Thread: [\[HELPDESK\] Problems portforwarding? Post here and I will assist in opening your port!](#)

Yakz - September 15, 2015, 5:21 am

As I have noticed many users having issues portforwarding, I have decided to run this service to help anyone who has issues opening their desired port.

If you wish to receive my help, post on this thread using the form below.

Code Static or dynamic IP:

Desired open port:

Router & model:

Type of support:

(Skype & teamviewer or HF PM and teamviewer)

Don't hesitate to post if you're in need of help ?

A pretty good helpdesk since portforwarding is the major issue the beginners face in RAT'ing
Thanks for your contribution towards this section

First of all i'd like to thank you for making this thread and doing this service.

Static or dynamic IP:

Static

Desired open port:

any, attempting 1337 currently

(my old one when it did work)

Router & model:

Linksys

(I forgot model number, I can check in a bit.)

(My computer uses WiFi currently)

Type of support:

I would prefer skype and teamviewer, seems to be faster that way.

My skype: (Its in a PM)

Teamviewer info: would prefer to give you it on skype

Info: I have everything set up, used to a few months back, but when I try it again I can't seem to open a port.
