PM me for business

Curious as to why you can get a cooldown for 30 minutes?

What? Can you please show me any proof of this "anti boosting system"? I have easily fragged 50+ kills in my boosting games and have never gotten a cooldown.

Viridescent - September 12, 2015, 8:11 pm

I can guarantee you don't get a "Anti-Boost Cooldown" and if you would like to post a screenshot of this I would love to see it.

I will if I come across it again, but like the other guy pointed out you also get them from 2 wins on an unranked account, which I got confused with. But I promise you this has happened before getting my friend out of nova.

Not sure what you're saying? Are you saying I'm not legit or are you just laughing at the fact I said I'm legit?

This system doesn't exist, it would be absolutely useless and have so many false positives.

Also, why would wins get reverted if you're legit?

By reverts I mean if you purchase MG1 and then you get deranked to nova 3, I will get you back to MG1.
