Would someone be able to re design this, to look really simple yet elegant. Nothing super fancy, but make it look like it works.

like, make it look like the kinda gambling website that would atleast give you a reach around while it's fucking you in the ass?

whoever can do this, ill give 50% of the first \$100 profit. I am apart of a few large communities and know a few popular streamers. So I am confident I can get a good shout out.

Willing to give even more compensation over time.

Also, the website name is possibly going to change. Still trying to think of something catchy lol.

People need more than a "maybe" 50\$ for a full website design.

i mean, im not looking for anything super amazing, basically just a color change and the logo changed at the top right. I mean I could probably do the logo :/

idk, i learned some of the basic stuff with dreamweaver in school. I know how to use photoshop relatively effectively, I just don't know how to apply the two in this situation.

how much would you charge?

Dyrhoi - September 8, 2015, 12:02 am

If I'll have to change the HTML/CSS and implement the backend accordingly for a full re-design, it's not gonna be cheap. I myself would charge 200-500\$ for this, depends on the job.

If it's just a color change you should do it yourself. Just go into the CSS files and change it from red to blue lol.

Same with the logo, it's just an image which needs a different path.
