Thread: [Amazon - Email Trick](#)

AboveEverything - September 2, 2015, 9:58 pm

Hello In this tutorial I wanna share with you guys the method I use to get gift cards from the same user more then 2 times. This method depends on how smart will you be in order to convince your victim.

It consist in creating a personalized email box without gmail or hotmail or any other known domain.

- 1- Navigate to [hostinger.co.uk](#) / -
- 2 - Click on Free Hosting Order Now
- 3 - Fill up the registration form
- 4 - As soon as you registration is done go to your email and click on the link they sent to confirm the account.
- 5- Login and select your hosting plan - order free account.

1 Select your subdomain name just name something about support but this is not the most important thing

2 Nothing special here, just complete the captcha and order.

3 Here click in the + to open the above options.
And then click email Accounts

4 This is the most important part
Name ur email account I advice to use your own imagination Usually I name my email To [amazon.com](#) or [amazon.co.uk](#) try it.

5 Scroll down the page a bit once u confirmed step 4 and click on the + to open the options. Click on email round cube

6 So now you are inside the email, just use your imagination and sent it to your victim email. /
Hostinger emails will not be displayed as spam.

- This has been my first HF thread I hope all of you enjoy it -

James Burnham - September 2, 2015, 11:45 pm

Very HQ thread. I will use this definitely. Thanks.

Ma3lish - September 3, 2015, 8:24 am

thanks for this trick man its really hq

Systematically - September 3, 2015, 9:09 am

This may come in handy, nice tutorial.

Unholy- - September 3, 2015, 9:24 am

Is the site so laggy just for me?

It's really slow, I need it right now tbh haha.

Teemö - September 3, 2015, 9:30 am

1 post and a high quality tutorial. We need more members like this guy.

Yeah thanks for recognizing me! Lot more new tricks will be coming out!

Klauskleber - September 13, 2015, 11:19 am

Hello, my native language is not English so therefore I have problems with the formulation of the email. Can you tell me if this is ok:

Hello,

We regret to inform you that your last order:

"Amazon.de gift card [mail delivery] \$50.00"

had to be aborted because of an error during processing. Within the next 48 hours, the amount of the original payment method will be refunded. We apologize for this delay.

Amazon.de support team.

LilHackers - September 13, 2015, 11:23 am

Thanks for this mate! Very HQ Post!

Cheers

Ronaldo. - September 13, 2015, 11:24 am

HQ thread thanks for sharing the trick OP.

lettuce chief - September 13, 2015, 11:35 am

I dont fully understand this function, sorry that I'm new to this.

What exactly can you do with this? Is it limited to amazon or could you have an email that is .edu.harvard? Or .gov?

If so there are special apps that you need a college email for inorder to "match make" sort of like [BRAND NAME REMOVED] im sure you guys know. Anyways the college apps are supposed to be a lot more "poppin off"

AboveEverything - September 15, 2015, 8:07 pm

Lettuce this function is used so u can creat ur personal email lets imagine u choose a domain for the email. A domain is like gmail or hotmail. this way u will choose ur own domain. Like support.easy.es cannot be .pt or .gov unless u pay for a domain... and then once ur domain is created, u can just name ur email .ur domain -- so ur domain was support.easy.es - then u can name it like amazon.co.uk.support.easy.es ! example then just add a big image with the company that you want to fake

Enzio - September 15, 2015, 8:22 pm

Nice tutoriel. I'm sure it will help many users.

BTCEXchangez - September 15, 2015, 11:12 pm

Posting this to check it in future. Thanks for sharing.

SilentNightmare01 - September 16, 2015, 2:12 am

Great post, thanks for the tutorial :D

SIM-2270048 - September 16, 2015, 3:01 am

Very HQ tutorial OP

Thanks alot, going to use it.

xADHDx - September 16, 2015, 4:13 am

Thank you for this great post and tutorial! I am going to try it out right now!

Thanks alot, going to use it.

I couldnt Send u pm cuz I dont have permission. But yes u can post this in ur blog.

Zetice - September 26, 2015, 4:20 pm

OR just inspect element on the giftcard change the values and the amount to "refunded" and send them a screenshot of it. At least thats how i do it.

AboveEverything - October 4, 2015, 12:31 pm
