Thread: [How to double dipp PP](#)

Hazardous - September 13, 2015, 2:25 am

Somehow my amazon.com double dipping method (Using email spoofer got deleted) whatever...

Today i will try to teach you method using money request on PayPal:

1) When u receive money just tell them that now u need confirmation of Transaction(Tell them that's because your paypal is not verified)

this may sound stupid but just believe me 90/100 will believe it, and since they already sent money they will be made to accept your request.

2) Go to Request Money ---> Request Money ---> Type victim's email and exactly the same amount they sent to you (don't forget to tick service) --->Enter these details:

Subject -PayPal money transaction confirmation request from Name Surname

Message-Please confirm your latest transaction to "Your paypal email here"

3) Profit

The trick is that horny guys are too stupid to understand that u can edit message of money request yourself, they think its really message from paypal. That's all. Don't be skeptical it actually works for me 9/10

Very smart. However, I wouldn't personally ever E-whore or any of that junk because it feels terrible. But nice of you to share your secrets for instead of making and overpriced ebook. Thank's OP.
