Thread: [Username History Changes](#)

Omniscient - September 9, 2015, 1:48 pm

I'm making a policy change to the Username History feature of HF. Requests to have old usernames removed for fear of doxing or other malicious activity has continually increased at a steady pace. As a policy we do not alter username history for anyone. I do however understand that members may want some of their history removed. I need to balance that with the members ability to track possible scammers.

So what I've done is altered the results to only show the past 6 months of username changes. Anything older than that is only visible to Admins. Also a [Username History Search](#) will still pull up results of old usernames but that doesn't function by UID.

If you're worried about an old username being used against you for malicious purpose well now you have to just wait 6 months and the name will no longer be viewed from your profile.

I hope this helps those who weren't smart enough to not use a username that could potentially be used against them.

Thank you.

Update - September 9, 2015, 1:48 pm

Sounds like a good change. ?

Griev?us - September 9, 2015, 1:49 pm

This would've been useful for me back in December. ?

Thank you for adding this but I'm sure there are ways around it though (old quotes from old threads, etc)

Love all the recent work you've been putting into the site.

Raymond Reddington - September 9, 2015, 1:50 pm

I am sure this is not for the request I made couple of days before?

Thanks a lot Omni, I feel safe now xD.

St?lk?r - September 9, 2015, 1:50 pm

Sounds pretty nice thanks for the update ?

Omniscient - September 9, 2015, 1:51 pm

And that's true. Which is partially why I don't bother altering username history. While it's helpful to remove it that still isn't a fool-proof way of protecting an identity.

Fact is that members need to show caution from day one of their membership. You can't wait a

year and decide your security is important. Security has to be important immediately.

Meow - September 9, 2015, 1:52 pm

Finally, thanks a lot for this Omni!

240sx - September 9, 2015, 1:52 pm

Omg fuck yes nice update I love this new idea

Paul Wilson - September 9, 2015, 1:54 pm

Yes yes yes, this is a fantastic idea, best of both worlds.

• **Kyle** • - September 9, 2015, 1:56 pm

Thanks for this, suggested it a while back. Glad you went through with it too.

EDIT: maybe making the 6 month thing to 1 year can decrease scams too

Griev?us - September 9, 2015, 1:56 pm

(Sep 9, 2015 01:51 PM)Omniscient Wrote: [\[CITE\]](#) And that's true. Which is partially why I don't bother altering username history. While it's helpful to remove it that still isn't a fool-proof way of protecting an identity.

Indeed, that seems to be the mistake a lot of us make as users here and get our heads too far up our asses to realize what could happen with old data that was posted.

Have you ever thought of having quotes update with the current users username, not like it's needed due to what you said about users needing to be secure about where they're putting their information but maybe it'd cut down on some other non-needed issues?

Gary 'Eggsy' Unwin - September 9, 2015, 1:57 pm

Thank you so much for adding this feature.

Been so worried about sharing my HF profile with certain people due to this exact reason.

Optimized - September 9, 2015, 1:58 pm

This is a really good idea I think. Nice work Omni. I think its good you listen to the suggestions like these!

Cammy - September 9, 2015, 2:01 pm

Very well. Good work Omni (as always)

Vitani - September 9, 2015, 2:03 pm

(Sep 9, 2015 01:56 PM)Grievous Wrote: [\[CITE\]](#) Indeed, that seems to be the mistake a lot of us make as users here and get our heads too far up our asses to realize what could happen with old data that was posted.

Hmm yeah this would be even better. Just like updating a signature on all your old threads, but then with the username.

Would be awesome if this was possible, though the changes that omni made just now should already help alot.

J?son - September 9, 2015, 2:05 pm

I was wondering if you could remove duplicate username changes? It says I changed my username 12 times when it's been only 6.

I blame Chrome/Linux for this. I dunno what happened

Krew - September 9, 2015, 2:07 pm

Very cool feature & one I have been eagerly waiting for. Thanks for this update.

