Thread: [Null | Official Recruitment](#)

Avunit? - September 10, 2015, 3:42 pm

Null Group Recruitment

This is not a general recruitment thread, read it!

For the past couple of months most of the Null members have been incredibly busy and the group has been trying to evaluate it's position on the forum and how best to evolve. We have lost some key members along the way and have encountered other obstacles that we have have had to overcome and I'm glad to report that we're back with a fresh outlook and a solid future plan.

The first step we are taking is to look for productive and knowledgeable members to join our roster to serve various community based roles within the group. This will primarily be teaching and tutoring roles however we are also looking for people that can join us to participate in intellectually-challenging as well as financially profitable group projects (in addition to serving as a mentor to the less-experienced within the group and the wider community through a series of programs). Please start your application with a haiku so I know you read this far. Any incentive for a payment other than the benefit to the wider community and being part of this tight-knit group should not be expected however we have big plans for the future, trust me.

We are primarily looking for teachers specialized in the security aspects of modern technology, computer science and all round technical skillsets including Cryptography and Networking however if you think you have a worthwhile skill there is no harm in applying.

Please fill out this application honestly and to the best of your ability and I'd prefer it if you didn't use any graphics. The guideline is 250+ words in total.

Quote:Name:

About you:

Relevant Skills:

Past experience (provide links where possible) :

Contact methods (feel free to send in private):

If your application happens to include any of these words feel free to delete it after posting:

Quote: botnet, DoS, RAT, ewhore, DOX, booter, ebook, keylogger, stealer, amp, putty, business, kali, backtrack, crypting, spreading, SentryMBA, cracking, deface, stresser, resolver, marketing, SST, VB.NET, SE, proxy lists, configs

This is a very limited recruitment and appropriate candidates will be tested thoroughly prior to being added to the group. Don't lie, believe me.

Sorry but this isn't a general recruitment, as detailed in the thread.

nuclearcmd - September 10, 2015, 4:02 pm

Name: DRAZIL

About you: I'm 15 currently still in school, my school has a computer science class(just started), im

in that. USA.

Relevant Skills: Not alot of skills, RATING,doxing,ddos,graphics/editing(A.E,PHOTOSHOP CC) Intermediate level.

I want to gain knowledge. Three words. Knowledge is power. By gaining that knowledge I would spread it among others. I'm a gray-hat, I help others and give them a voice. Getting back those who deceive innocence, fighting for a cause. I plan and execute.

Contact methods : Skype,XMPP,HF PRIVATE MESSAGE

UnNullRouted - September 10, 2015, 4:04 pm

Looking forward to seeing new members!

Lynchings - September 10, 2015, 4:07 pm

Name: Lynchings/Jack

About you: I'm a 17 year old senior in high school ready to graduate and go to college for either Computer Science or Software Engineering. I've been great with technology basically since I started using it, it's always interested me so I always researched to learn more.

Relevant Skills: At the moment I know VB.net and Java decently well and I'm in the process of learning C#. I've done basic Python and Ruby as well just to familiarize myself with the syntax of each language. I learn new programming languages relatively fast.

Past experience (provide links where possible) : Honestly I've done literally all of my programming off of HF and either independently or over Skype. I have made the occasional thread asking for help back when I was still just learning. You can feel free to PM me asking about programming.

Contact methods (feel free to send in private): I won't post my usernames here, but I can be contacted through HF PMs, Skype, Kik, and Snapchat. If need be I would get TeamSpeak but I definitely prefer Skype for either IMing or calling.

Taylor Swift? - September 10, 2015, 4:10 pm

Name: Bjorn

About you: I am 14 years old computer programmer. I take all computer programming classes in school. I play a lot of League of Legends and Counterstrike, I am very active on this forum and will bring a lot more to the table later on, currently working on a project. Also, I skipped grade 7, no idea if that's interesting or not just throwing it out there.

Relevant Skills: I am good at programming, I know VB, HTML, CSS, Java, PHP (not a lot of PHP) and very little Python. I am also good at graphics, I can make logos and good threads for anything we might need. I am white hat and like to help other people with any problems they might have with viruses and such. I can write a nice website for anything we might need and I'm great at soccer ? !

Past experience (provide links where possible) : I have worked with E-Books and helping advertise them and the creation of them, I have also been an admin on a minecraft server called "Play.battlepvp.com" Which had over 250 people on but it got shut down. (Website if interested, can also google it! <http://play.battlepvp.com/>) I have also worked a lot with botnets so if that comes into play I can assist!

Contact methods (feel free to send in private): Skype, HF, E-Mail, all PM'd to you OP!

Hopefully I qualify, thanks in advance for the opportunity!

Ted™ - September 10, 2015, 4:10 pm

Honestly why even apply? Read the thread.

+Haze - September 10, 2015, 5:03 pm

I specialize in programming more, however your thread states "all round technical skillsets"..

As a developer I'd say I have knowledge in Crpytography and Networking because I develop applications that implement such things. But according to your thread, it seems like you're looking for those who are experience in that area but not in a programming way if you get what I mean? Or am I wrong?

Plus I teach programming as part of my service, so do I qualify to apply?

Hinch - September 10, 2015, 5:09 pm

Avunit we are putting our trust in you please dont fuck up :)

Grin - September 10, 2015, 7:06 pm

Name: Grin

About you: Returning as a 4th year in university, almost graduating if I can get all my classes in order. Trying to pick up meaningful hobbies that isn't gaming because I do a lot of that right now. Everyday I work to be a better individual than I was the day that past. It's not always about necessarily improving, but it is about at least changing my mentality to better myself. Anyways, that's just a little scope on what I'm trying to do.

Relevant Skills: I've actually been looking into a bit of Networking and I'm reading into the subject a lot. I'm scheduled to take several courses in the near future in the Networking classes offered at our university. Networking is actually different from computer science in our campus so I at least know the difference between the two. In terms of skills, I hate to sound like a script kiddo, but I used to play a lot with Wireshark and MiTM from iPods. It was definitely something I was proud of back then as everything had to be done without a GUI. (With the exception of Wireshark.) Cut me a break, I was actually about 14-15 when I first started messing around with it.

Past experience (provide links where possible) : To be honest, I don't post a whole lot of resourceful tutorials on HackForums and I don't document my hobbies so I'm afraid there's no threads I can share. I would like to join just so I can learn more about networking because I want to be involved in networking projects in the future. Probably isn't the best application on this thread, but I gave it some thought and I do have the determination to learn.

Contact methods (feel free to send in private): You can PM me. We could go on IRC, idk. That's up to you guys.

?A?O - September 10, 2015, 8:55 pm

Really put some time and effort into these.

In the end, it will show if you do or not.

I just asked a question about general recruitment, from the answer I got I would of applied

Lionheart - September 10, 2015, 10:04 pm

Error 404:

Your haiku could not be found.

Try again later.

Name:

Koy (Sure... like the fish)

About you:

I am not Asian/oriental. I am actually 1/4 Hispanic and a mix of European. My name was given to me by my grandfather. I am named after the '95 Colorado Buffalos quarterback Koy Detmer (he is also Caucasian). I am currently nineteen years of age and live in the United States. I am attending the Art Institute of St. Louis, Missouri for a major in graphic and web design. Along with that, I also own a photography studio and am the graphic designer for several local restaurants. Aside from designing, I am currently teaching myself the basics of coding (CSS & HTML; cut me some slack). Eventually, I would like to own and run my own design firm, as well as my photography studio.

I have been a member of HackForums since April 1st of this year. I have done my fair share of graphics for the site. Although, a lot of it (being userbars) has gone unused. I wish to expand my knowledge of the community and become an influential member in it as well. Everything gets better with time, so why shouldn't I?

Relevant Skills:

Graphic & web design (you said it doesn't hurt to apply). I'd be able to assist with group graphics, as well as member graphics. I would also find the time to teach members that want to learn to design.

Past experience:

Forum work - <http://sector.carbonmade.com>

(Needs to be updated)

Contact methods:

I will send them via private message.

P.S. I would have made this application appealing, but I'm going to sleep soon. Collectively, I'm at about 230-240 words. I can't think of anything else at the moment and would prefer not to fluff my application with obvious padding.

Funnily enough I was looking at your graphics work earlier, it's very impressive. Thanks for the application and we'll definitely consider it.

b?xxy - September 10, 2015, 10:11 pm

Okay. Just going to say it now, I'm not looking to be a teacher, which perhaps will make you disregard this post, but why not. I'm an adult, yes. I am currently majoring in Network Security, and Computer Science. I'm not exactly active on HF due to my job, and my schooling, but it would be nice to be a part of Null, hopefully brought back up in a good fashion. Not really sure what else you want me to say, I have interests in coding, and securities and HF so cool.

If you want to know anything else, PM me, and I'll fill you in.

Not much of a "Hey, let me post my business" person.

Sorry about the 250 words thing, again PM me for more.

About you: I'm 18 and I like programming and I am a gnu linux loving freetard
Relevant Skills: i know programming languages and stuff like that
Past experience (provide links where possible) : n/a
Contact methods (feel free to send in private): PM here or use the xmpp in sig.

honestly just wanted to try write a haiku and i am not even entirely sure what makes one

Funtage - September 10, 2015, 10:45 pm

fuck i forgot my haiku

my name is funtage
anime is the coolest
thanks for listening

Mr. WAVES - September 10, 2015, 11:10 pm

Name:
Vlad

About you:
So yeah, I'm 21 and I'm an IT student. I love everything that is related to security: websites, servers, gadgets, PC, mobiles, IoT, etc. In my college I'm about to start teaching people what is pen-testing and how to do it. It's only my 3rd semester but I'm way better than older students. Most of the time when I see a new tech I think "out of the box" like: where could be the exploit? what if someone does this? what will happen if I merge this with that? That's how I think.

