Thread: [Booter/Stresser Setup Service - Get a Fully Functional booter/stresser for only \\$50](#)

Clapson McGee - September 2, 2015, 5:59 pm

For an initial \$50 setup and \$20 a month after that I can set you up with your very own booter/stresser. To be clear, for \$50, and \$20 a month after that you will receive - Your very own fully functional booter/stresser. - This includes a server to hit with, scripts, and setup. The booter will hit anywhere between 2.3 - 5.6+ GBPS. Unlimited boot time. You can use this for yourself or sell it out to others. PM me or add me on Skype: ps2matt13 for setup. Keep in mind, the booters in the stress testing section advertising dstats that go as far as 15+gb/s and other ridiculous numbers are performed with ALL of that booter/stressers servers hitting at the same time. When you purchase a subscription to boot with, you are only able to boot with ONE of their many servers, leaving you hitting no more than 3gb/s at best. That being said, if you want a booter for just yourself, or even a few friends. This is a better option considering you can have as many concurrent boots as you want, for as long as you please. I can demonstrate one of my current booter setups that I have been selling for a few weeks now to show the power. And remember, for only \$20 a month after initial payment, you cant go wrong. I've already sold enough of my own private booter subscriptions to pay 4 months ahead of time in just two weeks. So now everyone asks, "What are the drawbacks?" Here is a list I have compiled for you.

PROS:

- ~ Unbeatable Price
- ~ Hard hitting
- ~ Unlimited bandwidth
- ~ Easy access
- ~ Full setup
- ~ Full support
- ~ Easy to sell

CONS:

- ~ Can only effectively boot around 3-6 targets at once - After that effectiveness is questionable.
- ~ Usually doesn't down connections that are DDoS protected*
- ~ Sales you make will have to be manual, not automated. - Not difficult however.

Again, if you're interested, shoot me a PM or add me on Skype: ps2matt13

Thanks for reading!

~ Melodic

no...

wadeba - September 2, 2015, 6:17 pm

Vouch!. Hard hitting booter. Very professional to work with. Easy set-up. One of the best services I've seen. Good luck with your sales.

Then come talk to me about a free trial!

This is my vouch, free trial please?

Again, another know-it-all who hasn't even seen the service. Proceeds to bash my thread without any knowledge of the product outside of what the thread says itself - if they even bothered to read it, that is.

NomadsBoy - September 2, 2015, 7:03 pm

Its like you all are pissed off that you didn't figure it out first, stop bashing the guy if you don't know your shit. I know his seller, the guy makes legit stuff. This is a good deal for anyone interested in a putty booter. This is not some run of the mill public script BS. STOP ASSUMING SHIT! I've worked with Melodic in the past, like most of you assholes, he has his moments of sketchiness but, in the end produces an overall good product. I'm not apart of this project nor will I ever be (Probably). Until you see how his shit runs or have it for yourself DON'T FUCKING HATE ON IT.
