Thread: [Mouse freezes randomly](#)

Dickface - September 11, 2015, 4:32 pm

No idea why this happens

My curser will freeze at random points for a couple of seconds.

Keyboard will still work and all that

Could be a ton of reasons. Do any running processes freeze for same amount of time too?

Did you have any updates recently installed?

JuiceWater - September 13, 2015, 1:22 pm

Okay? Is your mouse wireless?

Nope.

A corrupted registry is most likely the issue.

If it helps find the problem. I hear the windows noise of a USB being unplugged and plugged back in whenever I load up CSGO and close it.

EDIT: Although now as i've unplugged my G930 usb and switched back to a non-usb headset. It works fine.

EDIT2: I said fine. Not really.

Does the mouse have a driver if it does reinstall it.

A driver for your mouse.Already have it installed.

archangel.dmitry - September 17, 2015, 6:35 am

Can you test the mouse with a different computer?
