Thread: [\[REQ\] Item falling in water tut](#)

mokkacyan - September 14, 2015, 10:36 am

So, i am interested in animations, so far got some amateur animations, and i am very interested in items falling into water. Are there any tuts out there?

I mean effect like this (the moment ball falls in water and the ripples) -

Spoiler [\(Click to View\)](#)

Thanks ?

is everyone stupid A.F? He's asking HOW to make the animation, or where he would start.

OT; I'll browse around, But i've never seen an animation like this before.

Shit man, I swear I've seen this animation before, but I don't remember who's it was. I looked around for a tutorial, but all I could find was [this pre-made template](#) that's barely similar. I'm not sure if it will help at all, but I figured it couldn't hurt to link. Good luck man.
