Thread: [Basic Doxing by Vyper](#)

Grievous????? - September 5, 2015, 7:29 pm

What is Doxing?

Doxing is an internet term used by many people. Dox is actually slang for "Docs". Doxing entails finding out your targets personal information.

These may include :

Name

Address

Phone number

Template for Doxing

=1= / General Info

=2= / Family

=3= / Accounts

=4= / ISP Info

=5= / Other

=6= / Proof / Credits

=1= = = = = =

General Info

Alias':

Name:

Phone #:

Address:

SSN:

=2= = = = = =

Family

<Mother>

Name:

Phone #:

Address:

Facebook:

Other Accounts:

<Father>

Name:

Phone #:

Address:

Facebook:

Other Accounts:

=3= = = = =

Facebook:

Twitter:

YouTube:

Skype:

Email:

=4= = = = =

ISP Info

Account #:

Account Holder:

Email:

Phone:

Address:

IP Address:

=5= = = = =

Other Info

=6= = = = =

Proof / Credits

Methods for doxing

[Method 1] Targets Name

Having a targets name to start off with is very useful. If you have their name you can find out vital information such as their address, phone numbers, family members etc..

There are many websites where you can enter a targets name and pull some information on them.

Spoiler ([Click to View](#))

<http://10digits.us>

<http://thatsthem.com>

<http://www.yellowpages.com>

<http://www.whitepages.com>

<http://www.ussearch.com/>

<http://www.pipl.com/>

<http://www.canada411.ca/>

http://www.peakyou.com/united_kingdom

<http://webmii.com/>

<http://www.ratsit.se/BC/SearchPerson.aspx>

<http://www.dgs.dk>

<https://find-person-germany.com/>

One of the websites I highly recommend using is 10digits.

Make sure you are on the name tab and enter their first and last name (in the first box)

Then enter their city, state and zip code

[img]http://i.ipixls.net/YtgkEcs.png[/img]

[Method 2] Targets Area Code

Using an area code lookup tool isn't necessarily effective most of the times but it can be help in a dox like if you need their state or some information. Area codes are the first three digits of their phone number so if you don't have their information from another site, then you can use this for a general idea of their area like city and state. It can be helpful when starting a dox or confirming a dox.

Spoiler ([Click to View](#))

<http://www.allareacodes.com/area-code-lookup/>

<http://www.melissadata.com/lookups/zipcityphone.asp>

[Method 3] Targets Email

You can get your target's Facebook with their email. It takes a few steps and isn't hard at all.

1. Head over to Facebook.com
2. Select the "Forgot your password?" option
3. In the box in the middle of the page, put the target's email.
4. It should give you the target's name, picture, and sometimes it may even give you the last 4 digits of their number.
5. Use the name they just gave you and/or picture and put it in the dox. We'll use them later.

You can also use [https://www.facebook.com/search.php?q=\(email here\)](https://www.facebook.com/search.php?q=(email%20here)) to find their Facebook

You can easily get your target's Skype with their email as well. You can do this within Skype itself or you can use an Email2Skype tool.

1. Go to the Skype search bar. It's usually above all your contacts.
2. For the search field, instead of entering their Skype, you're going to enter their email.
3. Wait a few seconds for results. If there are none, maybe he doesn't use the email on Skype or you can try the next method. It always works when else fails

[Method 4] Targets Number

We can search our target's number just as we did with the target's name. There are many sites to use and I'll list my favorites. I highly recommend using 10digits

<http://www.10digits.us>

<http://www.reversemobile.com/index.php>

<http://thatsthem.com>

<http://www.numberway.com>

<http://www.phonenumber.com>

<http://www.fonefinder.net>

<http://www.whitepages.com>

<http://www.pipl.com/>

[Method 5] Targets Website

Without who.is protection, targets are really easy to dox if they have a website.

