Mate, you've done a great job on this tool.

I like the loading progress bar upon execution, and the choice of options via the drop-down menu.

In particular, the attachment support In the mail bomber Is something of great benefit to myself.

Appreciate your contribution.

Sry, but what is a toaster? edit hmm.. changes your msn status from on- to offline and back permanently...

that means my friends are getting a "user online" "user offline" spam, right?^^

Jeff. - July 23, 2010, 1:02 am

(Jul 23, 2010 12:59 AM)mozi64 Wrote: [\[CITE\]](#) Sry, but what is a toaster?
Toaster basicly just gets you online offline online offline online offline etc. To annoy people ?

???1zz - July 23, 2010, 1:14 am

@Unflamed

I got an update idea..

You could add the function to send a mail from an other account, so your victims don't have your original email adress. Like in Deisuke's text/mail bomber.

In his bomber you could click "add random". And the mails were sent from a account like 862331@gmail.com

Just an idea...?

By the way, great work ?