Relevant Skills: A lot of the subjects that are not allowed on HF
PHP (+HTML,CSS,SQL)
CPanel
JavaScript (not an advanced, but enough for XSS)
Networking
Network architecture
Linux
Not the best but I can do more than others in forensic and stenography
Bash scripting(I'm doing an advanced scripting class, so in few months I'll be able to do anything)
Switch configuration (Cisco)
CCNA certificate soon (doing the lessons right now on Netacad)
Not sure if it matter but I have over ~6 years of experience in Photoshop
Linux kernel upgrade

I speak Romanian, French and English (I always find my answers online)
Basic to intermediate Python 3
I'm learning very fast
Past experience (provide links where possible): Pen-testing competitions 1st place - CSI:BdeB - 2 days: English (short):
<http://www.gardienvirtuel.ca/en/le-college-rosemont-remporte-la-1ere-edition-du-csibdeb/>
French (full article):
<http://www.gardienvirtuel.ca/le-college-rosemont-remporte-la-1ere-edition-du-csibdeb/>
NSec (aka NorthSec) - 3 days - one of the biggest (if not the biggest) pen-testing competitions in Canada
Official website: <https://www.nsec.io>
Some of the sponsors: Google
IBM
Owasp
Intel
McAfee
GoSecure
Offensive Security
Eset
Canonical
etc
Hackfest in few months Website: <http://www.hackfest.ca/en/>
Websites: www.guestlistplus.com
www.gtafanclub.net
Many others that I would not like to mention in public
Online (legal) pen-testing <http://www.root-me.org>
<https://www.hackthissite.org>
<http://pentesterlab.com>
<http://ringzer0team.com>
<https://hack.me>
A lot more that I don't remember
Contact methods (feel free to send in private): PM
IRC
Skype
Anything that I feel/can make it secure

Just for the show, here's a picture of the NSec competition where I was:
BIG IMAGE!!! ([Click to View](#))
I feel so proud! ?

Contact methods (feel free to send in private): XMPP and Skype.

LordCoder - September 11, 2015, 11:42 am

If you put VB.NET as banned word, put also C#.NET and .NET Framework in general.

Sync Jr - September 11, 2015, 2:22 pm

Name: Dong Jr ~ Ryan

About you: I'm been active in the sst for 3 years now, i'm also skilled in networking & coding websites (especially php, mysql, java, jquery, html). I also love gaming and i aint gay ;)

Relevant Skills: networking & coding websites & sst (botnets, amplification)

Past experience (provide links where possible) : Im working on a big stresser at the moment that is about networking & sst setup.

Contact methods (feel free to send in private): PM me for my skype.

Hinch - September 11, 2015, 3:41 pm

Honestly glad to see you put this

"botnet, DoS, RAT, ewhore, DOX, booter, ebook, keylogger, stealer, amp, putty, business, kali, backtrack, crypting, spreading, SentryMBA, cracking, deface, stresser, resolver, marketing, SST, VB.NET, SE, proxy lists, configs"

i kinda know a bit about Botnet Dos Rat Ewhore Doxing Ebooks Keylogging Stealing Crypting Spreading Cracking Stressers Resolvers Proxylists and configs. But I wish everyone good luck its honestly quite sad to see less people serious about it

?Nano_Curie? - September 11, 2015, 4:31 pm

Winter seclusion

Listening, that evening,

To the rain in the mountain.

Name: Neon/Curie

About you: I consider myself a kind person , very easily hurt by betrayal but willing to remain loyal to loyalty endlessly , I have spent almost my entire cyber life within the confines of Hackforums attempting to learn as much as I can about whatever I can.

I like to help people , but I also like to profit from knowledge i have gained.

i consider knowledge to be power , and also consider responsibility and truth to be of the utmost importance to a persons character.

I love Animals , and anything to do with Radiation.

Relevant Skills: I would say the only real skills I have at the moment that are relevant to this application , are White hat skills (Mediocre in comparison to many) And perhaps my knowledge of

the windows operating system itself.

Past experience (provide links where possible) : None at all. Although you may feel free to browse through my recent/old posts within the WHH section , I have spent 90% of my posts within there , I hope that helps.

Contact methods (feel free to send in private):

HF Personal message system

Skype (Although I will not lie , i genuinely hate the application and tend to avoid it at all costs , I would be happy to provide my skype name should you wish to progress my application further.)
Email.

League of Legends (This may seem weird , but if you really want to get ahold of me , the best place to find me would be online league of legends EUW server , as i spend alot of time gaming when i'm not reading).

Thankyou very much , for reading and or responding -

I await your reply.

OH and P.S

Apologies for not using my own material at the begging of this post - I'm not great with syllables :L

HIGH PAID FELLA - September 12, 2015, 12:07 pm

Spoiler ([Click to View](#))

Name:

Asterea a.k.a. astr

About you:

Hi.

I'm a human, but all jokes aside. I'm a person who is really interested in InfoSec and the exploitation of security systems in general and malware (PoS, ATM, etc.) and it's inner workings. I'm pretty OK. in malware analysing and reverse engineering, but nothing too advanced for sure.

I'm very interested in becoming a programmer (low-leven and scripting) and doing computer science in an university, I love learning and I'm looking to learn a lot while being in this team/group.

I love reading books and have a solid collection of books regarding serveral subjects such as; programming (C/++, Python, Intel x64/86 Assembly architecture, and more), exploitation (human hacking [OPSec, situationing, research, reactions, inner thinking and such], system exploiation [buffer-, stack-, & heap overflow]) and networking [working of Tor, and more].

I would love to learn system administration too, mostly relating to Linux systems, operating systems such as Linux, Android and Windows (API & hooking mostly).

I'm looking to dedicate as much of my free time as I can to follow online courses and learning, reading of books etc. It would be a really good experience to do be able to be in this group.

Relevant Skills:Programming Python

SQL

Web Forensics

Reverse EngineeringSmall experience with cracking (Galileo RCS)

Malware analysingWindows compatible

Removal of _malware_

Note: I'm currently learning a lot of things, I only put in the skills where I'm experienced in to bring no further confusion.

Please refer to [this post](#) to know where I'm interested in.

Past experience (provide links where possible):

Nothing noticeable.

Contact methods (feel free to send in private):

Private message, Skype, XMPP & IRC.

Note: PM to receive contact details.

Grin - September 12, 2015, 1:15 pm

(Sep 10, 2015 07:06 PM)Grin Wrote: [\[CITE\]](#) Name: Grin

About you: Returning as a 4th year in university, almost graduating if I can get all my classes in order. Trying to pick up meaningful hobbies that isn't gaming because I do a lot of that right now. Everyday I work to be a better individual than I was the day that past. It's not always about necessarily improving, but it is about at least changing my mentality to better myself. Anyways, that's just a little scope on what I'm trying to do.

Relevant Skills: I've actually been looking into a bit of Networking and I'm reading into the subject a lot. I'm scheduled to take several courses in the near future in the Networking classes offered at our university. Networking is actually different from computer science in our campus so I at least know the difference between the two. In terms of skills, I hate to sound like a script kiddo, but I used to play a lot with Wireshark and MiTM from iPods. It was definitely something I was proud of back then

as everything had to be done without a GUI. (With the exception of Wireshark.) Cut me a break, I was actually about 14-15 when I first started messing around with it.

Past experience (provide links where possible) : To be honest, I don't post a whole lot of resourceful tutorials on HackForums and I don't document my hobbies so I'm afraid there's no threads I can share. I would like to join just so I can learn more about networking because I want to be involved in networking projects in the future. Probably isn't the best application on this thread, but I gave it some thought and I do have the determination to learn.

Contact methods (feel free to send in private): You can PM me. We could go on IRC, idk. That's up to you guys. Accepted. Sending acceptance PM to you right now.

Froggy - September 12, 2015, 1:58 pm

When you need power,
don't trust the rest; only buy
Origin PC

Name: Froggy / Isabella

About you: I have been well-versed and passionate about technology, computers, gaming, event management, and online communities from a very young age. Growing up tinkering with technology and devising/collaborating in projects with colleagues cultivated my insatiable thirst to consistently learn more about the industry that drives technology forward, and polished my ability to pick up new skills quickly. I'm known as a results-driven, detail-oriented, decisive problem-solver with a zeal for creating well-considered, efficient operations. I not only set goals, but I accomplish them. Aside from that, I am a jet setter and a gamer. I love traveling and playing games whenever I have time to spare.

Relevant Skills: I have tons of experience in technology, but I still have a lot to learn. I seem to know a little bit of everything but specialize in management, which isn't exactly technical. I currently work for a game development company owned by former EA executives doing quality assurance testing and game design. I also do side projects with other companies such as Origin PC and NVIDIA, including promotions and giveaways. Other positions I have held are: Event Operations Manager for a local comic con, and Computer Technician for a college department. I'm still in College learning as much as I can, which is why I'm no where near being an expert at anything. I've been President of my college's Computer Club for 2 years, so I have experience running technology workshops, projects, and lessons. I would love to run a System Analysis and Design class in the name of Null, as it is a current class that I am taking (and therefor have the materials for it).

Past experience (provide links where possible): In this section I am only linking HF threads, which aren't many. Relevant real life experiences were described above. I have been in a leadership position in The Empire, Terror, Polymath, and Titans, where I have run different projects. I also ran projects for Eminence and several other groups. At one point, I was an MRT Trainee for a few weeks, in the time before the group closed.

