Thread: [How to stream from moviebox iPhone to xbox?](#)

Vampire666 - August 30, 2015, 6:57 am

Hi, I recently downloaded a free movie app called Moviebox on my iPhone. I'm trying to watch ted 2 but I don't want to watch it on my phone. Moviebox doesn't have a streaming option. How can I stream the film to my Xbox? I don't have a smart TV. I've been looking everywhere for the answer and thought this would be the best place to find out. Any advice on another app that allows streaming or if there is a mirror app or something. Thanks guys :)

Since apple doesn't support flash, you are going to have a tough time getting anything that can play in HTML5 over to your XBox. Your best bet is to find a similiar app for your xbox and watch it over there direct.