TRAUMA - September 9, 2015, 2:09 pm

Sounds like a solid idea!

My 2 cents: You should charge \$5-10 for 'x' amount of past usernames to be removed, BUT only visible to staff.

Redwall - September 9, 2015, 2:09 pm

Sounds good, looking forward to the implement.

SIM-1166170 - September 9, 2015, 2:10 pm

Thanks omni. Any chance you can make it so we can view our own full history, and not other members?

Omniscient - September 9, 2015, 2:10 pm

Quote: Have you ever thought of having quotes update with the current users username

Would be a terrible resource hog. With every username change it would have to search every post on HF to make the change. It would be the cause of an incredibly easy disruption to the site.

?Average - September 9, 2015, 2:11 pm

But there's actually only 9?

Cammy - September 9, 2015, 2:14 pm

(Sep 9, 2015 02:11 PM)?Average Wrote: [\[CITE\]](#)

But there's actually only 9?

I don't see the problem here. The number displays the total amount of times you changed your username (this includes the changes that are hidden). You changed your username 9 times in the past six months therefore it will only display 9 username changes

King Ragnar - September 9, 2015, 2:22 pm

I support this to the max, good job Omni.

0x - September 9, 2015, 2:25 pm

Good idea, I was tired of seeing my first HF username from years ago.

NeoCode - September 9, 2015, 2:29 pm

Thanks a lot for this, I know a lot of old members used recognizable names, helps reduce doxing

0x - September 9, 2015, 2:31 pm

(Sep 9, 2015 02:10 PM)Omniscient Wrote: [\[CITE\]](#) Would be a terrible resource hog. With every username change it would have to search every post on HF to make the change. It would be the cause of an incredibly easy disruption to the site.

But I thought the usernames were saved with the user SQL ID. It would be that much of a resource

hog to create a function that fetches the usernames from the table that stores the past names and show them in a small dialog in the post? With the type of server you're running the SQL service on, I would of thought it would be nothing compared to the other queries running on the site.

I remember creating a similar system for a popular GTA SA:MP Server and it only ran the query around 2,000 times per second and it used 0.5% of the SQL Service.

Omniscient - September 9, 2015, 2:39 pm

I don't believe you're thinking it through.

You have 2 choices to accomplish your request.

1. Upon showthread.php load you'd have to check every user against any new username changes. And of course you'll need to preg_match or some function to look for the quote text. The username table is large but even if you reduce the query like:

```
SELECT from mybb_username_history WHERE UID IN(1,3,5423,232333) SORT BY date DESC
```

The "IN()" would of course grab each UID in the page which is normally 20 UID's. Then it would have to check quote mycode for a possible change. Then update the post in the database for future efficiency.

And realistically it's probably even more complicated than that.

2. Every time a username change occurs you'd run a query with a LIKE statement to find each quoted instance of the old username and then run an UPDATE statement. I can only imagine how long that would take. Almost positive this would choke the server instantly.

Changing showthread.php is not something I do lightly and I make sure mybb_posts table change are minimized because doing any type of LIKE searching will destroy the database. That's why I run a separate service for searching here. You even want to add an UPDATE statement based on the LIKE. No way would it work.

Dean Winchester? - September 9, 2015, 2:41 pm

Omfg thank you so much Omniscient now I'm 100% anonymous ?

It seems that myBB does stuff differently with their SQL Database as when I made my system, it was really less complicated than that.

If I remember correctly, the correct setup was

-> User Changes their name (STORE THE NEW & OLD NAME INTO A DATABASE CALLED 'USERNAME_CHANGES' with their UID

-> When we want to fetch it (RUN A LOOP WITH A QUERY TO FETCH THE OLD USERNAMES CORRESPONDING TO THAT UID) and print onto our dialog.

As it seems, there's a different way of doing this on myBB like you have explained above.

At least I learned something new about this forum software as I personally do not deal with myBB. I am more of a xenforo user.