[Froggy's Thread of Certifications](#)

[How to Make a Proper Hacking Request](#)

[\[BUILD\] Rate My Build & Updates](#) Contact methods: I mostly use Skype, Teamspeak, Tinychat, and HF Private Messaging to keep in contact with other members. I can share this information once accepted.

@NEGRO - September 14, 2015, 12:56 pm

joban wanted to eat food

he went too local delimarket and bought food

Swag swag swag swag swag

Name: Shield

About you: majoring in cs at UIUC, avid reader and past USAJMO qualifier. I like being involved with a lot of physical activities as well as geeking out over various problem by browsing stack exchange or helping with some of my dads work- works at microsoft and got me an internship there one summer under bing maps - overall great experience.

Relevant Skills: Taken many previous CS courses, included APCS in highschool (5 on AP exam), got an A in CSE 101 and am generally good with computers and solving technical issues.

Past experience (provide links where possible) : all my experience is real life. hf coding experience = ??? Like really hah

Contact methods (feel free to send in private): pm me or skype. Ill pm skype

samsepi01 - September 14, 2015, 2:02 pm

Spoiler ([Click to View](#))

Security is

what i do all of the time

i love to practice

I don't do poems I'm sorry.

Name: zer0w1re, Connor

About you: I am 18, and I have been using computers for probably 12 years now. I've always had a deep interest in how things work, both with computers, as well as other mechanical stuff. I remember the first time when I was probably 7-8 when I made the command prompt on Windows 2000 turn green and I thought it was the coolest thing ever. Of course now I have advanced well beyond child's stuff like that.

When I was in high school I took part in a cyber security competition called CyberPatriot. This is a computer DEFENSE competition, where we were given Virtual Machines of vulnerable Windows and Linux machines, and we were scored on how well we could find and fix the vulnerabilities. Our team, with myself as the captain, took 4th place, 2nd place, 2nd place, and 1st place nationally at the finals competition in Washington D.C. each year I was a part of it. I also won 2nd place in my state for a competition called CyberAces, which was basically a SANS NetWars competition. I competed against not only other high school students, but also college students and professionals in industry. I even beat my information technology instructor, since he competed! I have also competed in numerous CTF (capture the flag) competitions, and done fairly well.

I am also working with my instructors here in college to start up a cyber security club, where we hopefully will be able to compete in the NCCDC (National Collegiate Cyber Defense Competition), which is basically the collegiate version of CyberPatriot, as well as getting a group of students together to hopefully be able to do CTFs and just overall expand our knowledge of the InfoSec field.

Outside of InfoSec, I enjoy playing guitar, and playing CS:GO.

Relevant Skills: Computer Science student, Python, C/C++, Java (learning), HTML/CSS, Cisco router/switch configuration, PC Pro certification (similar to A+, it was a free test voucher I got from school), I am big into penetration testing where I spend a lot of my time practicing using VMs from VulnHub.com, I've interned at a DoD contractor doing software engineering mainly using BASH/Python, currently in the process of getting my Linux+ cert (passed the first test, just need to buy a voucher for the second), and I would like to work for my OSCP cert when I have the money.

Past experience (provide links where possible):

<http://github.com/cquick97/>
<http://blog.zer0w1re.net/>

Those links are pretty much the proof I have regarding things that I have done. (I can also provide proof of ownership of those links, if required)

I am also the CIO of NzenMods (<http://nzenmods.com/>) where I run the servers (web and mail, running on a Linux VPS) and overlook the software development.

I've contributed a few lines of code to the Offensive Security NetHunter project. Nothing special, but OffSec is a pretty big name in the InfoSec field. I am also almost always on IRC with the guys from OffSec and VulnHub, so I have good communication with professionals in the InfoSec industry.

I am also working with some IRL friends to start up a HackerSpace in my local community. We have already been given the opportunity to write CTF challenges for Shmoocon in Jan.

I can also privately give you my Linkedin, where I list a ton of my real work experience.

Contact methods (feel free to send in private): Mainly HF PM, but I can also be contacted via email at connor@zer0w1re.net (PGP public key is located here, if you wish: <https://keybase.io/zer0w1re>) I have Skype, however I prefer not to use it, but I could if required.

Closing remarks: I'm extremely excited for the opportunity to work with some knowledgeable people on the forum. Please feel free to contact me with any questions what so ever about my application, or just about anything in general.

Thank you!

Avunit? - September 15, 2015, 7:50 pm

XMPP: regexks_@lsd-25.ru

Tom Jones - September 18, 2015, 1:35 am

Code Promise of summer

Falls in ambush; a late frost

Blossoms on the wind

- Matthew K Williams

Name: Tom Jones

About you:

I was born in Romania, moved to the USA when I was 11, and then to the UK when I was 24. I

currently work as a Cyber security analyst at GCHQ (feel free to PM me for proof of employment) at a graduate level and I expect to move on as a fully fledged CSA within the next 2 months (assuming all goes well). I enjoy crosswords/sudoku's and browsing stack overflow in my spare time.

Relevant Skills:

In my day to day life I work with a team which perform security audits, threat assessments and aid companies in both fixing and preventing network security issues. I currently hold an up to date CISSP and CEH certification.

Past experience (provide links where possible) :

3 Years as an I.T technician, 4 years as a network administrator and a further 2 1/2 years as a CSA. (I can provide references if necessary).

Contact methods (feel free to send in private):

Private message only.

Additional Notes:

I haven't been part of this community for very long, and so I doubt that this application will be accepted. Even so, I thought it best to try through my name in the pool of possible candidates.

Impulses - September 18, 2015, 5:16 pm

Code Fallen sick on a journey,

In dreams I run wildly

Over a withered moor.

Name: Daemon - Impulses

About you: I consider myself to be a Computer Enthusiast, if that's how it should be labeled. I've been coding and doing security work (would've used the word "hacking", but it seems to be laughed at on this forum) since I was about 8 or so years old. I like teaching others, and watching them grow to the potential that they have within themselves. In my spare time, I enjoy writing code, working freelance jobs or playing chess at a IM/GM level. I ended up skipping two grades in high school (am now a senior), and I've privately tested to have a 173 IQ. If you have any other personal questions about me, I don't mind answering them, just shoot me a private-message.

Relevant Skills: Programming in Java, C+, C++, VB.NET; Scripting in: Python, Ruby, HTML/CSS; I also have skills in Cryptography and Networking.

Past experience (provide links where possible): Due to all my work under a different alias (that I don't want released), I won't be able to provide any work, but I mean, you can give me a mini-quiz to show that I do mean what I say.

Contact methods (feel free to send in private): You can contact me via PMs, Skype (PM for) or AIM (PM for).

Taylor Swift? - September 18, 2015, 5:21 pm

Opps thanks man for pointing out my mistake.

Puppeteer - September 21, 2015, 12:38 am

Wait! Did you see my haiku?

Name
Rom

About you

I'm European and not proud of it. I'm a philosophical, calm and steady person; I tend to think a lot and I meditate too much.. yeah I just use my brain too much.

I'm one of those rare people you could trust to death, no matter what. I strongly believe in human relations.

I'm actually just a weird mind, nothing "normal" you'll find in me. I'm just myself and you look for someone thinking the common way then just go on, I'm not that person. I know I'm hard to understand most of the times but once you manage to understand me, you won't ever leave me.

Relevant Skills

Thanks (or not) to my way of thinking, I'm just good with people.

I can read a person at first sight and I never found myself wrong in this. Everything.. the way you move, your eyes, your hands, everything is read-able. And I'm way too good on this. I can find your weakest points and use them to my advantage. I can make you fall in love with me, I can make you hate me.. It's easy to me, human manipulation.

One more thing could be the way I think. My brain doesn't work the usual way. I tend to think too much and that is good for big problems but maybe too bad on little things. I won't do something without thinking so yeah, I'm not that kind of person that immediately dive in! My mistakes are certainly limited because of this, problems solving is my bread. Nothing is impossible. If there are any obstacles

we can pass them, be positive about it.

Eventually, my experience (mostly real life exp) can apply to the online field as it involves social interactions.

Always been good with computers and technology, it is my passion.
I'm currently learning to code some python and I just love everything related to the web.

Past experience (provide links where possible):

As stated above, my experience is pretty much in real life.

"Money management, investments, organization, personnel interactions, analysis" - these are my fields.

I've been a member of the old Legion group, left because I had a big deal irl I couldn't refuse.

I've also helped out some people with macs, pcs and setting up a a busin.. (ouch, I should not write that)

Contact methods (feel free to send in private):

I don't use anything like voip, chats or what so ever.

I just use the messaging system of the forum, nothing else.

To have private contacts you must be like a brother to me.

Well yeah, this doesn't fully cover everything but feel free to ask if you want to ask something

The Illusionist - September 21, 2015, 12:53 am

Name: [The Illusionist](#)

About you: My "IRL" is Tim. I'm from The Netherlands and I'm currently doing all kinds of researches for companies. As for now I'm doing general research for a Green Energy supplier.

Relevant Skills:

So for computer aspects I would say for HackForums standards I have general knowledge. But I don't want to join Null for that reason. The skill I think is most relevant here is that I'm educated to do all kinds of research. I would like to use this skill for Null. For example I could research a Null product in Development I could do a market research and run a customer survey. I think I could be a good aspect to this group using my skill to improve the product Nulls wants to make even before they hit the market.

Past experience (provide links where possible) :

I've worked at a few company's and I've done multiple big researches. I also did work for multi-million projects and my work there had a big positive impact on the way how the project was run and how it ended.

