Thread: [Axiom - Official Recruitment Thread Phase 3](#)

Icy? ? - September 12, 2015, 1:24 pm

This is the third recruitment phase we are doing.

Axiom Userbar:

What is Axiom?:

We are trying a new method of recruitment.

Axiom is a re-brand of Instinct, which was a group dedicated towards the gaming community of Hack Forums. We enjoy getting together on Skype and Teamspeak; we also enjoy to play games with one another and to relax in the Sub-Forum together. Members have stated that Instinct, was one of the funnest groups to be a part of on Hack forums; with Axiom we wish to uphold that reputation.

Leaders:

[Icy](#)

[Red Sox](#)

Requirements

You must be an active member of Hack Forums.

Have an passion and interest for Gaming of any kind.

You must have activity in at least in one gaming related sub-forum.

You must be active within the Axiom sub-forum if you're accepted to the group.

If you have a Warning level, it will be taken into consideration by a leader with your application.

Application Form:

Take time on your application, rushing it will not help you in any way.

Your application will be heavily judged based on the answer of the final question.

The format that's provided doesn't necessarily be followed but you have to answer our questions provided, impress us.

We're accepting a limited amount of members, so make your application unique and one of a kind.

Applications are looked over by: Litecoin, ?Average, Red Sox and myself

This is just an example template but you may apply however way you like.

PLEASE DO NOT GIVE ME BULLSHIT LIKE:

I mostly play PC games, but if I get really bored, I'll play some COD on my Xbox

Most-Played Game(s):

Counter Strike GO is the game I play the most. I love playing it.

I play it with a lot of my friends we usually do a 5 team and have such a blast playing against people.

I'm MG1 just after winning my 10th ranked game which is pretty good if I do say so myself, I have some nice skins too that I won from betting.

Minecraft is another game I mostly play, I think it has a great community, but sometimes it can be really toxic. I have been playing it since it came out and have always loved playing it and could never stop for some reason. I have made so many great friends over this game and I'm forever grateful for it. I have known some of them for almost 5-6 years now, I have known them longer than some of my in real life friends. I'd consider myself very good at the game, I know it inside and out and its nice to play it.

Other Games I Play:

Nintendo (Never really play it)

Spoiler ([Click to View](#))

Mario Kart

Scribble Nauts

Why should we accept you?:

I'm an avid gamer, I'm a great communicator when playing any type of game. Whether it be making call outs or just listening, I feel I do it really well. I would consider myself a really good team leader, I always have smart ways of doing things, and try my best to lead my team to victory! I would love to join Axiom because I feel it is the perfect group for me. I think that I have a good humor sense and I'm friendly too. I love to be surrounded by other games where I can share my experience with them and help others improve if needs be. I seldom get mad in any game, but when I do it's probably for a valid reason like if someone is cheating. I hate people who cheat then say they don't but are very blatant. I plan to get to know people, play with them and maybe create a little group in CS:GO or something and just have a fun time. I have a good PC so running any game wont be a problem, I'm one of those people who doesn't stray from games, so hopefully with being accepted to this group, I may be introduced into new games which would be really nice.

Warning Level Explanation:

No warning level, hope to keep it that way.

Thanks for reading my application, I hope you take me into consideration

Gaming Aliases:
Anything from when I was a kid up until ~3 years ago, I used "lavameh" for everything. Nowadays, you'll find me as "Mr Whiskey" in most places.

Gaming Platforms:
PC. Ever since I got banned on Xbox because I used Modio on my profile, I've hated the Xbox.

