Posting for a friend since he doesn't have enough posts:

Inquired about the last slot on his cheat being sold here:

Tested it and it the aimbot seemed to work when hovering over an enemy so I tried to fire at an enemy, I noticed the aim snaps 90 degrees away from an enemy when I fire. He explained that it was some kind of rare bug to do with the humanization or hitscan in his cheat. I never injected the cheat twice and closed out of CSGO. Restarted CSGO to try and troubleshoot what was happening, hoping it would go away. Next thing I see when I start up CSGO is a big old Untrusted banner above my account.

Proof I sent payment for the cheat:

I have played games earlier and the account was fine up till I tried out this hack here are my games played:

Some skype logs (Seems like a funny coincidence he has to go to sleep a few minutes before I restart CSGO to find untrusted) :

Tips for this not happening again:

Don't hack and ruin the game for others.

Balding - September 4, 2015, 5:31 am

I mean it's a legit report but did he say that the cheat wasn't detected?

Patrick Star - September 4, 2015, 5:34 am

It does say it's VAC proof in the thread but that doesn't mean that it can't change.

Don't cheat.

looks like you didnt disable humanization speed and scale on all weapons

humanization causes untrusted , he informed you

NoHax - September 4, 2015, 9:05 am

This should not be a Deal Dispute, it should be a community alert.

He didn't scam you and he didn't guarantee anything.

Mr.Motivation - September 4, 2015, 9:49 am

hey man, why did you open a dealdispute before talking with me?

i clearly said that disable human scale and speed before using it + the cheat isnt detected.

i can give you a new acc even i dont have to do that.

People can do what the hell they want.

He gave you instructions, and you didnt follow them, himmayn is not a scammer, hes even offering a new account just cause hes a nice guy,

nique ta mere - September 4, 2015, 4:32 pm

The cheat clearly isn't detected, you either didn't listen to what he told you, or he didn't tell you anything about the features that possible cause untrusted and judging by the post he made he did.

Venorize - September 4, 2015, 6:14 pm

He gave my friend a config that had human scale and speed toggled off, so that did not cause the untrusted ban. Anyways, it is resolved now.

Hey dude you realize you got overwatched right?

VAC bans are yellow and say VAC ban at the top.

Why wouldnt you just remove this instead of having people disable it? I dont see why a cheat provider would leave something harmful in a cheat.
