Thread: [\[HELP\] So I have hacked into a IPB website, uploaded a shell.](#)

RmVita - September 7, 2015, 8:20 am

So what I want now is to dump all these files in the root,
I couldn't find a solution.

So what I found was:

proftpdpasswd file.. which I believe contains the username and hashed password of their ftp account.

It contains:

Code

```
craft:$6$ZN4dzY6eluhC2RLZ$KMpIkAh7XCk7JnHT07V90UaNfsOrCENQg7fbeM1vosv/qFn9so610
HrAEW2vBNVm6CC10sef8MsXRFEuNZk7v0:831:842:craftlaa:/home/craftlaa/forums.craft.lv:/bin/ftp
sh
```

```
craftlaa:$6$0xFHQISFuF3KL6Eo$xgrDLvwml5J5QXMo1XOI.7o2gl5NvZKzpm.NIOhY8LAjnm/l.qDa
OJ2AWepI8rHybggi6clRM5d/l6.PdE5GW/:831:842::/home/craftlaa:/bin/ftpsh
```

```
craftlaa_logs:$6$0xFHQISFuF3KL6Eo$xgrDLvwml5J5QXMo1XOI.7o2gl5NvZKzpm.NIOhY8LAjnm/l
.qDaOJ2AWepI8rHybggi6clRM5d/l6.PdE5GW/:831:842:craftlaa:/usr/local/apache/domlogs/craftlaa:/
bin/ftpsh
```

Am I right ?

Cool... now increase the power dramatically... create a motion sensor and a 3 point swivel mount guidance system and self firing mechanism. then mount to my cabin roof for non lethal anti intruder defense.

It was reported before I even got the chance..

Thanks to the one who did it !

By the root you mean the whole server, or their website directory like /public_html/ ?
