Thread: [XENOTCRYPT \[256 BIT ENCRYPTION\] \[PASSWORD\] \[FREE\]](#)

XENOTpro - August 30, 2015, 11:43 am

What's XENOTCRYPT?

XENOTCRYPT is a symetric encryption method. You can encrypt a message with a password. It's not possible to decrypt it again without the password.

Thats a very secure method to encrypt and store or send private data like passwords. For even stronger encryption you can select "Higher security mode". But the size of the encrypted message will increase.

How do I use XENOTCRYPT?

Just go to the website, fill in your message and password, check the captcha and hit "ENCRYPT". Done!

To decrypt pase the encrypted message, fill in you password, check the captcha and hit "DECRYPT". If you used the right password, your message should be decrypted.

XENOTpro - September 4, 2015, 11:39 am

Removed the captcha, the encrypting is now much faster! :)

Gazer - September 4, 2015, 3:56 pm

Seems good. Will definitely try it around the office.

XENOTpro - September 5, 2015, 2:25 pm

Sure. :) Give a feedback if you like.

CryptecGaming - September 6, 2015, 1:31 am

Nice tool looking forward for more tools

XENOTpro - September 7, 2015, 3:45 am

Sure, 2 more tools are already planned. ;) They will come soon.

Visual Freedom - September 7, 2015, 5:47 am

How does "Higher security mode" works? Does it only encrypt the same string a couple of times?

MD5 - September 7, 2015, 6:04 am

People do have to realise that "encrypting" their data using such services highly decreases their data's privacy. You could be logging any post request that's coming in to your server. This can be avoided if you'd rewrite the encryption in js so everything is done client-side or you can release the source in one of the programming sections.

- MD5

asmy - September 7, 2015, 7:09 am

I've experimented with the site

It is wonderful and easy

I would like to publish the site on my blog does allow me, my friend

XENOTpro - September 9, 2015, 12:02 pm

Thanks for your feedback. :) It's working much faster without a captcha.

XENOTpro - September 28, 2015, 10:18 pm

An API for this will come soon, who'd be intressted?

MiserableFailure - September 29, 2015, 1:21 am

This is so cool!

Thanks a lot for sharing!

S1NN3Rx - October 4, 2015, 8:02 am

This is great dude, it's fast, user friendly, and pretty damn secure!

AMONRA75 - October 4, 2015, 11:27 am

i try this...tnx a lot man!

XENOTpro - October 11, 2015, 10:09 pm

If anyone has ideas how to improve this project, feel free to post them here! :)