Contact methods (feel free to send in private):

I'll PM you my contact methods.

Tea. - September 21, 2015, 6:58 pm

Haiku

Name: Tea.

About you: In school currently. Born and raised in Canada. I like to study what I call theoretical computer science. Things that may be possible in the future or are possible now but not properly implemented now. Its hard to explain what I like to study but If we chat for five minutes you can get a better feel for my meaning.

Relevant Skills: Programming in C/python primarily but also enough php to create exploits and small PoC websites. I typically like to study a computer science idea and write software that implements the idea. Whether it be writing exploits or protecting from exploits. I am especially skilled in Linux Kernel Module Programming. You tell me what features you want for your rootkit and I will

write it. I am also well versed in UEFI programming for programming beyond ring0. Aside from that, I am also pretty knowledgeable in crypto and currencies. Generally I am well versed in linux and linux based toolchains like QTframework and gdb, and the internals of a compiler. Recently I started writing an Operating System built solely for the intentions of stealing memory from a computer in a cold boot attack. I am just generally knowledgeable I would really appreciate if you would give me five minutes on freenode or likewise.

Past experience (provide links where possible) : PM for information. Links will be provided

Contact methods (feel free to send in private): Private

Omicr0n - September 22, 2015, 6:42 pm

Name: Omicron

About you: I am a IT and CS graduate. I do Server and Network configurations. I manage network with cisco devices and firewalls. I am working in a company for almost 2 years. Focuses on network securities

Relevant Skills: hacking using basic methods and third party programs. Average knowledge in databases and dot net framework programming.

Contact methods (feel free to send in private): PM me

whyso - September 24, 2015, 2:44 am

Whyso to Null

Name:

Whyso

About you:

Hi my name is whyso and im 19 years old, enthusiastic and self motivated graphics designer. spend most of the time on HF or doing Graphics Projects.

computer science and information technology graduate. but graphics designing is Self thought. youtube haha :P

Relevant Skills:

Graphics Designing.

Motion Graphics.

Marketing.

Computer skill and netconfig

Past experience (provide links where possible) :

Graphics Threads on HF:

[WhySo GFX - Your name on a Hot Girls body.!!!! I L33T & UB3R](#)

PS: This is the only thread i have on GFX but i have done many Free GFX in Free GFX request section, you can see that in my post count and Rep.

Graphics Works/ Portfolio:

Contact methods (feel free to send in private):

Skype: whyso.hf

Stixio - September 24, 2015, 11:28 am

Name: RainObeyyy / Jack

About you: I'm a 17 years old boi from Norway, I am known around on hf by selling skins! I have knowledge in Crpytography & Ratting (Remote Administrator Tool)

Relevant Skills: Rat / CS GO Spreading / Crypting

Contact methods: Dealing and talking through PM, I'm also available to use Skype, but would not like to share it here! :D

- RainObeyyy / Jack

D?ath - September 24, 2015, 2:00 pm

Name: Death

About you: I am a 22 year old technology enthusiast. I can teach people how to hack a 360, cheat in video games through coding, change LED lights in controllers. I do hardware and software modding. I enjoy doing those things because it's fun, it's new, and you learn something all the time.

Relevant Skills: Microsoft Console Hacking; I hack the nands of consoles and use them to gain access to run unsigned code, it gives me the ability to do things online that other players have no chance of achieving.

Past experience (provide links where possible) : I know basic online hacking methods which I hope to learn from other people. I like to hack games though. That is where my passion lies.

Contact methods (feel free to send in private): PM ONSITE ONLY

Walt Disney™ - September 24, 2015, 2:02 pm

Good luck to applicants.

I'd apply but I'm mostly just in SEO and Marketing.

Bos™ - September 24, 2015, 2:04 pm

Name: Bos

About you: I am Bos

Relevant Skills: botnet, DoS, RAT, ewhore, DOX, booter, ebook, keylogger, stealer, amp, putty, business, kali, backtrack, crypting, spreading, SentryMBA, cracking, deface, stresser, resolver, marketing, SST, VB.NET, SE, proxy lists, configs

Past experience (provide links where possible) : www.links1.com; www.links2.com

nginlzz - September 24, 2015, 9:09 pm

Name:

nginlzz

About you:

Sr. Systems Engineer for a Cloud Printing company in the US that serves higher education institutions. Customers include UCLA, Texas Tech, University of Arizona, George Washington University, and many many others. I am a US citizen residing in the southeast. 35yo with a B.S. in Computer Science with a minor in Optimizational Mathematics

Relevant Skills:

Networking - Cisco switches and routers, ASA, pfSense, vLANs and routing, many other protocols such as SNMP, SMTP, TLS, in-depth knowledge of TCP/UDP protocols, ssh, and much more;

Programming - BASH, Python, PHP, Ruby, Powershell and vbScript, some c# (but work mostly within Linux systems so don't do a lot of MS programming)

Compliance - PCI and HIPAA

Security - TLS, firewall with ASA and pfSense as well as Security Groups within AWS cloud.

Cryptography and Encryption with RSA and SHA1 and SHA256, TLS as well as some custom written encryption algorithms. IDS / IPS utilizing mostly Snort. Network scanning with nmap, OpenVAS, and Nessus. Much more...

DevOps / Continuous Integration - Chef and Jenkins

Version Control - SVN and GIT

Other Technologies - CentOS 6/7, Exchange 2007/2010/2013, Active Directory, OpenLDAP, Shibboleth SSO, Zabbix and Nagios, MySQL, ESX 4.1 / ESXi 5.x, OpenVPN, Tor

Past experience (provide links where possible) :

Systems Engineer, Compliance Officer, IT Security -- removed , removed , removed , removed

Contact methods (feel free to send in private):

Will PM

Avunit? - September 27, 2015, 11:25 am

Finally got Internet in my new place so I'll start going through these again. Thanks guys.

SIM-2434055 - September 27, 2015, 11:31 am

Name: ZigiDev

About you: I am a self taught programmer for over 1/2 Years and I recently started up a reverse proxy service to protect against Distributed Denial of Service attacks for Websites and also started up a web hosting company.

Relevant Skills:

Programming - PHP, Java and C# (And couple others)

Past experience (provide links where possible) :

Hosting Service - <https://www.paradoxservers.com>

Reverse Proxy Service - <https://www.psychoproxy.com>

Contact methods (feel free to send in private):

Skype name - ZigiDev

Email - me@zigi.io

Sorry for the sort application but If you have any questions about me. Feel free to PM me or use the specified contact methods above ^

?A?O - September 27, 2015, 12:54 pm

People really need to put some real effort into applications. Most of these are far below par.

Thornzzz - September 27, 2015, 2:36 pm

An island song

Like a floating river

Rain Rain Fall Fall

Name: Thornzzz (Will)

About you: I'm 17, I live in the U.S, I currently attend highschool. I've been on HF for two years, I'm currently a Writer for the Wiki Team. I originally joined HF to mingle with other people who have the same interest as me. I've done Java coding before and taken a summer college course over it, but I don't feel confident enough in it to list it as a skill of mine. I'm studying to become an English teacher in foreign countries such as France and South Korea. I'm overall a relaxed hive minded member. I know most of the members in Null already, so I don't think I would have a problem fitting in. I mainly post in group discussions and group SF's. The part of the application that caught my eye is the "we are also looking for people that can join us to participate in intellectually-challenging" part, I feel like this could really interest me.

Relevant Skills: Excellent grammar, great problem-solving skills and I'm a great brainstormer.

Past experience (provide links where possible) : My grammar can be found in my work for the Wiki team and News Team which can be found in this threads - For the rest, I can't really show any examples to you, but I can always be offered a test to prove to you my skill.

[HF News // Edition 238](#)

[HF News // Edition 237](#)

[HF News // Edition 239](#)

Contact methods (feel free to send in private): I currently have Skype, Teamspeak and Raidcall. Which I can give to you in private.

Balding - September 27, 2015, 2:37 pm

(Sep 27, 2015 12:54 PM)zer0 ? Wrote: [\[CITE\]](#) People really need to put some real effort into applications. Most of these are far below par.

I'm not what the group is looking for so.

:D

Hinch - September 27, 2015, 3:22 pm

Hmmm seems like a nice recruitment thing not many applicants though :(

NoMercy - September 27, 2015, 7:11 pm

I wake, reluctant;

Too cold to get out of bed

but I need to pee.

Name: NoMercy or Mercy

About you:

I'm self taught computer enthusiast that has limited skills but wishes to learn. I don't want to learn bullshit stuff or use tools on the marketplace because 99% of them are useless. I want to learn proper hacking, not how to use a tool like a skid. I have self taught myself cross site scripting to a decent level and understand how it works and I have recently started learning python so that I can create tools for my own personal use. If you are looking for some wonder hacker that can take down the NSA with a laptop and a USB I am not the man but if you are looking for a hard working, passionate enthusiast then you have found what you are looking for.

Relevant Skills: Very Basic Python knowledge, I've done coaching in the past so If you would want me to teach in the future I would be above par, XSS

Past experience:

Close to non.

Contact methods (feel free to send in private): TOX, Skype or HF message.

G?Nj? - September 27, 2015, 8:16 pm

Name:Pestilent

About you:Im pestilent 23 been doing networking for 2 years now friendly

Relevant Skills:GFX / Writting

Past experience (provide links where possible) :pm

Contact methods (feel free to send in private):pm

Datageni - September 28, 2015, 6:30 am

Name:

Psykotikum

About you:

As I always seem to have free time, I feel that I am able to contribute more to the community, rather than just browsing around and helping where I am able to. Therefore I would be more than pleased to be a part of Null. But let me begin with an introduction about myself.

