Thread: [LLVM-vs2010 doesn't works properly on vs2010pro](#)

sexytampaxlover - September 15, 2015, 2:08 am

[VS2010 ERRORS](#)

so i cant understood why this problems ,ive installed before vs2010 and after LLVM r246982 (8 September 2015).

I've followed this steps here on the pic unde

[INSTRUCTION IVE FOLLOWED](#)

anyone know why i get those errors ?
pls help me because im going to be crazy .

excr4sh - September 15, 2015, 2:13 am

try with VS2012, I see you're using one of the latest versions of LLVM with an old VS. I have VS2012 with LLVM and works fine.

FUCK IM KILLED .

i will try later now im going to sleep
bye

byeOk, I see you updated the post, I see this is not a problem with LLVM or VS. create a proper entry point for the type of project that you're using.

console project:

```
Code #include <windows.h>
#include <tchar.h>
#include <stdio.h>
INT __cdecl _tmain(INT Argc, TCHAR* Argv[])
{
    return 0;
}
```

Windows project:

```
Code #include <windows.h>
#include <tchar.h>
INT APIENTRY _tWinMain(
    _In_ HINSTANCE hInstance,
    _In_opt_ HINSTANCE hPrevInstance,
    _In_ LPTSTR lpCmdLine,
    _In_ INT nCmdShow)
{
    return 0;
}
```

just wait a moment i will done my virtual w7 in vbx and i will tell you oki?

[img]http://s1.postimg.org/metxpbxji/fixd.jpg[/img]

As you can see now i have solved my problems with it,

but i want to know this :

from where did you learn about this solution ?

can you show me ?

if not ,because you done it from yourself ,pls explain me how did you arrived to this solution .

Thanks

Thanks based on experience and knowing how compilers and linkers work.

holy shit !!!!!

this is awesome that you are like a pro

but i don't understood ,if this is your skill ,so why on the official site this very important detail is not written?

another fact which disturb me is :

the same thing i was done in vs 2010 i must repeat in visual studio 2013 ? and 2015 ?

Also on the official site i've read : llvm can't use iostream and some of function of c++ under windows.

Its a joke ????

why too much problems under windows about programming in c++.....

i must to start to learn c++ as fast as possible,because im loosing to much time with this problems.
