Thread: [an in-depth tutorial on how to make very HQ picture packs that are unsaturated!](#)

Optimized - September 13, 2015, 11:57 am

Hey guys! It's me, optimized and I'm bringing you a short tutorial that is sort-of obvious but will potentially double your sales if you can optimize it and use google.

Firstly if you want to get into eWhoring more, join my skype group [here](#).

Secondly if you want to learn more about eWhoring, check out my eWhore guide [here](#).

Thirdly if you want to help me develop a new method on Double Dipping sign up [here](#).

Finally if you want a technique on eWhoring ask me for a PM [here](#).

Step One:

Enter a porn site that shows galleries of random pornography pictures or a tumblr feed that has pictures of girls.

Step Two:

Use these to keep navigating until you find a site that doesn't seem like it picks up very much traffic, and try to find pictures that have been uploaded in packs by ex-Boyfriends or people who have leaked the pictures.

Step Three:

Check through the pictures and make sure there is selfies, pictures of her and no watermarks.

Step Four:

If there are watermarks, either crop them out or fill content-aware to remove them.

Step Five:

Create different folders for different things. Selfies Teases Nudes etc.

Step Six:

Save the pack in a local file you can access quickly

Step Seven:

Zip it up and share it with Hack Forums, or be selfish!

Step Eight:

Say Thanks to me below... :)
