zSerity - September 11, 2015, 5:58 pm

[img]http://i.ipixls.net/VM9z3Kh.png[/img]

A unification of sophisticated individuals who share a keen interest in cryptocurrency, currency exchanging, and helping the community of Hack Forums.

[img]http://i.ipixls.net/YtgkEcs.png[/img]

Rather than having a regular recruitment, this time around Crypto is looking not only for people who have a knowledge in cryptocurrency, but people who would like to gain a knowledge in cryptocurrency. We are looking for loyal members, and do not care about how much reputation you have, or how many other groups you're in. We're preferably looking for active and dedicated members who aren't in that many other groups. So, non-upgraded and L33T members who have yet to fit into a group, this is the recruitment for you!

FAQ

Q: Why Crypto?

A: Crypto is a group containing a plethora of experienced individuals who strive in the cryptocurrency and currency exchanging fields.

Not only will you feel like apart of the family, but you will be able to participate in group discussions, and further expand your crypto knowledge.

Q: What happens after I post my application?

A: We will review your application within 48 hours, and if we like what we see you will be sent an invite.

Please do not PM me to check your application, as I will be going through all of them.

Q: Can I get friends to vouch for me, or reserve posts?

A: Reserving your post for an application, or having your friend vouch for your application has little to no effect on my decision.

Q: Who can apply?

A: Anyone, however we are looking for people who have a knowledge in cryptocurrency, or want to gain a knowledge in cryptocurrency.

Q: Do you accept buy-ins?

A: No we do not, and I doubt we ever will.

If you have any other questions unrelated to your application, please let me know.

I have basic knowledge about Cryptocurrencies as well, and would love to continue to learn more about them.

[img]http://i.ipixls.net/YtgkEcs.png[/img]

About me: I first got into cryptocurrencies when I joined HF in 2013. That was waaay back when BTC was worth ~\$100. I always thought the concept of cryptocurrencies was interesting, however I never thought it would ever become extremely popular.. however it seems I was proven wrong once BTC surged to \$1k+ dollars per coin. When it hit it's peak, I decided to jump on the crypto train. I bought when it was at about \$800 per coin, then it all went downhill. It seems when other IRL companies started to accept BTC, BTC value went down the drain. Now it's hardly \$250 per coin. I have always been a supporter of Litecoin as well.

I recently got added to Crypto and I've got to say it's one heck of a group.

It's really the only niche group on Hack Forums.

For anyone trying to get in or thinking about applying, it's worth it.

Why yes I am good sir, I have been interested in getting into crypto currencies for a while now and didn't really know where to start, I just recently started accepting BitCoin on a few of my services and setting up a few wallets. I would like to get into crypto exchange and mining, while I know its not really worth it to mine with my equipment I would like to get a start into Omnicoin with it. Otherwise I will end this answer here before I start to rant.