Most-Played Game:
Garry's Mod. Spent a lot of time on a DarkRP server, became a Server Administrator on one of the top servers.
I quit Garry's Mod, and my time is split pretty evenly between League of Legends and CS:GO (though I do enjoy some modded Minecraft every now and then)

Experiences / About Me:
I've played tons of games since I started PC gaming. I was into flash games for a long time (wasn't allowed to download anything). Roblox was my first game I ever downloaded, which eventually led me into AdventureQuest (my first P2P nightmare), Maplestory, and Runescape. After my friend bought the premium membership on AQ, I just couldn't bear to play the game normally with all the restrictions, and actually "quit" a game for the first time after my parents refused to upgrade me. I eventually got into Steam, where I quickly wasted \$20 on Arma 2 (and OA ofc) because I watched videos about DayZ all the time, without realizing what kind of serious horsepower I needed to play a game like that. I got into Minecraft at this point and put several thousand hours (3-4 years of after-school playing, and nonstop summer playing, no exact counters, but likely 4k or more). I eventually got bored, and I saw "Garry's Mod" was on sale for two bucks. I had played most of my games at a friend's house, as my parents always used the computer at ours, and they had a very unrestricted and social house (Their dad divorced = fun 24/7). I got "my own" computer after my parents bought themselves a new one, and I got the old one they had before. Since I had played Garry's Mod on a more powerful computer over there (and my knowledge had nothing more than hard-drive space) I assumed my computer could handle it. It did good enough for me to enjoy the hell out of myself playing Single Player (I struggled to get Multi Player working, as every time I tried to join a server I randomly selected, it was always offline) and ended up buying my own computer after 8 months of saving, which was when I really started learning a lot and quickly about hardware and how to actually use my games. I put nearly two thousand hours into Garry's Mod, racking up the most posts on the forum (aside from the corrupt head admin. PM if you'd like info about it, I only recently quit and am still highly respected and de-throneable in postcount), and picked up League some time in there. Lots of learning later, here I am. An avid PC gamer exploring the world of options that opened up after getting a non-shit tier PC.

Why should we accept you?:

I'm an extremely active person both in-game and out of game. I'm very easy to get along with, and almost always reachable. I'm fairly decent at most games that I play, and extremely dedicated when I find one I like and make close friendships with people who play games with me.

Thanks for reading my application. My "About Me" section is a little out of whack with the timeline, but it was hard to find a decent place to add in picking up new games.

Warning level was given to like 15 of us for cypypasting a response to a thread.

Avid PC gamer. Spend most of my time off playing CSGO, or GW2. Tend to stick with offline games on the consoles. (Vinnie ruined my experience on christmas)

I have a modded Original Xbox with tons of games.

Most-Played Game(s):

CSGO

I stream CSGO on the daily. PM for stream link. Always trying to rank up. Started my main account with a silver 1 placement, and worked my way up to GN3. Hope to get higher in the future.

GW2

I watched GW2 footage when it was in beta. Thought it was awesome, but I was already playing WoW. Once it went F2P, I jumped on it quick. Currently loving the PVP and world features. hope to gain max on multiple toons.

Why should we accept you?:

I'm a daily gamer. always gaming and learning new things. Hope to get better in every game I play, and a community focused on gaming would be a great motivator in gaming. I stream every day, hope to get more viewers, but It's a ton of fun. I can help others learn about my old ass 90's games that are a ton of fun too! lmao. Honestly I would love new friends to talk to and have fun gaming with. It's all about fun unless your playing CSGO Competitive. that shit get's rough.

Why should we accept you?

I think that I would be a great addition to the group. I have been an active Professional and Casual Gamer since I was nine years-old. I have been staff on GameBattles, and on many different varying levels of skilled teams. I love games very much and I love to share my love of them with other people. I also love to help out in any way I can. Be it, helping you level, or just hanging out. I am looking for new people to game with and I think this would be a good step forward!

Thanks for taking your time reading my application. Here is my application I posted in phase 2 a few days ago

Most-Played Games:

Counter-Strike GO | DayZ | H1Z1 | Advanced Warfare |

My favorite game is Counter Strike followed by all the Call of Duties. I am an avid player on GameBattles and attend about 3-4 LANs a year.

Other Games:

I play loads of other games on steam/origin and my xbox one. I practice alot of call of duty advanced warfare because me and my team are attending MLG New Orleans in October to compete.

