Thread: [{FREE} {IMPORTANT} START HAVING FUN WHILE EWHORING! earn riotpoints or money](#)

|||||| - September 8, 2015, 1:53 am

Hello! im going to share two free methods that you can make some money with or riotpoints for Leage of Legends. This methods is for you that thinks that e-whoring has started to become boring

[2 naughty girls]

So every guy have sometime got a request at skype saying "hello cutie, wanna see me live" blah blah "go to this website" and there the most of the e-whores is doing wrong, you need to say "here at skype" when you write to a guy in skype. But this method is fun, you need a secound ewhorer, you need different packets (obvius) and you are going to spam to all the guys you can find. Use the line "me and my friend are kind of naughty, wanna see us in cam, we are having boring right now and want a fun guy"

when you get someone to talk to you, you both starts to flirt with him. Then you say to the other ewhorer "should we offer him a show?". You know, that girly "naghty" thing girls do in movies. You tell him that for like 30 bucks, both of you can give him a show.

seriously, what guy doesn't want 2 strip/pornshow from 2 girls at the same time?

Leage of Legendsmethod

yeah, this is kind of easy to figure out. You just create a new lolprofile, choose a girly name, start playing and start adding people, talk to them and ask them to add your skype, sit and talk with them , play with them and tell them that you want a new character and if they can buy riotpoints to you, you can strip for them or something your vcw is doing. Tell them that you want the code, then you can either sell riotpoints or use them.

kind of obvius method but you need to find your own way to do this

Hey OP, how much are riotpoints worth? Any cool site to sell them?

I'm looking to get into game ewhoring, is safer. Problem is that I'm not a gamer per se lmao.

Riot points cant be exchanged to another currency. Try ewhore in csgo, you can trade skins for BTC or gamble.

Well, i tried to familiarize a little better with the game (CSGO) a bit before ewhoring there, but never understood how to receive a fucking skin lmao. I have to download the game again though since I had to format my PC, so it may take a while.

On the other hand, i did a little research about riot points (http://leagueoflegends.wikia.com/wiki/Riot_Points). If I ewhored for some, what can I do with them? I didn't read there that they could be exchanged to another currency, if thats the case, at how much? I read they can be exchanged for game items, which I imagine can be re-sold again. But that looks like a pain in the ass haha.

Edit: didn't read you posted "cant" instead of "can" lol #dumbfuck. Ok, I got it, thanks for the help.

The second method just seems for people into LoL. But I have to admit, the first method is insanely easy to pull off and looks real to me. What would even go greater is getting a pack of two lesbians and creating some sort of show for them. And they'd think it would be real.

Wow this method is hilarious but still great. Gonna try it sometime in my Ewhoring journey.

Goin for this lol

Thanks for the share ?

For how long did you search for finding this thread?

earsoff - November 15, 2018, 12:29 pm

Dude this is such an old thread but I have to say, the "gamer girl" method works and sometimes its the easiest thing to do. Some dude bought me Overwatch and tipped me 15\$...I didn't even offer him anything lol
