That's actually pretty good. You should consider making a Deviantart page if you don't already have one to get feedback from other artists.

If you're going to then add it to your PC/Laptop in which to free-hand, look up downloading some Paint brushes which work for skin correction and tone, you could make him look a lot more bold and stick him out into the open.

For a drawing though I must say It's better than me, I need to get back into free-hand drawing and try to improve my imagination for that.