Why should you accept me?:

You should accept me because most of my day is spent playing games. I practice Advanced Warfare every day for hours in preparation for LANs like MLG and UMG Events. I have attended and competed at MLG Anaheim, UMG Orlando, UMG Philly, UMG DC, UMG Ontario, and next month is MLG New Orleans.

I would love to meet some HF users who also game, and i think i am a fun and friendly guy to play with.

My GB profile - http://profile.majorleaguegaming.com/Yeet_Yah/

Also, I advertise and sell hacks for CSGO and DayZ. THIS DOES NOT MEAN that i constantly hack in these games. I actually prefer playing without hacks most of the time.

Extras:

I am nothing but HQ, i represent a company(perfectaim.io) here on HF and i stay as HQ as possible. I will take this care into representing Axiom on the forums and off the forums.

I am able to represent Axiom while im playing games or at events. I hope you consider me to be apart of the group!

I've been playing video games since I can remember. A reason I would like to be accepted is, so I can meet some new people to play some games with, maybe help some others on games that they are having trouble with, or are stuck on one part. I am fairly active here on hf, so me being active in the sf won't be an issue. I am always down to game, so that's a good reason to be in the group.

To be completely honest, I don't like answer this type of question, seeing as how majority of members on hf, lie their asses off.

Reasons I Should Be Accepted:

I believe that I should be accepted because I play a lot of games. I will be active in the subforum and be happy to discuss anything with the members of the group. I believe that I would be a good addition to a Gaming group as I play games so frequently, and it is one of my favorite things to do. I find it really relaxing besides when I play competitive games, and I have been doing it for most of my life. I will also be willing to buy games to play with other members of the group! I would also like to

add that I do not have any warning levels, so yeah! Thank you for reading my application!

Most-Played Game:

Counter-Strike : Global Offensive ? 600 Hours / PC /

Although it's not my most hourly played game. I've been most active recently on it!

Games I frequently play:

Call of Duty 4: Modern Warfare ? 800+ Hours / Xbox & PC Combined /

Call of Duty: World at War ? 1000+ Hours / Xbox & PC Combined /

Garry's Mod ? 1105 Hours / PC /

Rust ? 140 Hours / PC /

Minecraft ? Playing since 1.3 Beta / PC & Android & Xbox 360 /

Runescape ? 2007 - 2012 / 2014 - 2015 / PC & Android & Xbox 360 /

Why should we accept you?:

Quick backstory-- Since 9 I've been playing games. I started in 2007 with the old and still played MMORPG - Runescape. I continued to find more games that interested me over time.

I got really into the Call of Duty scene but have recently drifted away and started my Counter Strike scene.

Basically, I have mass knowledge on many types of games from Role-Playing games, to Sandbox games, to even First Person Shooters. I would love to share this knowledge, and enjoy my time with other users in Axiom.

It is important to be calm and relaxed when playing. It creates the best atmosphere and will ensure friendly motivations between everyone. I can bring that to the table and make sure everyone is having a fun time filled with laughter and especially most of all a great time.

I'm active in the Minecraft section from time to time but especially the Counter-Strike section.

Experiences / About Me:

About me, well. I play PC games most days. For about 6-7 hours. I am online on HF all the time and on steam too. I love playing video games, it is one of my most time consuming hobbies, but still I enjoy it. One of my most played games as I mentioned above is MaB Warband. I have come up to nearly 600 hours on this fantastic game. My second most played game is Dayz Standalone. Although extremely buggy and just general lack of content I have been with the game for over a year now. And I hope you can see something in this. That I dont give up on things easily. I also have become testing a Indie Game called Samphi, one of my best friends owns the game and I would recommend you all to check it out. I am at my computer most of the time and as I said before am online all the time so contacting me isn't hard.

Why should we accept you?:

I am an extremely active person on HF and Steam. My passion for gaming makes me different from other gamers. I can bring laughs and also serious gaming to your group.

