Why did you join hackforums?:I joined Hackfourms for the same reason anyone else did to make money by sitting on your ass and pressing a couple of buttons,but I actually ended up learning things I didn't expect. Made couple hundred from e whoring thanks to HF

What do you want to achive here?:I am currently looking into c++ and vb.net coding. Looking to learn to make some tools for the community

What is your favorite interest?:My favourite interest on hf would be e-whoring and ratting they are both weird and fun to mess around with people.

Thank you for giving someone on HF the opportunity to become l33t.

I'm glad to see you are just doing this giveaway for the community and expect nothing in return.Unlike other giveaways where people expect you to advertise their product or the other people that just do it for rep. But this is one of the legit giveaways of people just being nice on HF

topdog77 - September 6, 2015, 12:38 pm

Why did you join hackforums?: To gain new knowledge about hacking, cracking and coding; I also joined to improve my knowledge on stuff I already knew and to make new friends in which I can participate activities in, or play games with, etc..

What do you want to achieve here?: I want to try and learn as much as I can about coding new languages, finding vulnerabilities and also to try and hack all the tings! Jokes, I want to be able to hack to the best of my ability and learn new things, and maybe even teach people what I already know.

What is your favorite interest?: I LOVE to RAT and crack, well, I used to; I haven't done much recently due to moving countries, but soon, I would love to continue ratting and try and find vulnerabilities within websites maybe, or create my own business/find new ways to make money.

Thanks, good luck to everyone, hope I have a chance at winning!

JohnTravolta3242 - September 7, 2015, 6:03 pm

What do you want to achieve here?:

I want to grow this community and make as many contributions as possible while at the same time teaching myself on the way there. By creating tutorials, giving away GFX, selling GFX, creating

eBooks, helping in the beginner hacking section and participating in lounge debates I learn many new concepts myself. I would like this upgrade so that I can post in inaccessible parts of the site like this contest section (I have several giveaways to make) and the political discussions.

What is your favorite interest?:

I enjoy learning. I'm always reading books, watching videos, or browsing forums looking for new concepts to learn. Whether it be geopolitical analysis or pentesting I am passionate to expand my knowledge knowing that it will have a contribution on my life at the end.
