Thread: [\[Official Group\] >> Divine Logger Lite << - FREE](#)

Nex+ - September 3, 2015, 12:17 pm

I am opening this thread up for those who would be interested in Divine Logger Lite. This is in the workings right now and I will update it as progress comes to the keylogger. It will be released for free to the public, allowing anyone to use it, no cost. Do not message me about this regarding about how soon until it will be finished in.

Features:

- (+)Extremely Stable and Efficient
- (+)Email and FTP Delivery
- (+)Mutex Pool - Allowing only one instance of the server to be running so no spam logs of the same thing.
- (+)Advanced AntiVM/AntiDebugger Methods
- (+)Melt Filet - changes the location of the file when ran on the computer
- (+)Two startup modes - There will be two different options for your server to start with the computer

- (+)System Cure - clean up your pc with the click of a button if you accidentally run the server on yourself
- (+)Clipboard Logger - View what your clients have saved to their clipboard
- (+)System Information Grabber - Your first log will come with every detail about your clients system
- (+)Colored Logs - Your logs will come in color making it easier for you to read

¹³³⁷ - September 3, 2015, 9:15 pm

Nice, good luck on the development :)

Weco - September 4, 2015, 2:57 am

Looks like a nice product. GL with the Development .

DamienVC - September 4, 2015, 5:57 am

Will be released shortly, being developed too.
Might add some basic pw stealers in if needed

Velocity™ - September 4, 2015, 5:58 am

Looks like such a neat product, goodluck with this. :)

Cowso - September 4, 2015, 1:48 pm

Nice, I'll be looking forward to testing it :) gl

Prom?nent - September 4, 2015, 10:21 pm

i like the looks of this OP, will be glad to using it once you release it.

g10026842 - September 5, 2015, 3:03 am

Looks like such a neat product, goodluck with this. :)

Battle Scarred - September 5, 2015, 3:04 am

Nex you cant code LOL fucking scrub

m4z3 - September 5, 2015, 6:57 pm

nice stuff looking forward to tryibg it

DamienVC - September 6, 2015, 4:55 pm

Being developed in a few days, give us any feature suggestions if you have any~ Note that this is a free project so we wont add ultra complex features to it

cosmeadv - September 7, 2015, 12:48 pm

look nice, i want to see and download to troll my friends

?Syria - September 7, 2015, 3:09 pm

Interesting, i would like a download for this "Keylogger" that you have been "working hard on" for the past "few days"

Thanks :)

DamienVC - September 7, 2015, 6:06 pm

Thanks :)

Its not released yet

We aren't working "hard" too.

And yes, this is a keylogger

?Syria - September 7, 2015, 6:45 pm

(Sep 7, 2015 06:06 PM)DamienVC Wrote: [\[CITE\]](#) And yes, this is a keyloggeroh sorry i thought it was a dragon shaped dildo. :)

Spoiler [\(Click to View\)](#)rly niga? i knew its a keylogger :/

czarnobyldick - September 8, 2015, 11:40 am

well great job, good luck with that

Koffee - September 12, 2015, 12:07 am

I have high expectations from you fellows, but if it's free I don't expect it to be great. If the power of money isn't behind it there really isn't any motivation

asmy - September 12, 2015, 7:02 am

Nice, good luck on the development :)