I'm an eighteen year old boy from Norway. I am studying application developer, pretty much just creating, coding and designing websites. I am currently studying HTML, PHP, CSS and in my next school year I will be studying Java - and much more. I've spent most of my spare time browsing the forums and programming websites. Of course, I do have a job besides it. Luckily my job is not taking much time and I can continue my daily routine. I think this is one of the main reasons of why I am useful and a good addition in Null.

My good skills and properties are that I am polite to everybody. Luckily I am never angry, not to anyone. Most of the time, I just laugh at the situation and step aside from it. I am also willing to help where I can help, such as guiding new community members, give them some information, tips and so on.

Another good quality of mine is my ability to remain impartial when decision making, when I take up a role, I take pride in making choices I believe to be right and that are by the book, I have an attention to detail and want what's best for the group. I have a passion for programming and creating projects and feel I'm an approachable person when it comes to asking for help. I would say I'm consistent in my ability to perform in a group position and more involved in leading by a good example in terms of rules, good forum etiquette and being somebody who is friendly and approachable.

I believe that I am dedicated yet not ignorant. For example, if someone feels a certain way about a situation, I'll allow them to explain whatever they're thinking and value their opinion. Though I am stable with my own beliefs, I'm extremely open-minded--a branch off of tolerance which is always a good thing for a member of Null to have. As far as the dedication goes, it even expands out to tasks. If someone tells me to do something or even asks politely, I can do it without a problem and stick to that task until it's complete to one's satisfaction. This may sound nerdy, but I love to help out and do everything or anything I can. I believe that I'm extremely professional. I try to keep a calm and cool persona active at all times and I avoid most if not all arguments on the Internet. From the times I've been involved in an argument, I've managed to either push it aside or just let the other person dwell with whatever gratification they get from "winning" said argument. If I know I'm right about something, I trust myself, and I don't let that interfere with my professionalism.

I am, in my own eyes, a responsible person. I accept the punishment for my reprehensible actions and I will face it if I made a wrong move. This is something not everybody does. Further into that again, I will accomplish whatever I have to achieve, especially if I have started doing it. I do not mind to spend some extra time on getting it accomplished, as long as I get it finished. My most defined personality trait is probably my hyperactivity as far as verbal interactions go. On Skype calls or in Teamspeak, I tend to loosen up around people I'm comfortable with; I laugh, I tell jokes, I talk loud and fast and I ultimately sacrifice a bit of professionalism in order to have a good time. It's something I'm toning down but it's still present. You can say that I am a fairly hard worker.

Relevant Skills:

I mostly do web development. I'm a fond user of PHP and use mainly the one backend language, although I have a broad range of knowledge in the web development and design sector; also having limited experience in VBA, C#, C++, and Obj. C. I currently play around with VBA during school, although I'm sure I could get the knack of it. I have experience with Java when it comes to structure and using it - I mainly working with the Bukkit API - however I haven't used Java for any standalone application as such before except from a multi-threaded IRC bot. During the next two years, I will be taking a CS course via the school. The CS course utilizes Python - in which I will learn in a month or two. I also have experience in MySQL, jQuery - not vanilla javascript, although it's not that difficult, HTML and CSS for design and the other languages I noted above.

Past experience (provide links where possible) :

It's highly unlikely that there's any past work that's public that you will find. I usually do private

backend work although I do have public work - simple 'less-than-whitehat' work which I won't link. You can feel free to dig through my threads to find some examples of PHP development and tutorials.

My first project was an email bomber in Python, I made the GUI with wxPython. It's pretty bad in all directions but I learned a lot just because it was the first actual thing I made. I also made two IRC bots, the first utilized mostly the standard Python library. I made an improved version using the Twisted framework, which made the whole thing much more robust but we didn't get to use it much as the channel where I was in slowly died down.

Since then, I made quite a few private and public projects. A shoutcast/icecast channel streamer for the CLI using Gstreamer, worked on a little C project called smsh by a friend, which could be used to control your PC through texts, provided it has an internet connection. I'm also a MEAN stack developer and a Meteor enthusiast, and have worked on plenty of projects for a few startups.

My most recent work includes a set of patches for Mozilla Firefox, which makes it possible for Mozilla's xpcshell test harness to work with tests that do not have any boilerplate setups. These patches (4 in total) have now been merged into the mainline source tree and should be available in the stable 40 release. You can check the patches and reviews on them [here](#).

I'm currently working on a mini bare-bones Linux-distro for the Rpi and Beaglebone Black. It is derived from the (rather dated) CLFS book. As of now, I'm sorting out issues with getting musl working with GCC 4.9.2 and trying to integrate the clisp shell. The current static build is 38MB in size on the disk. Unfortunately, this is how it looks so far. Image: <https://i.imgur.com/anvz3om.jpg>

It's mostly a learning project, so once the linker issues are corrected, I plan on releasing all the build instructions and scripts by November, and hopefully document it as well, so anyone else working on similar projects can have a reference. Other than that, I'm trying to write my own simple LOLCODE implementation in Haskell, inspired by Write Yourself A Scheme in 48 Hours. But, I suppose that will have to wait for quite a bit before it hits my public repo.

Contact methods (feel free to send in private):

I mostly use Skype and Teamspeak for general communication. I can provide my Skype ID upon request.

ProbablyGray - September 29, 2015, 11:57 am

Haiku's are pointless

But I want into this group

So, here it is, lads.

Name: Gray / Graywolf

About you: 20 y/o university student. Majoring in Computer Science and a language. I like long walks on the web and long nights coding. If you need it written in C, C++, or Java I got you. I don't do web, so don't ask, but I'm willing to learn other languages. I'm pretty chill and easy to get along with.

Relevant Skills: Extensive knowledge in C/C++ and Java, networking experience, network offensive and defensive operations experience, good people skills, and a deep knowledge of OS intricacies.

Past experience (provide links where possible) : No applicable experience that can be linked here.

Contact methods (feel free to send in private): Skype (PM for the username) or EMail @

mgedwar1@go.olemiss.edu

Matt Bomer™ - September 29, 2015, 12:07 pm

Off-topic - 90% of the applicants dint even bothered reading the whole application thread.

Don't be so haiku!

Good luck getting the right man for the right job.

SavageAF - September 29, 2015, 12:07 pm

In the moonlight,

The color and scent of the wisteria

Seems far away.

Name: SavageAF (I go by more aliases but I won't disclose them atm)

About you: I'm 16 and from the UK, i'm pretty new to hackforums, and I found it through another forum where people ripped on it, even though that forum is pretty shitty in itself. Anyway I'm currently at college so don't have loads of spare time, but weekends I have nothing to do, at college I study double maths, economics and psychology. I don't expect to be immediatly accepted into a HF group because of how new I am, but it's worth a try.

Relevant Skills: Don't really have much of these since i'm basically a student, I'm great at maths and economics, psychology kinda good at, kinda took it as an easier option. I don't know anything about hacking or coding, although I do know a little about cracking with things like sentry mba, although i'm not really good at it :/ I usually get most help from friends from another forum where I really helped out a lot and had over 130 rep and 7k posts, but stuff happened so I don't go on there anymore.

Past experience (provide links where possible) : Not really sure what to put here since I don't have past experiences of much, but if you need anything like my contributions on another forum (although idk why you would want that) i'll link via private message

Contact methods (feel free to send in private): I'll private message if you need anything like my skype, that's about my only contact method other than HF.

Coulson - September 29, 2015, 1:09 pm

Name: Beerus'

About you: I'm a 19 guy , interested to learn more about web coding , interested in sports and to work with a HQ team and learn from them.

Relevant Skills: html/css/php and money making

Past experience (provide links where possible) : -

Contact methods (feel free to send in private): skype imthelaw47

zeroxi - September 29, 2015, 1:12 pm

Name: LORD MASTER KING

About you: I'm just a poster on forum's I don't really do a lot of other than just making new friends online and I'm a chill guy and also I like meeting new people on forums and maybe be friends for a long time

Relevant Skills: Making Friends, Money Making, Gaming

Past experience (provide links where possible) :

Don't have a link for those but ya I can tell you that I really do make friends, money and skilled at gaming

Contact methods (feel free to send in private):

skype: d.4.n.k

This is a really good application. You'll probably be invited. Well done!

bebonzy09 - September 29, 2015, 5:54 pm

I was going to apply but I deleted it (along with my dank haiku) after I read that the guy above me is basically a prodigy

Roger Waters - September 29, 2015, 6:21 pm

(Sep 27, 2015 12:54 PM)zer0 ? Wrote: [\[CITE\]](#) People really need to put some real effort into applications. Most of these are far below par.

The comment about having your application below 250 characters doesn't help that any. 250

characters is nothing for an application and that kinda deters people away from writing a lot on their application.

crazyycast13 - September 29, 2015, 10:25 pm

So should I just reapply to this group then since I didn't get a response?

-zERaIT - September 30, 2015, 12:34 am

goodluck to everyone applying. when applying please don't forget to read the following;

(Sep 10, 2015 03:42 PM)Avunit? Wrote: [\[CITE\]](#) We are primarily looking for teachers specialized in the security aspects of modern technology, computer science and all round technical skillsets including Cryptography and Networking however if you think you have a worthwhile skill there is no harm in applying

If your application happens to include any of these words feel free to delete it after posting:

botnet, DoS, RAT, ewhore, DOX, booter, ebook, keylogger, stealer, amp, putty, business, kali, backtrack, crypting, spreading, SentryMBA, cracking, deface, stresser, resolver, marketing, SST, VB.NET, SE, proxy lists, configs

(Sep 29, 2015 01:13 PM)Bald. Wrote: [\[CITE\]](#) This is a really good application. You'll probably be invited. Well done!

it's not on you to decide that, please get your post count up somewhere else.

