Vouch this will dump score on your snapchat fo' dayz.

Pro tip: Save on bandwidth by making the pictures you send pitch black. You can do this buy just setting your phone on a table or somewhere that will block any light from entering your camera lens
aha.

Lol, I just made a second account and spam that one.

DatAzn - September 16, 2015, 12:47 am

Can't you get banned by Snapchat for this?

Also would making a second account then applying this method to that account while spamming your main account create a work around?

EDIT: you can actually swipe right on the name you want to spam in the feed section(where you receive snaps) and record the action of,

- 1)Pressing the yellow circle button
- 2)Taking a picture
- 3)Pressing send

I find this method to be more reliable, as you don't risk spamming one of your recent friends or best friends.

Azadi9 - October 26, 2015, 7:24 am

Thank you. I will try this. I used a similar method, not similar - exactly same method actually (before) and my accounts all got locked within hours.

What I did was sending to 5+ users at the same time though, does it matter?

Gonna set up 20 accs right now, gonna spam them with main acc - will see if I will get banned this time. I think the problem is that Snapchat detects root.

Okei. 1 main sending spam to 7 (out of 18 self created). Until now 700 score, will see how long it will go. Will test to see if I check for all 18 it will be faster or not, but first checking if it will get banned

or not. All accounts are mine, so nobody can report.

2000+ score now. Going to 10k if not getting banned, then changing to the other accounts to send spam from that account to the main account. Seems like your Frep-app is undetected by Snapchat.

3500+, still not banned. Have not recieved anything from teamsnap yet.

Changed to main sending to 17 accounts now, instead of just 7. Will see if it is faster or slower.

Also buying OG snapchats, or high score snapchats. If anyone is interested. I am still new user, so will wait until you trust me.

'Cynical - October 26, 2015, 7:04 pm

Anyone have a few dummy accounts that I can send snaps to?

Azadi9 - October 27, 2015, 3:49 am

You need to have them verified, email, phone and with a name. I tried without these and the account sending the spam (main) got banned real quick.

Well, made new account today, spamming 20 accounts. All through Bluestack, much faster, more effi. Might even start to make accounts from scratch and sell as stat accounts with any nick desired by the buyer. Only limitation is number of PCs.

Btw, main account does not need to be verified. Only the accounts getting spammed.

And you to be friends with the accounts, or you will get locked.

So the new acc gaining 20+ score every 13 second.

(Oct 27, 2015 03:49 AM)Azadi9 Wrote: [\[CITE\]](#) You need to have them verified, email, phone and with a name. I tried without these and the account sending the spam (main) got banned real quick.

Well, made new account today, spamming 20 accounts. All through Bluestack, much faster, more effi. Might even start to make accounts from scratch and sell as stat accounts with any nick desired by the buyer. Only limitation is number of PCs.

Btw, main account does not need to be verified. Only the accounts getting spammed.

And you to be friends with the accounts, or you will get locked.

So the new acc gaining 20+ score every 13 second.Nice, I stopped at around 50k I dont use it no more.

I would have to login to your account to boost it. And I highly doubt you'd want that.

Yeah that's the only time I do it is as night.

Azadi9 - November 5, 2015, 9:53 pm

1M, still no lock outs. Snapchat score is gonna get phased out soon for another feature or something, cuz pretty useless when you can just boost it like this. Gonna be fun to see whats next.