Warning Level Explanation:

I dont have a warning level and will make it that it stays that way.

Why should we accept you?:

I think I first started playing video games online with other players was when Socom was online for PS2. Ever since then i've been really big on playing games with other people and having a large amount of communication. I've always felt like I was a multiplayer kind of guy, if a game doesn't involve others I usually don't play it (except the fallout series, its heavenly). I play all kinds of games, willing to try anything someone throws at me, and love to learn everything about them. CSGO and Socom really taught me how to communicate with everyone and get really close with others, always talking, making great friends to last years. I'm still friends with many of the people I met from Socom, and when I first started playing the counter strike series. I don't think I would be able to offer anymore to this group then they'd be able to offer me. Helps me to make more friends to play with, have a community of other people that enjoy the same things I do, and share secrets and how-to's on games.

Why should I be accepted?

Gaming has always been my favorite pastime. It's a great way for me to blow off some steam. Nothing satisfies me more than going into a public server and just completely dominating it with some buddies. I also try to give some respects to the older games as well. A buddy of mine recently found his copy of Battlefront 2 and was kind enough to sell it to me. Needless to say we've been pumping out 6 hour long sessions of nothing but Conquest, Hunt, CTF, and sickass lightsaber duels. I can honestly say some of my best memories were just chilling with my friends, be it in person or via Skype, and just hardcore going at some videogames on the hardest possible difficulty. I feel like this group is a great way to meet like-minded people who love the feeling of beating a game on the hardest difficulty as their first time playthrough.

Thanks for reading my application, looking forward to hearing from you guys.

Gaming Platforms:

PC | Xbox 360 | Xbox One

Recently i have been playing PC games more often than a console games.

Most-Played Games:

Skyrim (Xbox 360):

I can't tell you how many hours i put into this game (hundreds). I've yet to purchase Elder Scrolls Online, but i may at a later date.

Call Of Duty: Modern Warfare 2 (Xbox360):

Back in the day i was that nerd that would do the 1v1 on rust with snipers and win all the time. If i go on now i typically just "try hard" in SND.

Call Of Duty Black Ops (Xbox360):

This is in my top 10 games of all time. I always play COD Black Ops. Although the sniping will never be as good as MW2, i enjoy going on there and having some fun in SND or Demolition. I used to be apart of a spawn trap team, but i soon realized that was not fun, so i left that team.

RuneScape Private Servers (PC):

I've always been playing RSPS. Whether i'm just doing bug test or playing the game, RSPS are typically my go to.

Minecraft (PC & Xbox 360):

Normally i like to just build things in creative mode, however i have played survivor before, which does include factions. I am currently not real into MC, but i can easily get back into it.

MapleStory (PC):

This is game which i played A LOT of when i was younger. I'm currently building my new PC and hope to get back into MapleStory once my computer is built. I decided to throw this down on this list due to all the hours i've put into the game.

*I want to get into CSGO and League once my PC is built too.

Games I Own:

- COD: BO2 and 4 (xbox 360)
 - Dragon Age Inquisition (xbox one)
 - Shadow of Mordor (xbox one)
 - Halo 1, 3, 4, Reach, Master Chief Collection (Xbox 360 of course)
 - Runescape (Don't play this anymore though)
 - Fifa (xbox 360)
 - Assassins Creed (It's multiplayer online)
 - Mortal kombat vs dc universe vs marvel (xbox 360)
 - Mafia 2 (xbox 360)
 - LA Noire (xbox 360)
 - GTA 5 (xbox 360)
 - Tons more xbox 360 games.
-

Why should we accept you?:

I enjoy playing in groups and bringing enthusiasm to those around me. I'm always willing to play new games, well, for the most part. Being apart of a group such as this one also gives motivation to each individual. Video games create new friend's as i should know from my experience with RSPUnit. RSPUnit is a RSPS bug abusing forum. I met a ton of people on there who i am now great friend's with due to my 2 years of being there; some of those members i am close to and hope to visit them when i am a bit older. I'm looking for another group of random people to become my friend's with. I hope to be accepted to this group in order to create new memories that i'll remember for the rest of my life. Thank you for reading my application and i looked forward to hearing back.

