Thread: [\[Janus\] SQLi challenge #19](#)

JaNuS18 - September 3, 2015, 3:47 am

Spoiler ([Click to View](#)) MensaSQLi circle, session 2(2)

~ Tasks ~

- display version with your nick name
- display last 5 tables in each database (like on proof picture)

~ Target ~

aHR0cDovL3d3dy5hbG11bmFmLmNvbS9wcm9kdWN0cy5waHA/Y2F0PTUwMDEmc2lkPTEwMDU
=

(Base64 decode it using online decoder like <https://www.base64decode.org/>)

~ Proof ~

[img]<http://img11.hostingpics.net/pics/588576challenge19.jpg>[/img]

~ Rules ~

- use regular DIOS (no benchmark allowed)
- don't use SUBSTRING_INDEX for extraction of tables
- you may not control table output with (visible or hidden) tables numbering via local variable
- solution should be pure SQL
- your syntax should work without knowing anything about databases or tables on that site
- don't ask for hints or solution

Post your syntax to <https://privnote.com> (it is automatically destroyed after reading) and send me link to PM

Let SQL knowledge be with you ?

You are welcome. Good luck ?

dafr34k - December 11, 2015, 3:33 pm

i'm a very much noob in sqli, couldn't complete the challenge properly ? could you help me with your dios buddy ? ? <http://i.imgur.com/5CBhct2.png>
cant post link here btw ..

cant post link here btw ..
If you describe yourself as a noob in SQLi maybe you should start with easier SQLi challenges first.
Also there is a challenge rule made by purpose: don't ask for hints

Good luck with SQLi ?

Pepeillo - December 12, 2015, 3:00 am

Thx for sharing this content. very nice!!

V_4_Vendetta - December 12, 2015, 2:18 pm

good challenge .. tnx.

Please correct your syntax and follow the rule: your syntax should work without knowing anything about databases

Thanks for trying. Good luck ?

SAJIB MODAK - December 20, 2015, 4:37 am

solution please
