Thread: [Phone hacked, social media hacked, computer hacked](#)

PleasePleasePleazeHelpMe - September 15, 2015, 1:09 am

Hi, I need help. For the last two years my phone calls, text messages, personal IMs, emails, and all social media devices have been compromised. There have been a group of people that have been reading all my personal messages and recording all my conversations I have while on the phone and just in general by keeping my iPhone mic on and set to record. I cannot live with it anymore. I don't know how to make it stop. The only people I can think to ask are fellow hackers. I realize it's quite simple for this to happen. I just don't know how to make it end. I'm not trying to use alarmist language but I really at my wits end and need to gain my personal freedom and true life back. All help and any help in this matter would be greatly appreciated.

This sounds really unlikely bro, most people get pretty bored with slaves.... I doubt they watched you for 2 years lol

Do any of you know how to get rid of this problem though? Like diablo the hacking?

Why would you start care about being hacked after 2 years? Lmfao. Like wtf.

I've cared forever. I just am reaching a breaking point and don't want to continue living like this. Not in an alarmist sense.