Spoiler ([Click to View](#))

<http://who.is/>

<https://www.easywhois.com/>

<https://who.godaddy.com>

This is what a simple whois look up looks like, and is a vital part of doxing if they don't have whois protection.

Registry Registrant ID:

Registrant Name: Domain Administrator

Registrant Organization: Facebook, Inc.

Registrant Street: 1601 Willow Road,

Registrant City: Menlo Park

Registrant State/Province: CA

Registrant Postal Code: 94025

Registrant Phone: +1.6505434800

Registrant Phone Ext:

Registrant Fax: +1.6505434800

Registrant Fax Ext:

Registrant Email:

domain@fb.com

[Method 6] Targets Skype

Lots of you are most likely doxing someone who has annoyed you over Skype so this method can be very handy to use.

Resolving Their IP With Skype

Using this method can get you the target's IP address which can give you their full dox if you use the IP right. I personally enjoy this part more than most as it's the easiest and makes doxing simple, especially if you're doxing someone that doesn't have a lot of knowledge in hiding themselves.

Conclusion

Doxing is an overall great way to gain more information on a person as you have seen from this tutorial.

Please dox at your own risk, and never dox any members from Hack Forums as it is against the rules!

zeroxi - September 5, 2015, 7:30 pm

Thanks for this HQ Tutorial man! Will be adding on my tab

You are literally insinuating that you are able to obtain info from the ISP, how do I make you cringe
LMFAO you made this guide on the fucking toilet.

I'm going to assume probably not because you list Account Holder instead of name on file.

Edit: Atleast add whoisology to the domain lookup....

Grievous????? - September 6, 2015, 12:09 pm

Great tutorial, very HQ! Thanks a ton bro.

Grievous????? - September 17, 2015, 12:36 pm

Thanks shooky ?
You will be dox god now.

Zayzo - September 17, 2015, 8:09 pm

A good tutorial, however I just don't find all the doxing tutorials very appealing. Reminds me of showing someone how to write an essay.

Sure, people are gonna write essays (or do doxes). but they aren't gonna be high quality essays, and this is more of many methods listed.

I personally think, doxing isn't just about the methods you use, but how you utilize those methods.

Good tutorial nonetheless. Good job.

Grievous????? - September 18, 2015, 7:48 am

(Sep 17, 2015 08:09 PM)Zayzo Wrote: [\[CITE\]](#) A good tutorial, however I just don't find all the doxing tutorials very appealing. Reminds me of showing someone how to write an essay.

Vu47K - November 12, 2015, 11:31 am

It's really nice tut
contain a lot of information.....!!!
Thanks you so much

Nyctophilac - November 12, 2015, 4:53 pm

I am reading this post without even knowing what is doxing

Bigbroxy - November 23, 2015, 4:51 pm

(Sep 5, 2015 07:29 PM)Fam• Wrote: [\[CITE\]](#)  

 

What is Doxing?

Doxing is an internet term used by many people. Dox is actually slang for "Docs". Doxing entails finding out your targets personal information.

...

Conclusion. Doxing is an overall great way to gain more information on a person as you have seen from this tutorial.

Please dox at your own risk, and never dox any members from Hack Forums as it is against the rules!

 

Someone posted about how to find an IP and I thought of this very excellent thread. It helped me a lot, not with doxing, but just plain ole snooping. It's filled with great tools and resources. It's one of those threads you read and repeat in case you missed something the first time. Really a super great thread!

patrick125 - November 23, 2015, 10:40 pm

This thread had some really helpful links that I was able to use to dig up a lot of info on a guy, thanks OP!

fake2pay - November 24, 2015, 10:12 am

Thank you man really helpful!

skyapple - November 25, 2015, 2:56 am

Bumping this again, hopefully it helps some of you guys out ?

monkeybitch2 - January 11, 2017, 3:20 pm

Wow great guide man thanks! I was trying to get into this topic but didnt really know where to start.

Grievous????? - January 16, 2017, 10:45 am

Thanks for the kind words bro, enjoy it ?