I play Counter-Strike every day for hours on end. It's my favorite game of all time, and I would say I'm very active in the CS section of HackForums. I'm also willing to make some video guides or something along those lines for the group.

Other Games I Play:

I don't play other games.

Why should we accept you?:

I think you should accept me because I'm different than everyone else on this planet in every way. I physically look different, I think differently and I operate differently. I think I would bring a unique skill-set and mentality to your group that the other members will enjoy and you can utilize.

I'm a loyal pc gamer, and been playing video games on pc for 10-15 years. On lan parties I might hook up my ps3, and I use my psp vita or phone when I'm on the run and need to kill some time :)

Most-Played Game(s):

Oh god where do I begin. I've literally played hundreds if not thousands of games. Oh well lets start with what I've been playing recently.

Counter-strike My cs history is pretty long I started with cs 1.6, started playing css when it was released, but got tired of it and played other games (battlefield). When csgo were released I spent a shit ton of hours (and money) on it. I am a global elite, and I participate in local lans in Norway.

Arma 3 is also a game I've spent a lot of hours on the last years. I've played about every single mod such as: epoch, king of the hill, wasteland, battle royale and exile which is just released. One of the reasons I love arma 3 so much, is because there is a much more mature user base, where you can actually meet new people and have a nice chat. I've been an admin/mod on a pretty known epoch server for quite some time.

Other Games I Play:

PC:

Why should we accept you?:

Because I'm a kind of person which is easy to get along with. I love working in a team and share experiences to improve myself and possible teammates. I've been playing video games for at least 10 years now, so I do sit on quite a lot of information and knowledge regarding gaming. Also I do participate at lan parties and where I often compete in competitions. As you can probably tell I'm a person which is really competitive in certain games. I do of course play gta v for instance, just to relax and have a good time with friends, but when there's a competition on the table you can always count me in! :)

Gaming Info

How long have I been playing video games for? Well, I received Halo as a Christmas present when I was 5 years old for the original Xbox. I have been gaming ever since. Over the duration of the past 4 years, I actually played Call of Duty competitively. I traveled across the country competing at national events. I haven't been considered a "pro" player since CoD4 was on the circuit, but I managed to break Top 16 at UMG Orlando earlier this year.

The games I play the most are MLB 15: The Show (On PS4) And as of recently Halo MCC On the Xbox One. I used to play a lot of Call of Duty but then it went to shit.

Other Games I Play:

Battlefield 4, The Order 1886, GTA V, Destiny, Bloodbourne, And recently bought Rocket League but have only played a couple matches.

Why should we accept you?:

You should accept me because I am a pretty chill dude and I am really into gaming and love to discuss it with others, I also have a lot of knowledge on the consoles themselves (I used to repair Xbox's for a living a few years ago) so if other members had problems with their console I could more than likely help them out with it.

I'm 16 and I love gaming. I think it's a great past time, when you've got nothing else to do. I've been playing games since I was about 5 years old. My first game that I played was on the GameBoy Advance: Super Mario bros 3. That's where my gaming passion started. I love it because, gaming doesn't just waste your time (sometimes it does. hehe), it can help you build skill. Such as Leadership, Strategic Planning, Socialization, Creative Prowess, Patience and many more! Gamer for Life!

Why should we accept you?:

I'm a very active person, I love hanging out and making new friends. I'm not an "Expert" at gaming but that's why i'm here, trying to learn more about it. I'm a very chill guy, if you've got a problem i'll be more than happy to help you out. I would love to join Axiom because I feel it is the perfect group for me. Most-Played Game(s):

Minecraft and CS:GO. They are both insanely addiciting games and really fun to play when you have a whole group of friends! I definitely play minecraft more though. There are so many servers and just so many different things to do with friends it really cant ever get boring. CS:GO is also a good game cause I like taking it seriously in competitive and really having a good team. But I also like to kick back in casual with a group of friends and just have fun. I also love to play Forza Horizon 2, I drift in that game as there are tons of little mini-drifting games you can play. I also love to drag race cause its just such a nice feeling when you get your tune a little better :D I also love to play games like Portal 2 and Tomb Raider and those puzzle adventurer type games!

