Omnicoins has had almost 500% increase on bittrex, the greatest % gain out of all the markets today. Today there has been almost 2 million OMC and over 7 BTC trade volume and the price is over 10 times as high, sitting currently at around 0.00000441 BTC or approximately \$0.001 USD. The 24 hour high was almost double that too - 0.00000800 BTC (\$0.0018 USD). I envy the people who bought it yesterday ?

It just shows how much of an influence Omni's announcements have on the market.

To those who sold your 114k to me, thanks for the cheap coins.

Purchased at 0.00000035 BTC per coin.

Nice investment mate, good decision :)

So should I start buying Omni coins?

Lol no, I was thinking I might if the hype didn't raise the price too high but if you buy OMC right now you'll come out with a loss. Once the price starts to drop a little, then you should buy.

Congratulations to Omni! I hope it'll stay on Bittrex.

That's a rather impressive bounce back, hopefully we can see some consistent volume in the coming weeks.

eightz - August 30, 2015, 10:00 am

Prices dropped down. Had 6520.8 OMC worth \$9.78 and now I have \$5.87 in OMC. Now would be a good time to invest.

Really nice job by Omni, now Omnicoin will remain on Bittrex!

rogelio11 - September 8, 2015, 2:19 pm

i saw that. that is really awesome. gonna buy more coins soon. :D

...and it's back down again. Needs to go up so I can start turning a profit.

Plurkie1234 - September 10, 2015, 10:26 am

Why did it even rise in the first place ? Personally I dont see any benefits of this coin.

Or you can buy more while the price is low and get that daily volume back up for us.. ?

I won't have any more BTC or else I would, whenever I sell my signature again I should have some. The price is down way too much where I would be losing money.

Personally I dont see any benefits of this coin.

- 1) Intrinsic value of the functionality of the coin
- 2) The community supporting it
- 3) Omnicoin is bae
- 4) It has actual use on HF to buy upgrades and such.
