015, 4:36 pm

(Aug 28, 2015 02:25 PM)A?mªDa Wrote: [\[CITE\]](#) What do you want for free?

Don't try to be smart.

No one asked you to sit here and reply to my post. Dont like my advice, piss off and do it yourself. Im not butt hurt, frankly your an idiot. "I want it, but I want it free"

- You will get exactly what you pay for. Dont like reality go drop some LSD and live in fantasy land.

I am well aware pop.co does not allow you to upload your own site. Clearly you missed my point to this post. So go ahead, bitch and rip it apart all you want. Im getting slaves easily by just updating my binary once a week, your sitting here wondering how to get away with free hosting BS. ?

To each their own.

Humboldt - August 29, 2015, 2:10 am

I haven't seen this before. Amazing tutorial. I will definitely be trying this when I have a little extra time on my hands.

Keyome - December 27, 2015, 6:09 pm

Amazing method i got my first bots with it thanks you :D

7400 - December 27, 2015, 10:58 pm

Targeting spreading is the bomb

Crushpot - December 27, 2015, 11:18 pm

You got a nice tutorial there, but it is the same as always: Find some dumb asses who will open your file ;)

Kolyamba - February 4, 2016, 12:31 pm

So I often read your replies and think you're really mean but I see the work you've put into so many guides and just wanted to say thank you for helping everyone.

I love your lists and semi-reviews of software so keep it up buddy! Also just noticed you're away until 2088 so have fun.

Armada - February 4, 2016, 1:55 pm

I know this can be hard to believe, but I actually try rather hard to not flip out at people on here. Sometimes it just does not work though. ?

ahemokay - February 4, 2016, 3:28 pm

This actually works? lol would like to test it but im not into spreading or having clients anymore

thedirtybook - February 4, 2016, 9:14 pm

Damn dawgie this is actually a pretty good method!

Cartoon Network - February 4, 2016, 9:38 pm

(Feb 4, 2016 02:55 PM)Armada Wrote: [\[CITE\]](#) I know this can be hard to believe, but I actually try rather hard to not flip out at people on here. Sometimes it just does not work though. ?

Armada taught and helped me with TONS of shit, really helpful guy. And we all tend to flip out every

now and then ?

w1red~StayRollin - February 4, 2016, 9:43 pm

Thanks for this armada! :)

Sounds like a good method to use indeed

ciklamo54 - February 5, 2016, 3:50 am

Spreading with minions... Everybody loves minions.

Thanks for the method, Armada, i will try it out ! ?

uncleadolf - March 10, 2016, 8:22 pm

I've always thought .scr was the best extension to use... Even to the layperson .exe throws up some red flags. Might as well name it virus.exe

But no one knows what a "screensaver file" is ...how bad could that be? Give it a jpg icon and it seems like it's just some kind of picture

Armada - March 10, 2016, 8:44 pm

The extension to a degree is moot, if marketed correctly people will still take a .com file.

Wurtex - March 13, 2016, 10:18 am

Thank you Armada i going to try

Avira - March 17, 2016, 11:25 am

Nice looking method OP, gonna try it out later. nice share : P

EeryEndymon - March 17, 2016, 6:06 pm

What about pop.co alternatives? It's not available in my country

Iterator - March 19, 2016, 2:27 pm

Looks promising going to try this, thanks

HiddenEyE - March 28, 2016, 4:19 pm

high quality tut. hoping to see more of this. tnx

xPoutine - April 20, 2016, 10:25 pm

Hilarious but at the same time

Armada.....

MrNacho123 - April 20, 2016, 10:27 pm

Very HQ guide, surprised it's free. Thanks Armada!

Ainaj - April 21, 2016, 12:55 pm

You own a rat and claim it's for legit use, but you make a guide on how to spread to get victims. WOW.

"We don't support any kind of illegal use. When you install Orcus on your PC, you have to agree that you don't use Orcus for unauthorized access."

Armada - April 21, 2016, 1:06 pm

Firstly.

Look @ OP post date to this and Orcus.

This was written well before Orcus was released.

Secondly, nowhere in either threads to I imply they should be used in tandem.

Thirdly, If I give you the chemical equation to C4 and you go blow a building up, who is responsible you or me?

Information is for educational purposes only.

By knowing how a malware fake sites made, users can better identify them online.

Ainaj - April 21, 2016, 1:29 pm

By knowing how a malware fake sites made, users can better identify them online.

If you sell the ingredients for c4 and have a guide on how to make it that's a different story.

I believe that people change along with their morals and intentions, and yeah I know this thread is old, but it's still active and you clearly know it's here. It's just kinda hypocritical you create a rat, which is designed and intended to be used legitly and only on systems you own, you stress that on your website and in your posts. Having this thread is like what I said above about the c4, you cant give people tools and instructions and hope they don't follow them, you see where I am going?

If you truly are legit, which I believe you are trying to be, this thread should be junked because it screams the opposite.

Quote:We are now going to utilize other peoples accounts to manually post our malware Quote:A couple existing slaves (for their social media accounts, facebook, instagram etc) Implies you're hacking accounts, and spreading malware.

Quote:Sit back, crack a beer, and wait, watching as the slaves come rolling on in. Quote:easiest way to get a boat load of slaves Implies unauthorized access

Quote:Encrypt the RAT Binary Implies you're hiding (In the laws eyes anyway, look what happened to Razor and Killa)

(Apr 21, 2016 01:06 PM)Armada Wrote: [\[CITE\]](#) Information is for educational purposes only.

By knowing how a malware fake sites made, users can better identify them online.

So was Killa's and Razor's products, look where that got them.

Armada - *April 21, 2016, 1:32 pm*

Arguably correct, in fact. You are correct.

/THREAD