The Supreme Leader - September 9, 2015, 2:46 pm

Sucks that the Username History Search is Ub3r only

?Average - September 9, 2015, 2:47 pm

What if you made it where we can delete are posts all at the same time if there older than 6 months old, would remove all old quotes and personally i would love this feature.

0x - - September 9, 2015, 2:48 pm

(Sep 9, 2015 02:47 PM)?Average Wrote: [\[CITE\]](#) What if you made it where we can delete are posts all at the same time if there older than 6 months old, would remove all old quotes and personally i would love this feature.

Then there would be no use of the archive of this forum and we would lose so much data that the

forum would look empty.

This is a really bad suggestion, no offence.

Cammy - September 9, 2015, 2:50 pm

(Sep 9, 2015 02:47 PM)?Average Wrote: [\[CITE\]](#) What if you made it where we can delete are posts all at the same time if there older than 6 months old, would remove all old quotes and personally i would love this feature.

Yes but how are the posts storing the quoted text? Storing the UID and Username Change is NOT the problem. The problem is changing all posts to reflect updated username changes.

Does Xenforo save quoted text differently in the database besides plain text or BLOB? The only feasible way would be for each quote to be the PID (post ID) that's quoted instead then run a query to grab the updated info from the user table based on the \$post['uid']. Which is doable but not with MyBB as it stands and in reality it's not a very efficient way to run showthread page because every quote would require an additional PID query run.

Savage xD - September 9, 2015, 2:53 pm

This is a great update. Thanks Omni. You are great with finding the correct balance when it comes to changes.

Which is doable but not with MyBB as it stands and in reality it's not a very efficient way to run showthread page because every quote would require an additional PID query run. Xenforo handles quotes in a near identical fashion as far as usernames go, probably a little more efficient if you wanted to update usernames, however it doesn't have that feature either.

Code [QUOTE="USERNAME, post: XXX, member: XXX"]So basically Xenforo's format would save you a query by not having to lookup the UID from post number.

Edit: I was thinking a little different than you now I reread your post. It seemed like pagespeed would be affected to update them on page load, however maybe that's a better idea than a cron job to scan all posts for quoted text.

Vegas - September 9, 2015, 4:39 pm

Pretty big relief, I asked years ago and was told it was impossible. Had my first and last name in my history since the week I joined lol.

Mr. WAVES - September 9, 2015, 7:06 pm

Thanks for this! I wanted an option to remove or hide my old usernames. Nothing to hide, but why not.

Truth - September 9, 2015, 7:19 pm

Horrible. Most of the scams done are to the new member who only put the username in the scam report. You pretty much eliminate the ability to search for those past scam reports.

Only the scammers wanted their history removed because they know new members only put the username and not UID.

Vegas - September 9, 2015, 7:26 pm

(Sep 9, 2015 07:19 PM)TryAgain Wrote: [\[CITE\]](#) Horrible. Most of the scams done are to the new member who only put the username in the scam report. You pretty much eliminate the ability to search for those past scam reports.

(Sep 9, 2015 07:36 PM)Proctor Wrote: [\[CITE\]](#) Does this really matter though? Well, the username change history does not matter at all, but Omni still did it.

BlaqCat - September 9, 2015, 7:37 pm

Seems like a good idea and honestly I wanted something like this because it will clean up profile name list so if you signed up with a lame name then had it changed and don't or haven't changed it for 6 months then the old one is gone so it looks better.

Remix™ - September 9, 2015, 7:38 pm

This is awesome. Plain and simple :)

Zeptum - September 9, 2015, 7:44 pm

I hope that no one gets too comfortable and leans back. Which I can tell a lot of people will, but don't trust yourselves too much.

CRT - September 9, 2015, 7:47 pm

I pm'd you about this a few months ago. Glad you did this, thanks.

Supreme??????? - September 9, 2015, 7:49 pm

Sounds pretty interesting. Let's see how this works out.