(Sep 29, 2015 06:21 PM)Roger Waters Wrote: [\[CITE\]](#) The comment about having your application below 250 characters doesn't help that any. 250 characters is nothing for an application and that kinda deters people away from writing a lot on their application.

it doesn't but i've seen people apply with 5 to 7 line applications that make me cry faster then i'd do with unions in my nose.

Avunit? - September 30, 2015, 12:49 am

(Sep 29, 2015 06:21 PM)Roger Waters Wrote: [\[CITE\]](#) The comment about having your application below 250 characters doesn't help that any. 250 characters is nothing for an application and that kinda deters people away from writing a lot on their application.

Wait what?

nginlzz - September 30, 2015, 5:12 pm

(Sep 29, 2015 05:54 PM)red62 Wrote: [\[CITE\]](#) I was going to apply but I deleted it (along with my dank haiku) after I read that the guy above me is basically a prodigy

Dude...I too am an applicant. Don't let someone that has no say over the decisions discourage you from applying. You idolized this person a prodigy, as did [@Bald](#).

Don't let that hinder your application.

I have an extremely low post count, but only because I want to find something to be passionate about. You, on the other hand, have great rep and posts...at least apply if you are interested.

?A?O - September 30, 2015, 8:53 pm

(Sep 29, 2015 10:25 PM)crazyycast13 Wrote: [\[CITE\]](#) So should I just reapply to this group then since I didn't get a response?

No. I'm not the decision maker, but I know I'll be going over and looking at apps over the weekend of people I'd recommend to be added. So no, no one has been PM'd or talked to.

rrdein - September 30, 2015, 9:03 pm

Many kids on Hackforums,

but I am not one.
This is seven syllables.

Name: rrdein (Are we using real names here?)

-

About you: 30s, M, low-level tournament Chess player, video game dealer. Going back to school soon after many years of health problems to complete a programming degree. Spend much of spare time learning programming, with particular emphasis on web automation. Most other knowledge has been learned with a view toward (someday) being knowledgeable enough to create a media manipulation engine to control public opinion. My goals here are to learn, and I am always happy to work a bit or provide information where it is needed, within the bounds of my limited (but growing) skill set. I have a strong sense of justice and right/wrong, and I believe in personal freedoms and working toward a greater good. However, I also believe there is a battle going on for people's minds, and I wish to play a part in minimizing the damage (take that for what you will). I am looking for a group of programmers who are intersted in helping each other to achieve their goals, whether they have those goals in common or not.

-

Relevant Skills: Ruby, light JS/PHP/SQL (no jQuery yet). Experience with Mechanize and Selenium-Webdriver (Ruby), and Imacros (sometimes it's just the easiest) for web automation. Windows/Linux Administration Experience, minor bash scripts. Familiar with usage of PHP e-commerce platforms, website administration, Wordpress, etc. Old (as in, not 100% current) IT experience with several (long expired) certifications, including CCNA, MCP (never finished MCSE), and a couple others.

-

Past experience (provide links where possible): PM me if you want me and we can talk I'm uncomfortable advertising personal details openly.

-

Contact methods (feel free to send in private): PM me if you want me and we can talk. I'm uncomfortable advertising personal details openly.

I wish to add that I am new to the concept of groups on Hackforums, and it may be that this group is not the perfect fit for me. But, if you think there may be room for me in your group perhaps we can talk and I can find out more of what your group is about and how it works together. Thank you for your time.

I'm going to send over an emergency team to try and dislodge your head from up your ass. Not too hopeful though, I've never seen a case this bad.

Eggsy - October 6, 2015, 5:43 pm

Name: As posted.

About you: Intellectual. Think before I do type of person. Currently going to school to become a welder. Side hobby includes coding and computer science.

Relevant Skills: Always looking to help out another member in any way I can. Coding in HTML, CSS, Javascript, PHP. Currently learning python.

Past experience (provide links where possible) : N/A

Contact methods (feel free to send in private): PM as of late. Other methods perhaps if required.

A_P_T - October 6, 2015, 7:17 pm

An old silent pond...

A frog jumps into the pond,

splash! Silence again.

Name: Joe

About me: My expertise is information security. I work a full-time job doing information security for a large enterprise in North America. I lead the vulnerability management program in the SOC. Day to day operations include using Tripwire and checking for CVEs. Sometimes I do audits using Powershell scripts and what not. I'm a Certified Ethical Hacker. I have my Security +. I can talk to you about boring policy shit all day, but that's not what I want to do in my free time.

Cover letter: I have never applied to a group on Hack Forums before and am only doing to find people who are interested in learning about security from the attackers' point of view. How can one protect against a hacker if one does not understand how an attacker thinks? I'm looking to meet other people who are interested in how malware works like I am. FYI, my application to your group does not mean I will necessarily join. I have questions about what you all do and want to make sure you all aren't a bunch of immature teenagers. From the looks of the other applications, A LOT of people are 13 or 14 years-old.

Programming experience: so-so. I know a bit of this, a bit of that. I'm not a pro.

Contact method: Send me a message on here and I'll provide you an email address that I don't mind sharing with a stranger on HF.

Avunit? - October 6, 2015, 7:19 pm

vexius - October 11, 2015, 7:25 am

Hackforums is there,
in any of your blind minds,
im loving your group.

Name: vexius / Jan

About you: I am currently 19 years old and studying Computer Science with minor subjects Networking and Communication in Dortmund, Germany. As this is my first year as a student I may not be as experienced as other applicants, but I feel smart enough to play in the Top League after

gaining some practical experience. I started coding when I was 8 years old and coded my first Bluetooth-Chat Android App in Java. I continued with homepages for private use, my city, school and helped out big companies to succeed in the web. Example companies I worked for and sometimes still work for are Blizzard Entertainment and the SAP SE in Germany.

While I'm not coding or studying, I'm earning my income and some extra money by trading Forex (currencies and indices). As I searched something where I could work from wherever I want to, work as much as wanted and be able to take hours and days off whenever needed, I started to read books and "learn-by-doing". Since one year forex trading became my primary and only income. After all the trades I did, all situations which I had to face, I feel now comfortable enough to teach other people or to take my seat in a discussion regarding financial or economic belongings.

One more of my hobbies are psychological or deep discussions regarding anything. I love to help people, feel into them or just to talk about important or unimportant stuff which should be discussed. In kindly any topic I will be onboard as an active mind.

My personal goal is to finish my Bachelor and make myself independent with a company and the continuation of trading. Upon request I would send proofs of my income generated by it.

Relevant Skills: Coding(C++,C#,PHP,SQL,HTML,Java), High knowledge of operating systems (Windows,Linux,iOS) and mobile systems(Android,WinPhone), Money Management, Trading (Forex, Stocks, Indices), Instinctively active in discussions and interested in everything regarding the Internet, personal belongings or financial cases.

Contact methods (feel free to send in private): Skype: deutscher50, PM

Makan - October 11, 2015, 8:06 am

My name is Martin,
I like going out on weekends.
thanks for reading!

Name: Makan/Martin

About you: I am 17 years old, I have been doing graphics since I was like 14 (Damn, time flies). I live in Sweden and have a graphics shop here on HF. I love sharing some of my previous work with graphics newbies to teach them the basics i learned form people when I started with graphics. I like helping out people with graphics, not only "free work" but also with tutorials or explanations or even feedback. On my freetime i either study or I go to partys with friends, especially on the weekends. I took a break from HF for like 6 months, I had to get my life together, I was spending too much time on making money instead of doing homework or going out with friends. Now I have finally taken care of that and im ready to be more active on here. I also have a GTA Moneydrop service, I used to charge for it, but then I realised it,s funny money, I was making like 1\$-3\$ per customer, and I had like 2-3 customers a week. So I just started giving people free money on GTA whenever I was playing. Ohh, I also play games, FIFA, GTA, Battlefield etc.

Relevant Skills: Graphics: (PS, AI, AE, C4D)

Past experience (provide links where possible) : <http://martinjunior.minus.com/uploads> or <https://nerow.carbonmade.com/>

Contact methods (feel free to send in private): Sending in private.

TwoFeesh - October 11, 2015, 5:41 pm

Name: Cartman BRUH

About you: Hello, I am 20 years old. Currently I am going for my Networking+ certificate at a community college. I plan on pursuing a degree after I have entered the industry. I program on the side as well as play video games and just chill. I have learned a small portion of C# from a YouTube tutorial. Right now, I am planning on building a program that can convert strings into hashes. It isn't going very well, but I plan on improving my knowledge and expanding upon that project. My favorite video game at the moment is Rocket League. I recently downloaded the Star Wars: BattleFront Beta. Boy, can I say that they did an amazing job making it a unique game. Props to Disney for continuing that series. A network consists of two device that can communicate. The devices are generally called nodes but are called computers for slang. Networks can be divided into two different types: WAN and LAN. WAN is a network that is over a wide area(such as a business with multiple locations in different parts of the world). The other one is a LAN which is in a more confined area that is in the same geography. Here are some basic network devices: A server, a switch, a hub, a router and a bridge. A server is a device that hosts resources that other clients have access to such as file sharing, printing, and storage. A switch is a device that filters data based on a MAC address. It is more efficient than a hub because it recognizes MAC addresses as data is sent across the network. A hub is a central device on a network that connect nodes and allows them to communicate with each other. It does this by sending data to each device on the network and the devices decide whether to accept the data or decline it based on the information. A router is a node that devices to communicate with other devices outside their network. Last but not least, a bridge is a device that connects two or more networks together.

