Thread: [HackForums product creation - buy a 'pop up' HackForums shop!](#)

**stackoverflowin** - September 2, 2015, 1:19 pm

Hi,

When you want to make money on here it can be quite a stress, getting the thread design, the product, the website done & servers etc. Avoid all of this stress, and buy a ready-made product from us now! We'll basically give you a product that's ready to sell, all you need to do is post it :-)

What services we can provide:

- Coding
- PHP / C#
- Thread creation
- Project management

Tell us what product you want created, we'll see if it's do-able, and we'll then create it :-)

Prices depend on what you want, we'll manage the project for you whilst you owning it.

Please PM me if you're interested.

Thanks,  
Stack

So how is this different to your original coding service thread. Your just going to make a thread design now?

No, we'll manage the whole project for you.

- Support
- Server administration (for example if you were running a VPN or stresser, or simply a website)
- Marketing materials