Other Games I Play:

I play BF4 and I plan to get BO3, AC:Syndicate and the new Need For Speed on the Xbox one or

PC. All three look like really fun games and all of them are multiplayer and again, really good to play with a group of friends. I have also found myself playing a lot of 8 ball pool and Mortal Kombat X on the iPhone. I'm really all about finding new games to play though!

Why should we accept you?:

I play games a lot, i'm on from when i get out of work until pretty much I have something to actually do which isn't a lot. In my now 13 years of gaming I have made a lot of friends and talked to thousands of people so I would say I'm a really easy person to talk to and can make friends really easy! I am also up to play any games, and even try new games! I am available most of the time so I can do Friday night game nights and things like that!

Warning Level Explanation:

No warning level and I plan to keep it that way

Thanks for reading my application!

Actively Played Games:

League Of Legends | CS:GO | Oldschool Runescape | ArcheAge

Games Owned:

It's kind of difficult to make a compete list of all the games I own, I'm just going to say that I own most of the popular games that have come out ever since playstation 3's came out. For my Xbox 360 I only own 2 games unfortunately, I don't have enough memory for anymore. Those games are Soul Calibur V, and Halo 4. For my Wii I own Mario Cart Wii, Super Smash Bros' Brawl, Super Mario Bros, I use Wii Fit a lot, even though it's not a very good workout. I own a few Pokemon games for my Gameboy but haven't cracked into those in a few years. On my Droid Turbo smart phone, I play

Fallout Shelter a lot, and also sometimes I play some random games I download off the Play Store. And same goes for my tablet and iPod touch. Those I use for minor games that are really pointless.

Why Should You Accept Me?:

I believe you should accept me, because I am an active competitive game player. I love communicating with people that have similar interests as me, and being in this group would enable me to have a good impression on other gamers around me. By accepting me, I'll actively partake in group events, and stay as active as possible in the groups sub-forum. I am a true gamer, by that I mean I love any kind of game! As long as it's a great story or game-play, I'll be happy to play with group members, and even host tournaments.

Small Introduction/Conclusion:

My name is Billy! I grew up in Oregon, and still live in Oregon today. Gaming has been my passion for the majority of my life, ever since my father bought me my first Playstation 1. Since then I've been upgrading to new consoles as soon as I get the chance, and have yet to be disappointed by the games that I buy. There have been times where I've even put gaming over school (I'm sure that's not uncommon.) Someday when I have kids, I want them to play video games and be happy! I'll get them their consoles, whatever they want as long as I can afford it. Gaming has been something for me to look up too in life. I strive to be better at every single game that I play. And I've yet to give up, merely taken breaks, or upgraded to a new game. I've been on this forum for a really long time (in my eyes), and I'm very active in the Runescape section, and recently been active in the League of Legends section. I hope that you'll take me into consideration when picking your group members. I believe I can be a valuable member to your group. Thank you.

Why Should We Accept You?:

I've been gaming for most of my life, generally not too competitively though there are certain games that I'll take seriously (Such as League of Legends). Gaming is one of my favourite past times and while I'll sometimes play alone, I prefer playing with friends in multiplayer games. I recently

downloaded a few emulators for the Nostalgia of playing old games like Luigi's Mansion and Super Mario 64. I haven't been extremely active in the gaming subforums but plan on becoming more active around the entire site as a whole. I took quite a long vacation ban but since returning have been online around 8-10 hours/day either on my phone or the computer. I plan on becoming extremely active in the league of legends forum and hopefully the CS:GO forum as I plan on purchasing that game. I'm a friendly individual and easy to get along with. Here's hoping you pick me. :)

Thanks for reading!

