Thread: [\[TUT\] How To Crack Rdp's - By Insight](#)

Hinch - September 2, 2015, 2:28 pm

OK so it seems that a bunch of people thought it would be a smart idea to sell public resources on how to crack Remote Desktops. I decided to help out the community a bit. (Sorry i Don't know if this has already been posted)

Ps: The tool is known for being buggy and just displaying errors there can be many causes to this.

We Will Need Multiple Things To Get Our Selves Started.

-Nmap

-DuBrute

-A Good Username + Password List

Step 1:

The first thing we will have to do is run the Nmap Setup. Dont worry it does not come with any adware.

[Installation]

Spoiler [\(Click to View\)](#)

Step 2:

Ok so in the zip i provided head over to the directory and open the file as administrator /nmap/scannner.bat. If you don't understand look at the screenshots i provided in the spoiler.

[File]

Spoiler [\(Click to View\)](#)

Step 3:

You will now see either 1 or two windows pop up. If two Opened Close 1 of them. If one opened just leave it. We want to leave this open for as long as possible minimum i would say is 1 Hour. It will Eventually look like the second image in the spoiler.

[Program]

Spoiler [\(Click to View\)](#)

Step 4:

Once you are done feel free to close that program. A File will be created in the nmap directory

[File + Contents]

Spoiler [\(Click to View\)](#)

Step 5:

Now go to the DuBrute_2.1 Folder and run DuBrute as administrator.

[Program]

Spoiler ([Click to View](#))

Step 6:

We now need to make it so the program can read the information. To do this we will need to click on Generation. Where it says Ip click on file ip. Where it says Login click file Login where it says password click file Pass. It will be shown clearly in spoiler below. And once loaded click make.

[Setup]

Spoiler ([Click to View](#))

Step 7:

Once the bar has completed and you get a pop up you can close that window but don't close DUBrute v2.1. That process we just did created a file called Source.txt This will be in /DUBrute)2.1/source.txt we will have to head over to config on dubrute and locate this file. Then press ok.

[Final Setup]

Spoiler ([Click to View](#))

Step 8:

Now its finally time to get cracking all you have to do is press START now and just wait :)

Spoiler ([Click to View](#))

Its Started :)

Download: <http://www.filedropper.com/crackdrp>

Dont leech its free knowledge

Mirror by roku (i take not responsibility for this): <http://rokuhf.xyz/hffiles/Crack%20DRP.zip>

Grievous????? - September 2, 2015, 2:31 pm

Nice tut Hinch!

There's going to be nothing but HQ stuff here from us at Insight ?

lenaos - September 2, 2015, 2:31 pm

Good tutorial Hinch, I'm sure it'll be useful.

Kr?nus - September 2, 2015, 2:33 pm

Very useful tutorial!
Will come handy in the future for sure :)

/riptide - September 2, 2015, 2:35 pm

Nothing but HQ content from Insight.

Great tut ?

T???? - September 2, 2015, 2:38 pm

The file doesnt exists on filedropeer anymore and the mirror is offline for me. Can you upload it somewhere else please ? :)

Hinch - September 2, 2015, 2:43 pm

(Sep 2, 2015 02:38 PM)T???? Wrote: [\[CITE\]](#) The file doesnt exists on filedropeer anymore and the mirror is offline for me. Can you upload it somewhere else please ? :)

Fixed it its up enjoy it.

T???? - September 3, 2015, 2:50 am

To everyone who has this problem:

Just uninstall "Microsoft Visual C++ 2010 Redistributable Package (x86)" and download and install it here: <http://www.microsoft.com/en-us/download/details.aspx?id=5555>

Hinch - September 4, 2015, 9:34 am

Thank you for posting that i hope it helps others

T???? - September 4, 2015, 10:36 am

(Sep 4, 2015 09:34 AM)Hinch Wrote: [\[CITE\]](#) Thank you for posting that i hope it helps others np man. this will surely fix the "scanner.bat closes itselfs before it scans :/" problem :)

Seizure - September 4, 2015, 7:36 pm

I've tried this multiple times and gotten errors, just gonna stop trying. Good tutorial I suppose.