Omniscient - September 9, 2015, 7:57 pm

Quote: It seemed like pagespeed would be affected to update them on page load, however maybe that's a better idea than a cron job to scan all posts for quoted text.

The feature is mainly pointless though. Members can edit a quote and put any username they want. So what's the point anyways? 99% of the time when I do a quote I don't even bother with a username.

Quote: Pretty big relief, I asked years ago and was told it was impossible.

I still have not altered your username history. I've only limited results to the past 6 months for all members.

Quote: Only the scammers wanted their history removed because they know new members only put the username and not UID.

You're wrong. Simple as that. I'm the one that reads the many requests for username history changes, not you. So I know the reasons. And this does not effect the Deal Dispute threads or the Deal Dispute Databases which should ALWAYS be based on UID anyways. If you're using username for searches that's dumb as hell because usernames change easily and even some usernames are used by multiple members.

Quote: But, exactly. Since to all members but staff it shows the usernames from the past 6 months, if you haven't changed it, then shouldn't the number adjust along with it?

I've decided against altering the number of changes since it will be able to reflect all the changes a user made but will only display the previous 6 months of changes. The display page for the changes does say that it's just 6 months.

Autocorrect - September 9, 2015, 8:01 pm

Really like this addition! ?

Thornzzz - September 9, 2015, 8:31 pm

Respectable, it's been requested a lot. I think you've done created a good balance to please members and to also protect them.

mrnapolean1 - September 9, 2015, 8:57 pm

Thanks for the update.

I do not ever change my username though but other members will benefit from this change....

Learner Boy - September 9, 2015, 10:19 pm

Nice Update

Thanks a lot for this Omni

Captain Steve Rogers - September 9, 2015, 11:12 pm

Vigor - September 11, 2015, 10:31 pm

This is awesome! I've always thought that having all of my past usernames was a bit of a personal information hazard. Great job Omni!

Avunit? - September 11, 2015, 10:35 pm

I feel as though this change is a necessary evil to protect us from the Google gods.

Zack Fair - September 11, 2015, 11:05 pm

I like this change, definitely reasonable. Thanks for the updates!

Billie Joe Armstrong - September 11, 2015, 11:13 pm

Brilliant update, Omni! This would be great if you have embarrassing username such as HaxorX , Anon911, larehacker and etc.

The names are embarrassing , not the passion.

Tyler? - September 12, 2015, 10:50 am

Pretty cool feature. I haven't changed mine in a long time, nor do I plan on it. So mine is now blank. :)

Inj3ct0r? - September 12, 2015, 10:53 am

Great idea... Thanks a lot for making HF better everyday

Abstractive - September 12, 2015, 10:55 am

Great update. Thanks for implementing this Omni ?

Root - September 12, 2015, 3:28 pm

Thank you so much I actually wanted to PM you about this problem but never had enough time to do so.

iDuL - September 13, 2015, 1:19 am

Was wondering this, randomly wanted to check when I had some usernames but oh well. Thanks.

Vintel - September 15, 2015, 9:19 am

I like that you think about your users security. Keep the good work up!

BooGod - September 15, 2015, 10:23 am

How amazing, I think my profile is just more clean and sweet.

Vitani's Mate - September 15, 2015, 10:39 am

Wow. I've had not changed my name for a while it seems. xD

Juicy - September 15, 2015, 10:41 am

Kinda sad that I can never be known as Juicy Booty again because the phrase "boot" cant be in a username.

Blazin - September 15, 2015, 2:18 pm

Pretty good update if you ask me.

Foreseeable - September 15, 2015, 5:10 pm

Good update Omni, I'm sure a lot will be happy about this.

Same, I love this new feature :P

thanks omni!

Prophet Banana - September 17, 2015, 11:13 pm

Needed this for awhile. Thanks champ. Keep working on those hooks and uppercuts.

N3wb Gamer - September 19, 2015, 7:18 pm

Thanks for this. I was one of those who messaged you
