Spoiler [\(Click to View\)](#)

Take your time to read through this to get the best,
techniques and ways to use your hacks to reduce
the chance of you getting banned by Rockstar,
at the moment getting banned for online hacks are
very high at the moment, so be sure too not over-use
your hacks in public lobbies in front of others, if they report
you then the process will be sped up, be wise when changing

your money/xp as that shit is easily noticeable. If you are using the hacks just for the money/xp, then get the menu spawn the money/xp in, and delete the hack forever... Your money will stay and you will be hack-free.

Just stay fingers crossed. :)

EXTRA TUTORIAL ON STAYING SAFE:

Rockstar has adopted a new PC mechanism ran in accordance with GTA Online and is called nVp23. It is a multi-level, complex solution developed to protect GTA Online against cheats and realtime scripts/modifications. It ensures that the gaming servers cannot be run on unauthorized platforms, such as those with a HID lock or otherwise blacklisted and it protects game code against reverse engineering, cracking and modification and secures the traffic between a client and the prod.ros.rockstargames.com server.

The following actions are immediately flagged to the account, automatically assessed via the automated system and eventually banned due to:

- cheats and automated programming;

- changing the cash or bank balance and character stats;

- memory modification;

- manipulation with DLL system libraries;

- modification and substitution of game resources (maps, textures, and so on while connected to other players and using GTA Online in general.);

- unauthorized access to modification of game variables;

- debugging and analysis;

- hacking of Store options;

- receiving of important encrypted data batches by a fake server application;

- gaming server substitution;

- MCND localizer/operator cheating.

This does not impact modifications to Story Mode but running or performing the above while connected to GTA Online will result in a swift automated ban - please bear in mind that Rockstar Support cannot lift automated bans anymore and appealing will only acquire a repeat response explaining the expiry date and reasons for the ban.

In addition, the following points are now checked each time you request a game resource:

- The client's application integrity;

- The client's application originality;

- The gaming server's authenticity certificate.

Some more detailed information from some crucial points regarding the game client and GTA Online:

Protection against a fake client application. The game contains a data processing algorithm protected against analysis that checks the authenticity of the games client.

Protection against Rockstar server's spoofing or local operator cheating. Authenticity certificates are embedded into the gaming servers. A client application checks the authenticity and expiration date (validity) of each request from ROS and against the SCS ticket.

A recent update to GTA5.EXE now fixes a two exploits that I once knew about:

Application debugging.

Serial number validation system editing.

Here's a breakdown of the whole ban process:

1. Client uses a script or other modification that is currently fully protected against.
2. Game allows the client to proceed, storing a flag on the encrypted .sqsave file on ROS.
3. Automated review of all game statistics and threshold comparison.
4. Final review from SC Admin system
5. Account ID and saved data is banned and a support-ticket is generated called 'SC Admin - (BAN LABEL)
6. The expiration date is generated about one hour after the ban is set, and its now down to the support team to deal with you're constant moaning about being banned. The expiry date is normally based on the amount of bans previous, but fun fact: bans aren't logged, its just based on flags on the profile of the SC user.

Update: Rockstar Games have started banning single player on some accounts that have a permanent ban.

FAQ:

Q: What can I do to prevent myself from being banned?

A: That is easy - either do not cheat or do not drop cash to either yourself, other players (it can detect that too) or modify any stats, and avoid using Cheat Engine and reversing .DLL libraries and editing RPF's.

Q: How do you know all this, like, isn't this Rockstar classified?

A: Yes, it would be classified, but they've not done a very awesome job of cleaning up their messiness or hiding it. In fact, it only took me about 4-5 days to find all of this information since the latest patch.

Q: I've noticed that support generates me a ticket when I become banned, how does the support desk know when I get banned?

A: The support system, Social Club and the ROS game services are linked - when the SCAdmin bot files the ban flag, it automatically generates a ticket.

Update: Using tools to inject .DLL libraries directly to GTA5.exe has been tested and has proved to be an extremely low-risk way of modding.

I hope you all have found this information useful and informative.

If any links are broken, please notify me and they'll be fixed.

Yes you can level up with MOST of these.

Being banned has a pretty high risk atm, but if you wish just take the chances and do use it in front
of people, because that'll give them the chance to report you... Good luck though and have fun.

KernalKrisp - September 3, 2015, 4:02 am

Thanks for this bro! What's the best way to go undetected? (solo servers, with other people but
hidden.. etc.) Also what are the chances of banning if I was to give myself say 10 million in game?
I'm not too bothered in levelling up or going crazy with the mods, just in moderation. Thanks

Uhhh, go easy on the cash and especially levels.

Don't go crazy in public lobbys with explosions and fast speed vehicles lol, but just stay low is the
best way, you can't do much else. :)

Thank you so much man, glad it worked :)

Noobisor - September 14, 2015, 5:01 am

any idea how to avoid being banned for moneydropping with a menu since 1.28??

