I'm in a bit of a rush to get this release because I won't be on the computer for a while. I am moving a few states away and my computer will be in storage for maybe a month so I want to get this out before that. I know it's a little buggy and slow but I would like to get some input on what you guys think of it. I am also open to suggestions for new things to add although it probably won't happen for a while. Also as of right now this only supports Gmail accounts and you need to find the gateway yourself (sorry). I do plan on adding many more but like I said I just don't have the time.

Really nice looking design.

Will check this out later.

Do you always that mouse cursor?

Thanks I found this theme on here and modified it a little.

The cursor looks much better when it's not being recorded like that.

Yea, I have noticed that. A lot of people are trying to sell things that should be free. So stupid.

Updated the bomber.

Added preset accounts, an about page, added a list of carriers, and fixed a small bug with the account rotation.

Hope you guys enjoy!

Just downloaded this, thanks for the share man. Works really good :)

Thank God, I didn't have to go and buy an email bomber. Saved myself and others some cash.