Hinch - September 5, 2015, 4:01 am

Yh i edited the thread about the programs functionality

Vobe - September 5, 2015, 9:11 pm

Whenever I press start it says error 990 then the waiting time does not move.

What did I do wrong?

Someone wanna help?

Just uninstall "Microsoft Visual C++ 2010 Redistributable Package (x86)" and download and install it here: <http://www.microsoft.com/en-us/download/details.aspx?id=5555>

Tried doing this and it did not fix my issue with it automatically closing when I run the scanner as administrator.

The nmap program is working but now when I press start on DUBrute, it gives me 990 error then stops working.

I checked everything like 3 times now. ?

DPR™ - September 6, 2015, 11:08 am

Everything seems to be fine but when I press Start in Dubrute it just doesn't start.

kokilo - September 6, 2015, 11:45 am

Thanks alot for this one, i will post a review soon

Hinch - September 6, 2015, 11:50 am

I am looking for a dubrute alternative due to people have issues

Vobe - September 6, 2015, 8:26 pm

(Sep 6, 2015 11:50 AM)Hinch Wrote: [\[CITE\]](#) I am looking for a dubrute alternative due to people have issues

Awesome.

I'm looking forward to a alternative. ?

oramck - September 7, 2015, 7:25 am

Thanks for this, Is amazing, great tutorial! TKs Man

luckyns - September 7, 2015, 8:25 am

Thank you for posting that

RS7™ - September 8, 2015, 5:30 am

Is it only me or does the users.txt look messed up?

C0d3_X - September 8, 2015, 10:36 am

great tutorial bro. thank you

Raizo - September 9, 2015, 10:56 am

Very nice TUT Hinch. Its really usefull.

FreeAnneFrank - September 9, 2015, 10:57 am

Aint working my RDP :/ I dont get it. I press on start, it waits a second and stops...

moorbes - September 9, 2015, 11:07 am

Back on the days when I used it,dubruite worked okay for me on windows 2003 servers,it rarely worked on 2008.

So try it in a win2003 rdp,or try running nmap and dubruite on administrator access (Run as administrator).

marcelmf - September 12, 2015, 5:21 am

Thanks working still perfect.

Jaguar. - September 12, 2015, 10:50 am

Thank you for posting that i hope it helps others

StickyBomb - September 12, 2015, 1:45 pm

nice bro :D thats all i wanted ! :D

Unknown - September 14, 2015, 2:37 am

I was actually asking some friends of mine about this the other day, looks like a great tutorial!

-

It seems that the "Scanner.bat" closes soon after running it as Admin. But, when I run it normally it doesn't write the IP's to the "results.txt" file

FRANKIE - September 14, 2015, 2:42 am

(Sep 2, 2015 02:31 PM)Ren? Wrote: [\[CITE\]](#) Good tutorial Hinch, I'm sure it'll be useful.

Or we could not use my avatar.

Anyways, I am sorry I was not able to meet the homework stuff. Great tutorial.

keksimus maximus - September 14, 2015, 5:58 pm

nice TUT, looking forward to trying this

KryptLik - September 16, 2015, 10:14 am

Thanks i'm gonna try this very soon :)!

webwarlock72 - September 16, 2015, 5:03 pm

Nice Tutorial. I've tried this in the past but with out muck luck. Think I will give it another try. Thanks again :)

I do have one question. Are we all scanning the same range here? I've used different tools looking for RDP ports and I've got the ranges from here <http://www.nirsoft.net/countryip/> If we are all using the bat file does that mean we are all scanning through the same block. Its only a small point I was wondering that's all.

RRReaperrr - September 16, 2015, 6:04 pm

fake and gay post thread.

Web-Weave - September 19, 2015, 6:56 am

wow this tutorial is HQ!

Thanks.

hyperteckniga - September 20, 2015, 9:23 am

? gud job Man, keep it up ?

hackedia - September 26, 2015, 8:20 am

How Much Time It's Takes? For Cracking An RDP??? :/

zQuick - September 27, 2015, 5:09 am

really HQ design and good thread! :)