SIM-2015410 - October 13, 2015, 1:40 am

I read your full post

And want to apply for null

So have a haiku

Name: MeshCollider

About you: I am in my final year of high school but am also taking second year university computer science extramurally. I have achieved A+ in all 5 university papers I have taken, so I think it is fair to say I learn quickly and am quite intelligent.

Relevant Skills: I am a proficient programmer in multiple languages, my most proficient is Java but others include Haskell, C#, PHP (with html, mysql/pdo, css, etc. as is necessary), I am currently learning ASM (a mix of 8051, mips and x86 at the moment), and c++ (I know the basics but have recently realized that the more advanced topics need a lot of work).

I also have a large broad knowledge of computer security, but unfortunately I don't have much practical experience.

Past experience (provide links where possible) : Check out some of my coding tutorials for evidence of my abilities in that area.

Introduction to algorithm complexity: <https://hackforums.net/showthread.php?tid=4973526>

Mega android tutorial: <https://hackforums.net/showthread.php?tid=4974477>

Mega java tutorial: <https://hackforums.net/showthread.php?tid=4492575>

Lambdas in java: <https://hackforums.net/showthread.php?tid=4974488>

Haskell tutorial 1: <https://hackforums.net/showthread.php?tid=4973502>

2: <https://hackforums.net/showthread.php?tid=4973489>

3: <https://hackforums.net/showthread.php?tid=4973493>

I am a developer for Omnicoin, so you can also check out the OmnicoinJ, Android wallet and lightweight wallet I developed.

I have not sold any products on HF, but here is a simple file upload site I released for free: <https://hackforums.net/showthread.php?tid=4990495>

I have also been involved in the ACM programming contest - which I am sure you have heard of - and made it to the South Pacific regional finals this year.

I am a leader of Divine - which is a coding group, so that should show my ability to lead/help others/contribute. I also used to be in Null for a while, when it was led by TH :)

Contact methods (feel free to send in private): Skype (will send you if needed), HF PM

Thanks for reading my application. Feel free to test me if needed ?

The only real differences I've noticed from c and c++ is the amount of pointers you need and the differences with memory things. C isn't too bad, and since C++ can have c -code inside of it, you can slowly learn c by injecting it randomly. Instead of using cin, use scanf, and things like that. Probably over simplifying it by a little bit and breaking some conventions, but eh who cares.

If you want to make an application according to the format, go ahead.

Ang?I - October 14, 2015, 11:01 am

(Oct 13, 2015 05:11 AM)crazyycast13 Wrote: [\[CITE\]](#) Start with reversing an array using recursion only, idk why he gave you an intro to coding 101 assignment.

Wouldn't it be more efficient to use iteration? You would utilize less memory this way resulting in a faster program. I guess it kind of depends on the language you're coding in but in most cases doing the task iteratively would cause the program to run more quickly.

crazyycast13 - October 14, 2015, 11:24 am

(Oct 14, 2015 11:01 AM)Ang?I Wrote: [\[CITE\]](#) Wouldn't it be more efficient to use iteration? You would utilize less memory this way resulting in a faster program. No, the most efficient way would be having a different data structure and sorting using a mix of quicksort and mergesort. I was simply upping the gambit from the previous coding question asked.

EDIT: Oops I thought we were talking about sorting the data instead of reversing it. Regardless, this is a linked list, and recursion is the fastest way of reversing it.

Edit3: whoops yeah for an array data structure iterative is fastest at $O(n)$

To be fair, I just got out of a CSE test, and my brain isn't 100% functioning atm.

Ang?I - October 14, 2015, 11:57 am

(Oct 14, 2015 11:24 AM)crazyycast13 Wrote: [\[CITE\]](#) No, the most efficient way would be having a different data structure and sorting using a mix of quicksort and mergesort. I was simply upping the gambit from the previous coding question asked.

Edit3: whoops yeah for an array data structure iterative is fastest at $n/2+n\%2$

I think the only way to use recursion efficiently, in this case, would be to optimize with tail recursion which I believes runs at $O(n)$ if I'm not mistaken.

Side note, I would like to apply but have zero coding contributions on site. Would I have much of a chance vs. a person with a wall of contributions centered around the coding sections?

(Oct 14, 2015 11:24 AM)crazyycast13 Wrote: [\[CITE\]](#) To be fair, I just got out of a CSE test, and my brain isn't 100% functioning atm.

It's all good, I just took a Calc 2 exam so my brain is pretty much fried at this point, so I could be wrong too.

Most of the skids don't even know what a linked list is.

Regulus - October 15, 2015, 6:08 am

Why do you come on HF?:

The reason I come to Hackforums is because this is the only Forum I've ever been active on and also because I've met a lots of new Internet friends here.

I'm active every single day on Hackforums and love to read threads and help out people if they need ever would need my help haha.

Hackforums is like a part of my life, I come here to lurk and even when i'm feeling down i'm on HF and mostly see some threads that cheers me up immediately.

What more can I say. Hackforums will always be the #1 Forum for me and I'll forever stay active on here for sure. <3

Why do you want to join Null?:

I've seen some Null members around HF and I gotta be honest when I say most of you seems to be some very high quality and nice members that contributes a lot towards Hackforums.

And that's something I want to be a part of.

Make some new friends and try to contribute as much as I can and help other members etc.

Age: 21 Years Old

Country: Sweden

Some stuff about myself:

Well, I'm a 21 Years old guy from the beautiful country Sweden, also the country of the beautiful blonde girls.

I'm a very polite and nice member, and when I say nice and polite I mean nice to everyone, even to the people that hates me.

I like to send positive vibes instead of negatives because honestly, who likes to be negative all the time?

Music:

Some members on here also knows i'm a EDM producer and I don't feel like producing is like a hobby for me, it's my #1 passion and I live for it.

Music is something I'll always keep doing and love it no matter what.

In 2014 I achieved a nice goal and I gotta say i'm proud of it. I actually won one of Basshunters Remix Contests,

and i'm pretty sure not everyone knows who Basshunter is but just search for him on YouTube and i'm sure you'll recognize him. :)

Movies?:

I'm a guy that just loves to watch movies, and a lots of movies.

I mostly prefer the genre Comedy to be honest but I watch other genres as well, don't take me wrong hehe. I don't know if this means anything as I'm applying to Null, but I thought I'd bring it up anyways because I want you guys to know me more on who I am.

Here's some contributions and achievements threads I've made on HF:

This was my application to the group Null. Looking forward to be a part of you if you decide to let me in.

I'll be here knocking at the door and wait for your response.

Take care and keep being an awesome human being. :)

Ang?I - October 16, 2015, 6:45 pm

Program due Monday

I hate compiler errors

Fuck this assignment

Name: Angel.

About you: I'm a 4th year CS major with hopes of attending graduate school for data analytics.

Lately I've been putting a lot of effort into developing mobile applications. I enjoy not only coding, but

also the theory behind it.

Relevant Skills: Java, Python, C++, C#, ASM (from most fluent to least). I feel extremely comfortable with Java at this stage in my life.

Past experience (provide links where possible): For the past four years, I've worked as an intern for Duke Energy in their Nuclear Applications department. I run maintenance on key company applications and do a bunch of SQL related things for them. Hopefully next year, if the position is still open, I can make a department switch into their security team as that's what I'm currently interested in.

Contact methods (feel free to send in private): PM, Skype, TS (I actually prefer speaking rather than typing).

Chers - October 17, 2015, 2:13 am

Name: Chers

About you: I am 16m from Norway love fotball.

Relevant Skills: Rating, Ewhoring, Blackhat

Past experience (provide links where possible) : None

Contact methods (feel free to send in private): xmpp,skype and hf pm

Gowther - October 17, 2015, 9:31 am

Name: Caspar

About you: i am 19 and studying networking / hardware / Graphic design. i'm a fun person to be around as many of said. Age of 17 i started working at nationwide as an intern and i have continued the nationwide intern ship still to this day.

Relevant Skills: Graphic designs, little bit of coding, stresser,monetizing, marketing, making videos.

Past experience (provide links where possible) : listed above

Contact methods (feel free to send in private): PM me if this meets the requirement.

Avunit? - October 19, 2015, 8:44 pm

(Oct 17, 2015 09:31 AM)DreamSlayer Wrote: [\[CITE\]](#) Name: Caspar

Not what we're looking for, thanks for taking the time to apply.

Looking for a few more applicants!

Tyranus. - October 19, 2015, 9:43 pm

I'll think about applying, not sure if now's is the right time for me. Btw, divine members should get a discount on your program ;)

Devil Dog - October 19, 2015, 10:03 pm

Why do you come on HF?:

The reason that I visit HF on a daily basis is for the knowledge. I've learned so much over the past years just browsing this site. I come on here to teach what I can as well. I have lately been creating graphics for users in the free graphics request section and it makes me happy when members say they like my work. I like being a part of such a giant community where you can find people just like you.

Why do you want to join Null?:

I want to be a part of that group that I was looking for in HF. I want to have a real reason to come on here and post everyday. I want to be able to contribute and it just be more than just myself. I want support when I don't have it, and I want to give it when others need it. I just want to be an all around helpful member to the group and community on behalf of this group. I feel that I can achieve this if accepted.