Velocity™ - September 15, 2015, 5:23 pm

Guys, I can't stress it enough.

All of your questions are answered throughout the thread & posts.

Thanks.

No new bypasses have been updated.

Sorry.

I'm not too sure buddy.

HazrdN - September 16, 2015, 6:51 am

You guys have to wait the new update just came out.

Velocity™ - September 16, 2015, 7:28 am

Exactly as HazrdN said.

I'll update ASAP. Thanks.

This one doesn't work for online, only single player however I'll add it for singleplayer use.

Thanks. :)

No problem man, feel free to share around.

Mattogre85 - September 19, 2015, 2:16 pm

OH MY GOD.

I played again today. After 2 weeks of banning.

I created a new character. Played for 2 hours.

And I have been banned with no delay (forever) !

I did not use any hack. I just played.

What happened ?? :((

luniz123 - September 19, 2015, 9:24 pm

Is the online hack working, is it detected?

Velocity™ - September 19, 2015, 9:33 pm

Please be weary of using GTA Online Mods, Rockstar are like Police Search Choppers atm.

Jordan Belfort™ - September 20, 2015, 1:26 am

If anyone is in need of hacking use aimjunkies gta 5 hack. Its pretty cool and undetected.

Mattogre85 - September 20, 2015, 6:44 am

Should be, But it is not FREE ! and no guarantee.

X1b0 - September 20, 2015, 10:10 am

Will there come a new undected hack/scripthook for the newest patch 1.29?

Jonttux789 - September 26, 2015, 6:06 pm

gunna spawn sum moneez and see when i get a ban

wish me luck

sonicblue13 - September 26, 2015, 6:13 pm

im going to try this i been on ps3 and 360

All should be good.

I'll update some menus + bypass later on.

Zer0Degree5 - September 27, 2015, 2:15 am

Just to confirm, is this console restricted to just PC or is there a way to do these on a PS3 as well?
Considering the amount of hackers on PS3, it is possible but do you know how to do so?

Cheers

Thank you pal, my pleasure. ?

d-dog17 - September 27, 2015, 3:51 pm

Ps3 gotten worse every where you turn is a modder killing everyone

IronCrystal - October 6, 2015, 7:51 am

Do you have hacks for 1.29 PC? I have never tried modding my GTA so I want to make sure I know what I'm doing.

The latest update for PC came out September 15, and I see ScriptHookV updated last on September 16, so does it work on the latest version of GTA Online? I see people mentioning that the latest update made ScriptHookV not work anymore so I'm confused as to whether it will work, but I don't want to risk getting banned.

All I want is a money hack and maybe an xp hack if possible. Or even someone else to give me money.

weed-haze-hack - October 9, 2015, 11:24 am

merci je cherchai sa encore merci

Velocity™ - October 26, 2015, 5:29 pm

This is still open for people interested!

Bowzer90 - October 26, 2015, 11:36 pm

will these hacks work on version 1.30

Eend - October 27, 2015, 4:07 am

hey, i tried installing the mods for online. I know how it works for SP, that aint a problem. but then i install the mods for online, my online crashed immidiately, thats maybe because the files are not compatible for the lowriders DLC, the newest update,???

EDIT: current version= [10/20/15] GTAV Title Update 1.30

JX? - October 27, 2015, 5:43 am

These hacks are outdated, DO NOT install any menus that require "ScriptHookV" to work, INSTANT BAN!

Eend - October 27, 2015, 6:03 am

yes, they said it somewhere else, they were talking about a new mod menu with manual dll. files /executeable .dll. i'm looking for those but can't find a sh*t

Why not code one? When the scripthookv got patched I got bored and wrote one quickly using MSV as the base.

You could find some menus at Unknowncheats tho. Remember to use injector that manual maps and erases PE headers.

Velocity™ - November 1, 2015, 1:54 am

NEW UPDATES!

-Added tut on keeping safe.

-Updated ScriptHook Link!

-Minor fixes!

LustWare - November 1, 2015, 3:47 am

pretty sure its an instant ban if you use ASI mods online.

High Top - November 1, 2015, 7:40 pm

you gotta update this? scripted hook = instant ban now

da_king_69 - November 2, 2015, 5:33 am

guys i know im a dumbass for asking

what do these hacks regard?

are any of them for money?

is it still working?

is it detected? and if so how to behave to stay under radar...

thanks

Velocity™ - November 2, 2015, 11:23 pm

Fixing up now.

And to answer your question, the hacks regard everything from money drops.

It being detected completely relies on you.

DonTheJeweler - November 11, 2015, 4:07 am

Anyone know if any of these work right now? I wanna get some mods going on and I'm not all there.

Jokes - November 11, 2015, 4:10 am

Do you know any menus with a WORKING kick player? I'm using the newest infamous and the kick player does not work along with various other things.

You can't kick players if you're not the host.

Jplays - November 12, 2015, 9:42 pm

Velocity, could you make a tutorial on how to add the gta v online client for 1.30