P.S Did this on my phone so it's probably formatted horribly.

My preferred gaming platform as of now is Xbox 360, however I will be making the transition to Xbox One soon as more games are released

Most-Played Game(s):

Halo: 3 is the game I play the most. Followed closely by Halo: Reach. Halo has been the game I have grown up with and have been playing online since 2005. I am mostly playing Halo: Reach up until the lead up to Halo: 5 on Xbox One. I'd be playing Halo: 3 but the game is dead on the 360 and Halo: The Master Chief Collection is still not functioning for Australians as of today.

Other Games I Play:

PC:

Spoiler ([Click to View](#)) CS: GO
Runescape
Zoo tycoon (lol)

Xbox 360:

Spoiler ([Click to View](#)) COD Modern Warfare 2
COD Black Ops (mostly zombies)
COD Black Ops 2
GTA 5
Gears of War
Halo Wars
Far Cry 3
Skate 2
Star Wars: Battlefront 2

Xbox One:

Spoiler ([Click to View](#)) Halo: The Master Chief Collection
CoD: Advanced Warfare
Forza Horizon 2
Gears of War Ultimate Edition
Far Cry 4
TitanFall

Nintendo DS

Spoiler ([Click to View](#)) Pokemon! of course! Ruby, Emerald, Fire red, Pearl etc

Why should we accept you?:

I'm a really hardcore gamer especially in the Halo scene. I've spent countless hours of my life playing Halo, CoD, Gears, runescape etc and I love it and it is my passion! I have recently begun taking gaming to the next level by attending events within Australia to compete at the highest level. I recently attended an ACL event with pro players such as 'Blaze' and 'Purpal Haze' and took out some of the old H3 legends in my country such as 'Benno' 'Adz' and 'Codestar' On top of that I post regular Halo videos to my youtube channel nearly every week and it is my dream to start a twitch channel to entertain other gamers such as myself. (When my government decides I can have good internet :())

Cheers for reading my application fellas. Hope to see you all in the subgroup :D

My Current Games and Games I Own.

I mainly play CS:GO at the moment, however i own hundreds more games that i am happy to play if i get invited to. Below are some of my hours and links to my steam accounts. I wont be listing all the games i own since that number is over 300.

My Most Played Games:

Counter Strike: Global Offensive | Close to 1k hours

Rust (Legacy) | 1.3k hours

Blacklight: Retribution | 1.5k hours

My Steam Accounts (Games List):

Why Should You Accept Me Over Other Applicants.

I have spent ALOT of time invested into gaming. If you need someone to advise on CS:GO Gambling i am your guy. Ive been up 10k at one stage. I am also quite active in the Counter Strike sub-forum. I recently released my [\[Sorted\] The Ultimate CS:GO Betting Sites List](#) thread. I am a generally positive guy who respects everyone. I have a wide range of skills surrounding technology in general.

I am not going to go over the top with walls of text and huge graphics in this application. I do not think that is what applications should be judged on. If you have any questions or quires about my application feel free to contact me and ask.

PS4 - ZM187 ?

Gaming Platforms:

I play on the PS4, and sometimes PC ?

Most-Played Game:

Dragon Ball Xenoverse, I also play a lot of Rocket League and Devil May Cry

Experiences / About Me:

I've played on the PS since I was 6, I played a lot of Call of Duty and I played on the pc for a long time. For the pc I always liked strategy games (Total War, etc.)

And I've played on the xBox too when I was little, and I destroyed it lol.

I have played alot on the Nintendo DS and a bit on the Wii and 3DS.

I always like fighting games like Dragon Ball Z.

The game I most prefer is Fallout, I like it alot and I want to play Fallout 4 when it comes available in the store. ?

Why should we accept you?:

I play games everyday and gaming for me has developed in a way of seeing life change and it changed my perception of people.

Gaming is one of my favourite things in life and I appreciate it. ?