Age: 19 years old

Country: USA

Some stuff about myself:

I am 19 years old currently living in the USA, more specifically Southern California. I am a U.S. Marine, I don't say that often actually. I am really chill and honest. I try to be mature and on top of everything all the time. I would also like to add that I have great leadership skills instilled in me. I consider myself to be a leader, teacher, mentor, etc.

Music:

My favorite type of music is real relaxing. Some of my really life friends say it's depressing, but in all reality for me it is the most chilled out music you can listen to. It calms me down, like nicotine for some. It is my go to relief from my long days.

Movies?:

My favorite types of movies would have to be horror movies. I just can't get enough of them. They're at an all time best when you have great company.

Here's some contributions and achievements threads I've made on HF:

My Instagram Bot

<https://hackforums.net/showthread.php?tid=5017953>

I have also made many contributions to members on the graphics section of this forum and helped out some in the coding section.

This concludes my application for the group Null. I am very much looking forward to being apart of this. I hope that this somewhat shines some light on myself as a member here. Thank you for reading!

Used the member Regulus' design for this btw.

Sounds like a bad idea to me.

Vintel - October 21, 2015, 2:24 pm

Name: My name online is Vintel. If my real name is important, dont read my application.

About you: I'm a HQ and legit guy from Sweden, Europe. I'm currently working on a project within IT security and programming.

I do not go to school and I got my own office where I spend most of my time in.

I'm usually a social guy but I also prefer silence and working alone.

Relevant Skills: I've been a .NET developer for about four years. Mainly in VB but also in C#. I am also familiar with PHP and CSS. I have a lot more skills that I can not discuss here at Hackforums.

Past experience (provide links where possible) : I'm a very new member of Hackforums so I don't have a lot of previous work to show as I'm here using a new identity (username) then on other sites and forums. However, if you send me a private message I'm sure I can show you something.

Contact methods (feel free to send in private): Sending you a private message with my contact details.

This is not a very long application but atleast it's an honest application. I never lie about my skills. I never lie about anything.

(Oct 21, 2015 01:35 PM)joe11112 Wrote: [\[CITE\]](#) Do you really think it's a good idea to say where you work on HF?

Sounds like a bad idea to me.

Don't really care tbh.

Okay, just wanted to check with you. ?

Dude why?? Lol - October 22, 2015, 10:29 pm

Name: S9479

About you: I am a person who is really interested in Computers and its Networking

Relevant Skills: Really Experienced in Linux and Cam setup anytype of server

Past experience (provide links where possible) :

<https://hackforums.net/showthread.php?tid=5016045>

Contact methods (feel free to send in private): Skype - steam9479

?A?O - October 23, 2015, 3:09 am

I feel like people aren't taking this very seriously with these last bunch of apps I've seen.

420 Blaze It - October 23, 2015, 3:24 am

Haiku!

Light of the moon

Moves west, flowers' shadows

Creep eastward.

Name:

420 Blaze It

About you:

Hello, to the recruiters for Null. I am 420 Blaze It, and I am a fellow member of HackForums. I have hosted many projects and services here on HF, including mentoring, market analyzing and currency exchanges. Feel free to ask me anything about my works.

Relevant Skills:

Proficiency in programming. Understanding of malware and crypters. Understanding of databases, operating systems, networks and virtualization software.

Past experience (provide links where possible) :

I am an official member for the White Hat Helper Team with -Hyperion for Brotherhood, but sadly I was banned before I was stated my position. You may ask him for proof if needed.

Contact methods (feel free to send in private):

PM me if needed.

SIM-2914245 - October 25, 2015, 1:30 pm

i see what kind of applications are going through here but i am a feather in comparison to them,

i would like to learn,
in the best way i know how,
just let me in please

skype: shaw511.hf

SIM-2902786 - October 26, 2015, 3:59 pm

Are you guys still doing the student program for \$300?

Please let me know, I can't find the thread.

Deez Nutz - October 26, 2015, 4:47 pm

I sent my application to you, brother.

Avunit? - October 27, 2015, 1:27 am

(Oct 26, 2015 03:59 PM)Elliott K. Fox Wrote: [\[CITE\]](#) Are you guys still doing the student program for \$300?

Please let me know, I can't find the thread.

I'll be reposting the thread today, had to rework it a little bit. Thank you for your interest.

b?xxy - October 29, 2015, 12:57 pm

Boxxy is beautiful.

This is boxxy's application you see?

Boxxy paid attention.

Before you read my application, I am not applying to being a teacher.

The skills I am able to teach, and feel comfortable teaching are listed as words not allowed to be used in the application, so keep that in mind before reading. Thanks.

Name: boxxy

About you: I am a computer networking and security enthusiast. Studying computer science, and studying to be a computer IT technician. I work with an affiliate marketing company now(Yes, I know you said not to say that word, but I'm not applying for that), managing adult traffic and so on. I love working on cars, sort of a Motorhead. Enjoy music, and sharing music. Hopefully building a new computer soon, that's always fun. Also, taking an advanced English class, hopefully on the path to get a degree and pursue something there.

Interested in: new programming languages, crypto currency, overclocking, learning more about cyber security and all fields whether ranging from whitehat to blackhat.

Relevant Skills: Basic Java(not to be confused with JavaScript), Marketing, Expert computer use, advanced hardware knowledge, moderate programmer. Intermediate Network knowledge.

Past experience (provide links where possible) : Worked with a computer company in the past, nothing too major. Mostly just fixed computers.

I've taken Computer Science I through AP Computer Science II in high school, managing an A.. I've completed Introduction to Programming, and am currently in Introduction to C.

Contact methods (feel free to send in private): PM. Can use XMPP.

Thanks for reading.

nginlzz - November 5, 2015, 11:42 am

[Avunit](#) / [zer0](#)

Is this round of recruitment complete? I was hoping to hear from you guys, considering, what I thought to be a great fit due to my background.

Maybe next time....

It would be really cool if you guys could give updates to people who actually worked on the application.

ShadowRi5ing - November 5, 2015, 5:34 pm

Name: ShadowRi5ing

About you: Former null member. Quit when null went to shit last time and came back. I was one of the few members allowed in both Null and Legion. I'm always up to hack something and learn something new. I'm always working on a new hack or researching security.

Relevant Skills: Web hacking is my strong point, but i have experience reverse engineering (ollydbg). When I say web hacking, I mean a lot more than SQLi and XSS. I have a SOA from Stanford in Cryptography. My primary programming language is Go.

Past experience (provide links where possible) : Working on a security cert from UMCP, a lot of black hat shit that I don't feel comfortable posting on a public thread.

Contact methods (feel free to send in private): Pm and i can give some more methods

If you need a teacher, i'd be glad to help out.

KiwiCat - November 14, 2015, 3:43 am

Name: Kiwi / Andreas

About you: I'm a freshman from Denmark. I love cat's alot.

Relevant Skills: I've been doing graphics design for 3 years. And i know alot bout cryptogtaphy (not fud crypters that hides malware, but how hashing algorithms, and ciphers, and so on works mathematically.)

Contact methods (feel free to send in private): PM.

Avunit? - November 17, 2015, 8:40 pm

Firing this up again, have some time to look through applications.

Balding - November 17, 2015, 8:42 pm

Do I have to reapply or can you just look at my other one?

b?xxy - November 17, 2015, 8:45 pm

(Nov 17, 2015 09:42 PM)Baldd Wrote: [\[CITE\]](#) Do I have to reapply or can you just look at my other one?

same.

I feel like I was one of the only ones to pay attention anyways

Balding - November 17, 2015, 8:48 pm

(Nov 17, 2015 09:45 PM)b?xxy Wrote: [\[CITE\]](#) same.

I feel like I was one of the only ones to pay attention anyways

Mine was really nice as well. I feel like they aren't even going through them. The group is so inactive.

Vegas - November 17, 2015, 9:16 pm

Boxxy writes like shit

Syllables are null to him

But he's like, mad cute

Name:

David

About you:

I am a full time student, currently studying Mobile Computer Science with an emphasis in Game Programming. I'm something of a party fiend but I also love long nights spent gaming with friends or browsing aimlessly when I have time away from homework. I very much enjoy my area of study and am super excited to see where my academic experience leads my occupational preference. I see you're looking for people to fill more of a 'teacher' role so I don't imagine I'm ideally what you're

looking to expand your group with. It's one of the only groups relevant to my life in some way though, so I figured it'd be more silly not to apply regardless. The application will always be here (:

Relevant Skills:

Moderate Cyber Security Practices, Fundamental Programming Understanding, Intimidatingly Sexy Voice.

Past experience:

My current scholarly experience doesn't stretch quite as far as the understanding I've gained over my life of using various computer archetypes, but will soon expand to some more in depth topics. My fundamental C and Java experience will soon be refined to a more focused mobile environment wherein I'll be able to explore my direct game development practices for Android and iPhone, among other venues.

Contact methods:

Happy to provide my Skype if you're at all interested.

sp3ctrum - November 20, 2015, 1:34 pm

Name: sp3ctrum

About Me:

Hello, my name is sp3ctrum. Just to keep it short and sweet, I'm really just a simple guy who has a love for technology and computer security. I started programming when I was 15 and just took it from there. One thing hasn't changed after all this time though, I'm still with my roots HF. I'm located in the United States of MERICA, currently working in an industrial plant managing industrial control systems. I have my bachelors in computer science and and two certificates (COMPTIA A+, Dell CSSA). Hopefully will be able to get more once I have the money and time!

Been busy since then, I do hope to get that program started as soon as I possibly can. As far as the applications go we still haven't finished looking through, they are looked over and then discussed by multiple members which is why it isn't a speedy process.

In fact, going to close this recruitment to allow us to look through the previous applications.
