Thread: [-- Insight Group Recruitment -- Tier 2 - Knowledge Based Group](#)

Hinch - September 1, 2015, 1:02 pm

KICKED 20+ MEMBERS LIMITING THIS GROUP EVEN MORE

Insight Recruitment.

Who are we?

We are a group of individuals who are all skillful in at least one field. We believe that knowledge is key to success, and that it should be easily available

Why should you join us?

Well first of all ask yourself a question. Are you in seek of knowledge?

What makes us different from other groups?

We are a very well organised group. We intend to import a system to make sure all our members will be active. We also intend to do a sort of "Mentoring" if you wish to call it. Every member recruited will have to teach at least 1 thing to all the other members in one session together, call it like school if you wish. You may think why are we doing this, well we are doing this so that all our members benefit from each other and you put in work to receive information, rather than being spoon-fed.

How can you join us?

Well simply fill out the form in a post below (Keep in mind the slots will be limited and if you do not fulfill your task you will be removed.)

Code HF UID:

How old are you?:

What timezone are you in?:

What are your skills?:

What are you interested in learning about?:

Will you represent us in an HQ fashion?:

Do you use Skype and/or TeamSpeak?:

Are you willing to do a large amount of Hw?

Where can you find us?

We will have our own group on a offsite forum where we will be centralized. The forum we will use alongside of hf is run by one of our members.

We look forward to seeing applications. (Classes will start at 20 members currently 17)

What timezone are you in?GMT+1 What are you skilled in? Familiar with Python, Batch, HTML & CSS. PHP,JS,JQUERY not so much. Recently started learning the basics of cpp. I also did c#, asp.net mvc classes for half a year but i did not like those at all. Not my thing.

I know my way around Kali have spent quite some time in the past learning more about pen-testing. RE, Steganography, MITMA (Evil twin mostly) and some other subjects. Note that I'm far from mastering those and will definitely have to pick up on them as it's been since 2014 that I did any of those. (Took a break from HF)

I know some networking but I'm not so knowledgeable in that field, for this reason I applied to join a course here on HF to improve this.

Malware & Malware removal.

SE had some good times doing this (when i was younger to get free stuff, now i mainly use it for malicious purposes online), Doxing. (Have done this a couple of times, didn't really feel like going any further with it)

What are you interested to learn about?Steganography and reverse engineering, maybe some pen-testing as it has been a long time.

Are you willing to represent us in a Hq manor?Sure thing. Do you use skype/teamspeak?Both, I will use whichever one is required at that given moment.

How old are you?:

16, but I'm not sure that this is relevant.

What timezone are you in?:

UTC/GMT +02 (France)

What are you skilled in?:

I am precisely programming a Botnet (I'm just at the beginning here, trying to gather and understanding source codes around&here.)

I consider myself as fluent in French, English,HTML,CSS,PHP,SQL,JAVASCRIPT,C and learning PYTHON.

Maybe I'll start with C++ for botnets, as I see there's a lot of C++ botnet.

I read a lot of books about social-engineering, and applied them IRL, and I'm happy to see that it's working pretty well !

I also know how to perform a good Doxing, I'd say my level is around 8-9

I have a server, so this considerably improved my knowledge about networking & port-forwarding (this shit is evil, never buy a server if you want my advise ?)

Otherwise, my main skill, i'd say is webpentesting.

I can easily use at my advantage : SQLi,XSS,LFI,RFI,CSRF, or any security misconfiguration. I know how to upload shells, and perform a privilege escalation.

What are you interested to learn about?:

Everything ! I'd like to have a job IT-related, so the more I know, the better

Are you willing to represent us in a Hq manor?:

Yes.

Do you use skype/teamspeak?:

Of course I do ! I'm on skype everyday, and go sometimes on TS !

Just thought I should leave my opinion and feedback here

After criticizing one of their quickly-made tutorials on doxing, they almost instantaneously negged me, these are key signs of childish behavior and I don't expect much from the group. Also beware that people with anime avatars are making tutorials outside the anime adventures section which is also a problem. Feedback is over.
